

# QUARTERLY RETURN

OF

## MARRIAGES, BIRTHS, AND DEATHS

REGISTERED IN THE DIVISIONS, COUNTIES, AND DISTRICTS OF

### ENGLAND;

WITH CERTAIN DETAILED INFORMATION RELATING TO THE DEATHS IN EACH  
REGISTRATION SUB-DISTRICT.

By Authority of the Registrar General.

PUBLISHED BY EYRE AND SPOTTISWOODE, 9, EAST HARDING ST., FETTER LANE, E.C.

No. 141.] **Marriages**—*October, November, December, 1883.* [Price 9d.  
**Births and Deaths**—*January, February, March, 1884.*

*General Register Office, Somerset House,  
30th April, 1884.*

The resident POPULATION of the UNITED KINGDOM in the middle of 1884 is estimated at 35,951,865 persons; that of England and Wales at 27,132,449, of Scotland at 3,866,521, and of Ireland at 4,952,895.

In the United Kingdom the *births* of 285,545 children, and the *deaths* of 175,361 persons, were registered in the three months ending 31st March 1884. The recorded natural increase of population was thus 110,184. The registered number of persons married in the quarter ending 31st December 1883 was 148,920.

The birth-rate in the United Kingdom in the first quarter of 1884 was 31·9 per 1000, and the death-rate 19·6. The marriage-rate in the fourth quarter of 1883 was 16·6 per 1000.

The several facts concerning Scotland and Ireland are recorded in the Quarterly Returns of the Registrars General of those parts of the United Kingdom.

### ENGLAND.

This Return comprises the BIRTHS and DEATHS registered in the 2154 registration sub-districts of England and Wales during the quarter ending 31st March 1884; and the MARRIAGES in 14,669 churches or chapels, in 9170 registered places of worship unconnected with the Established Church, and in 630 Superintendent Registrars' Offices, in the three months ending 31st December 1883.

#### *Marriages.*

During the three months ending December last, the marriages of 123,648 persons were registered in England and Wales, corresponding to an annual rate of 18·3 per 1000 of the estimated population in the middle of this year. This rate was 0·4 below the mean rate in the corresponding quarters of the ten years 1873-82, and 0·1 above the rate in the last quarter of 1882. The annual marriage-rate in the fourth quarter of last year ranged in the several counties from 12·4 in Here-

fordshire, 12·5 in the extra-metropolitan portion of Middlesex, and 13·9 in Hertfordshire, to 21·9 in the East Riding of York, 22·3 in Norfolk, and 22·9 in Nottinghamshire.

### *Births.*

The births registered in England and Wales during the three months ending March last were 224,694, showing a decrease of 7,392 from the number returned in the corresponding period of 1883. The annual birth-rate, which was 33·2 per 1000 of the estimated population, was 2·8 below the mean rate in the ten preceding corresponding quarters, and showed a further decline from the rates recorded in recent corresponding quarters. So low a birth-rate has not been recorded in the first quarter of any year since 1850. The lowest county birth-rates last quarter were 24·4 in Rutlandshire, 25·3 in Herefordshire, 26·5 in Huntingdonshire, 27·0 in Dorsetshire, and 28·5 in Shropshire; the highest rates were 36·0 in Essex, 37·2 in Monmouthshire, 37·7 in Staffordshire, 37·9 in Durham, and 38·2 in Nottinghamshire.

In the twenty-eight great towns the births registered last quarter corresponded to an annual rate of 35·4 per 1000 of their aggregate population, which was 2·2 above the general English rate. The birth-rate was 34·8 in London, and was 35·9 in the twenty-seven provincial towns. In these provincial towns the rates ranged from 27·8 in Halifax, 28·5 in Bradford, 29·4 in Brighton, and 29·5 in Huddersfield, to 39·0 in Newcastle, 41·6 in Nottingham, 43·8 in Cardiff, and 44·9 in Sunderland. In fifty other large town districts the birth-rate was 34·8, and 0·6 below the rate in the great towns; the lowest rates in these fifty districts were 24·7 in Cheltenham, 25·5 in Bath and in Southport, 25·7 in Hastings, and 26·3 in Rochdale; and the highest, 41·4 in West Bromwich, 41·8 in Middlesbrough, 42·0 in Warrington, 42·5 in South Shields, 43·0 in Dudley, and 45·0 in Newport.

### *Movement of the Population.*

The *natural* increase of the population of England and Wales, or the excess of births over deaths, which had been 83,495 and 85,230 in the first or March quarters of 1882 and 1883, was 92,597 in the first three months of this year. From returns issued by the Board of Trade, it appears that 45,492 emigrants embarked during last quarter from the various ports of the United Kingdom at which emigration officers are stationed. Distributing 646 whose nationality was undistinguished, and excluding 7663 foreigners, 37,829 were emigrants of British origin, including 25,758 English, 4279 Scotch, and 7792 Irish; the numbers of British emigrants in the three preceding corresponding quarters were 28,788, 42,155, and 43,611 respectively. The proportions of emigrants last quarter to a million of the population in the three divisions of the United Kingdom were 949 from England, 1107 from Scotland, and 1573 from Ireland.

Compared with the proportion in the corresponding quarter of 1883, the proportion of emigrants last quarter showed a decline in each of the divisions of the United Kingdom.

### *Prices and Pauperism.*

The average price of wheat during the three months ending March last was 37s. 9d., and was 2s. 3d. below that which prevailed in the preceding quarter;

it was the lowest mean price in the first quarter of any year since 1851. The mean wholesale price of beef and of mutton last quarter was  $6\frac{1}{8}d.$  and  $6\frac{3}{8}d.$ , per lb. respectively; the mean price of beef was  $\frac{2}{3}d.$ , and of mutton  $\frac{5}{8}d.$ , below the mean prices prevailing in the preceding quarter. The average price of the best sea-borne coal in the London market, put in barge from the collier in the Thames, was  $15s. 3d.$  per ton, showing a decrease of  $2s. 6d.$  from the mean price in the preceding quarter, and was  $1s. 3d.$  per ton below that which prevailed in the first quarter of 1883. The mean price of Consols was  $101\frac{1}{8}l.$  showing an increase of  $5s.$  upon the mean price in the preceding three months. The minimum annual rate of discount charged at the Bank of England, which had been 3 per cent. throughout the last quarter of 1883, was raised to  $3\frac{1}{2}$  per cent. on 7th February, and again reduced to 3 per cent. on 13th March; the average rate during the quarter being  $3\cdot188$  per cent.

The average number of paupers (exclusive of lunatics in asylums, and vagrants) relieved in England and Wales on the last day of each week in the quarter was 723,403, of whom 186,636 received in-door and 536,767 out-door relief. The proportion of the population in receipt of pauper relief during the three months ending with March last was 26·7 per 1000, against 27·0 and 27·9 in the two preceding corresponding quarters.

### *Meteorology.*

The remarks upon the Meteorology of the quarter at the Royal Observatory, Greenwich and at other stations of observation, furnished by Mr. James Glaisher, F.R.S., will be found on pages 65 to 72, with accompanying Tables. The mean reading of the barometer for the quarter was 29·807 inches, and was 0·043 above the mean reading in the corresponding periods of 43 years; the mean readings for January and March were above the average, while that for February was below the average. The mean temperature of the air in the quarter was  $43^{\circ}\cdot4$ , and was  $4^{\circ}\cdot7$  above the average for the corresponding period in 113 years. Snow fell on the 1st, 26th, and 27th January, and during the first three and last seven days of March the weather was cold, but with these exceptions the weather was unseasonably mild throughout the quarter. The monthly mean temperature exceeded the average by  $7^{\circ}\cdot4$  in January,  $3^{\circ}\cdot2$  in February, and  $3^{\circ}\cdot4$  in March. At 42 stations of observation the mean temperature of the quarter ranged from  $40^{\circ}\cdot2$  at Halifax, and  $40^{\circ}\cdot7$  at Wolverhampton, to  $45^{\circ}\cdot7$  at Truro, and  $46^{\circ}\cdot4$  at Barnstaple.

The amount of rain measured at Greenwich during the quarter was 4·64 inches, and was 0·37 below the average amount in the corresponding periods of 68 years. The rainfall was below the average in each month of the quarter. Rain was measured at Greenwich on 15 days in January, 13 in February, and 11 in March; in all, on 39 of the 91 days in the quarter. At 42 stations of observation the recorded rainfall ranged from 3·11 inches at Cambridge, to 17·02 inches at Totnes.

The number of hours of bright sunshine recorded at Greenwich during the quarter was 148·7, and was  $36^{\circ}\cdot9$  below the average number recorded in the five preceding corresponding periods.

### *State of the Public Health; Deaths.*

During last quarter 132,097 deaths were registered in England and Wales, corresponding to an annual rate of 19·5 per 1000 of the estimated population.

This death-rate was 3·7 below the mean rate in the ten preceding corresponding quarters, and was lower than in any winter quarter since civil registration commenced. This low rate implied that no fewer than 33,600 persons survived the three months who would have died had the death-rate corresponded with the average rate in the 46 preceding corresponding quarters.

The death-rates in the several English counties last quarter ranged from 15·9 in Westmorland, 16·4 in Dorsetshire, 16·5 in Sussex, 16·8 in Northamptonshire and 16·9 in Oxfordshire, to 20·4 in Nottinghamshire, 21·1 in Staffordshire, 21·8 in Lancashire, 22·6 in Monmouthshire, and 22·9 in Cornwall.

The 132,097 deaths last quarter included 68,116 of males, and 63,981 of females. The annual death-rate among males was 20·7, and among females 18·4 per 1000 estimated to be living of each sex. In equal numbers living the deaths of males were 113 to 100 deaths of females.

**URBAN AND RURAL MORTALITY.**—In the registration districts and sub-districts comprising the chief towns (see Table III.) and containing an estimated population of nearly sixteen and a half millions, the death-rate was 20·5 per 1000; in the remaining and chiefly rural population of more than ten millions and three quarters the rate did not exceed 18·0. These urban and rural rates were respectively 4·1 and 3·2 below the average rates in the ten preceding corresponding quarters. In equal numbers living, the deaths were 114 in the urban to 100 in the rural population, against an average proportion of 116 to 100 in the ten corresponding quarters. The excess of urban mortality last quarter was, therefore, below the average.

In the twenty-eight great English towns, including London, and having an estimated population (in the middle of 1884) of nearly eight millions and three quarters, the deaths registered corresponded to an annual rate of 21·1 per 1000, which was 0·6 above the general urban rate. The death-rate did not exceed 20·4 in London, whereas it was 21·8 in the twenty-seven provincial towns, among which it ranged from 17·5 in Derby, 18·5 in Portsmouth, and 18·7 in Bristol, to 24·0 in Leeds, 24·7 in Preston, 25·1 in Oldham, and 27·8 in Manchester.

In fifty other large town districts, with an aggregate population estimated at about two millions and three quarters, the deaths registered corresponded to an annual rate of 20·0, being 1·1 below the rate in the twenty-eight larger towns. The lowest rates among these fifty towns were 12·9 in Burton-on-Trent, 14·1 in Darlington, 14·7 in Barrow-in-Furness, and 14·9 in Oxford; the highest rates were 25·1 in West Bromwich, 25·8 in Wigan, 26·5 in Merthyr Tydfil, and 26·8 in Ashton-under-Lyne.

**MORTALITY AT DIFFERENT AGES.**—The 132,097 deaths last quarter included 30,143 of infants under one year of age, 66,316 of children and adults aged between one and 60 years, and 35,638 of persons aged 60 years and upwards.

The rate of infant mortality, measured by the proportion of deaths under one year to registered births, was 134 per 1000; in the ten preceding corresponding quarters the proportion of infant mortality was 147 per 1000, and ranged from 167 in 1875, to 134 in 1881. The lowest rates of infant mortality last quarter were 100 in Dorsetshire, 101 in Westmorland, and 106 in Hampshire and in Berkshire; while the highest were 154 in South Wales, 157 in Rutlandshire, and 183 in Cornwall.

In the twenty-eight large towns the proportion of infant mortality was 139 per 1000 births, and 5 above the general English rate. The rate did not

exceed 135 in London, but averaged 142 in the twenty-seven provincial towns, among which it ranged from 87 in Portsmouth, 105 in Derby, 114 in Birkenhead and in Sunderland, and 125 in Halifax, to 162 in Blackburn, 165 in Preston, 173 in Manchester, and 186 in Oldham. In fifty other large town districts the rate of infant mortality was 143 per 1000 births; while the proportion was but 86 in Warrington, 100 in both Shrewsbury and Tynemouth, and 102 in Chester, it ranged upwards to 187 in both Rochdale and Stockport, 189 in Maidstone, and 210 in Merthyr Tydfil.

Among persons aged between one and 60 years the annual rate of mortality was 10·9 per 1000 persons estimated to be living at these ages, against an average of 12·8 in the ten preceding corresponding quarters. In the twenty-eight great towns the deaths at these ages corresponded to an annual rate of 12·9 per 1000, ranging from 9·9 in Bristol, 10·1 in Wolverhampton, and 10·2 in Brighton, to 15·7 in Liverpool, 16·0 in Leeds, and 18·7 in Manchester.

The deaths among persons aged 60 years and upwards corresponded to an annual rate of 71·4, being 15·1 below the mean rate at these ages in the ten preceding winter quarters of 1874-83. The deaths at these ages in the twenty-eight towns corresponded to an annual rate of 74·7 per 1000, which exceeded the general English rate by 3·3. In London this rate was 71·3, while it was 77·8 in the twenty-seven provincial towns, ranging from 60·6 in Norwich, 64·5 in Portsmouth, and 65·5 in Derby, to 91·0 in Blackburn, 93·2 in Preston, and 97·6 in Halifax.

The rate of mortality at all ages was 15·9 per cent. below the mean rate in the ten preceding corresponding quarters. The death-rate of infants was 8·8 per cent., that of children and adults aged between one and 60 years 14·8 per cent., and that of persons aged 60 years and upwards 17·5 per cent., below the same average.

ZYMOTIC DISEASES.—Of the 132,097 deaths from all causes—

3265	“	scarlet fever,
3034	“	whooping-cough,
2516	“	measles,
1671	“	fever,
1481	“	diarrhœa,
1270	“	diphtheria,
315	“	small-pox.

Thus 13,552 deaths were ascribed to these causes, corresponding to an annual rate of 2·00 per 1000, against an average rate of 2·55 in the ten preceding corresponding quarters.

The lowest county rates from these causes were 0·52 in Rutlandshire, 0·68 in Dorsetshire, 0·75 in Suffolk, 0·77 in Oxfordshire, 0·85 in Huntingdonshire, 0·88 in Cumberland, 0·90 in Buckinghamshire, and 0·98 in Norfolk; while the highest were 2·40 in Durham, 2·66 in Lancashire, 2·75 in Nottinghamshire, and 2·82 in Staffordshire and in Monmouthshire. In the twenty-eight great towns the rate was 2·64, being 2·70 in London, and 2·60 in the twenty-seven provincial towns; it ranged from 0·84 and 0·90 in Halifax and Bradford, to 3·27 in Oldham, 3·77 in Salford, 4·00 in Manchester, and 4·71 in Leeds. In fifty other considerable towns the rate was 2·16, ranging from 0·36 and 0·43 in Cheltenham and Cambridge, to 4·95 in Walsall, 5·14 in West Bromwich, and 6·22 in Wigan. In the remainder of England and Wales the rate from these diseases was 1·62.

The deaths from *scarlet-fever* numbered 3265, and corresponded to an annual death-rate of 0·48 per 1000, against an average rate of 0·65 in the ten preceding first quarters.

No deaths from this disease were registered in Rutlandshire; in the remaining counties the rate ranged from 0·02 in Dorsetshire and in Cumberland, and 0·06 in Westmorland, to 0·76 in Lancashire, 0·80 in Durham, 0·86 in Yorkshire, and 1·19 in Staffordshire. In the twenty-eight great towns the rate was 0·56, ranging from 0·04 in Bolton and in Bradford, to 1·27 in Newcastle-upon-Tyne, 1·72 in Sheffield, and 2·94 in Leeds. In fifty other considerable towns the rate was 0·71, and considerably higher than in the twenty-eight great towns; it was 2·41 in Walsall, 2·47 in Dudley, 2·80 in Middlesbrough, 3·57 in Ashton-under-Lyne, and 4·74 in Wigan. In the remainder of England and Wales the rate was 0·40; it showed a marked excess in Abingdon, Ware, Newnham, Longnor, Hindley, Pemberton, Morley, and Thornaby registration sub-districts.

The deaths from *whooping-cough* numbered 3034, and corresponded to an annual rate of 0·45 per 1000, against an average rate of 0·63 in the ten preceding first quarters.

No death from this disease was registered either in Herefordshire or in Rutlandshire. In the remaining counties the rates ranged from 0·03 and 0·06 in Worcestershire and Westmorland, to 0·47 in Lancashire, 0·67 in Surrey (*extra-metropolitan*), 0·85 in Middlesex (*extra-metropolitan*), and 1·28 in Cornwall. In the twenty-eight great towns the rate was 0·76, and ranged from 0·04 in Norwich and in Preston, to 1·10 in London, 1·12 in Huddersfield, and 1·69 in Bolton. In fifty other considerable towns the rate was 0·33, and ranged upwards to 1·16 in Merthyr Tydfil, and 1·37 in Rotherham; while in the remainder of England and Wales the rate was 0·29. Among the registration sub-districts in which a marked mortality from this disease was registered were Fowey, Redruth, Illogan, and Camborne, all in Cornwall.

The deaths from *measles* numbered 2516, and corresponded to an annual rate of 0·37 per 1000, against an average rate of 0·39 in the ten preceding first quarters.

No death from this disease was registered in Buckinghamshire; in the remaining counties the rates ranged from 0·02 in Dorsetshire, in the North Riding of Yorkshire, and in Cumberland, to 0·62 in Hampshire, 1·02 in Monmouthshire, and 1·26 in Nottinghamshire. In the twenty-eight great towns the rate was 0·60; no death from this disease was registered either in Bolton, Halifax, Sunderland, or Cardiff, while the rate ranged upwards to 1·49 in Salford, 1·87 in Portsmouth, and 2·29 in Oldham. In fifty other considerable towns the rate was 0·33, and scarcely more than half that in the great towns; the highest rates in these fifty towns were 1·78 in Lincoln, 1·89 in Bury, and 2·64 in Macclesfield. In the remainder of England and Wales the rate was 0·25; it showed a marked excess in Willingham, Trowbridge, Newnham, Stafford, Bulwell, Tredegar, Maesteg, Bridgend, and Margam.

The deaths from *fever*, including typhus, enteric fever, and also simple and ill-defined forms of continued fever, numbered 1671, and corresponded to an annual rate of 0·25 per 1000, against an average rate of 0·38 in the ten preceding first quarters.

The rates ranged in the counties from 0·03 in Buckinghamshire, 0·05 in Bedfordshire, and 0·07 in Dorsetshire and Herefordshire, to 0·36 in Northumberland, 0·44 in Durham and in South Wales, and 0·87 in Westmorland. In the

twenty-eight towns the rate was 0·26, and but slightly exceeded the rate in England and Wales; no death from this cause was registered in Huddersfield, while the rate ranged upwards to 0·43 in Liverpool, 0·56 in Cardiff, and 0·76 in Blackburn. In fifty other considerable towns the rate was 0·30, and 0·04 higher than in the twenty-eight great towns, the highest rates being 0·78 in Wigan, 0·81 in Chester, and 0·87 in Ystradyfodwg. In the remainder of England and Wales the rate was 0·23; it showed a marked excess in Blyth and Kendal sub-districts.

The deaths from *diarrhœa* numbered 1481, and corresponded to an annual rate of 0·21 per 1000, against an average of 0·28 in the ten preceding first quarters.

The highest county rates were 0·37 in Lancashire, 0·41 in Lincolnshire, and 0·45 in Staffordshire. In the twenty-eight towns the rate was 0·20, and rather lower than the rate in England and Wales; no death was referred to this disease in Brighton, while the rate ranged upwards to 0·47 in Manchester, 0·61 in Preston, and 0·72 in Blackburn. In fifty other considerable towns the rate was 0·33, and ranged upwards to 0·83 in Stoke-upon-Trent, 0·98 in Walsall, and 1·08 in West Bromwich. In the remainder of England and Wales the rate was 0·22.

The deaths from *diphtheria* numbered 1270, and corresponded to an annual rate of 0·19 per 1000, against an average rate of 0·13 in the ten preceding first quarters. The death-rate from this disease in the first three months of this year exceeded that recorded in any quarter of the last fourteen years. The recorded statistics of diphtheria mortality are, however, so unsatisfactory, that it is impossible to know whether the recent mortality from the disease has really increased, or whether the nature of the disease has been more correctly diagnosed and described in the medical certificates received by the local registrars for registration purposes.

No deaths from this disease were registered last quarter either in Rutlandshire or in Westmorland, while in the other counties the rate ranged from 0·03 in Herefordshire, and 0·04 in Oxfordshire, to 0·32 in Nottinghamshire, 0·38 in Middlesex (*extra-metropolitan*) and in Lincolnshire, and 0·41 in Bedfordshire. In the twenty-eight towns the rate was 0·17, and 0·02 lower than that in England and Wales; it ranged from 0·02 in Bradford, 0·03 in Oldham, and 0·04 both in Birkenhead and in Blackburn, to 0·32 in Leeds, 0·33 in Sunderland, 0·34 in Cardiff, and 0·49 in Hull. In fifty other considerable towns the rate was 0·12, and 0·07 lower than in the great towns; whereas in the remainder of England and Wales it was 0·21. Among the sub-districts in which the mortality from this disease showed a considerable excess were Bradford Abbas, Taunton St. James, Saltfleet, Brigg, Willingham, Bulwell, Stanley, and Castleford.

The deaths from *small-pox* numbered 315, and exceeded the number returned in any quarter since the second of 1882. These 315 deaths included 88 in Durham, 76 in the Home Counties (including London), 62 in Warwickshire, 29 in Lancashire, 23 in Staffordshire, 18 in Worcestershire, and only 19 in the remainder of England and Wales. Of the 315 fatal cases of small-pox last quarter, 205 occurred in the twenty-eight large towns, including 60 in Registration London, 54 in Birmingham, 52 in Sunderland, and 29 in Liverpool; 13 also occurred in West Bromwich.

The following Table shows the relative mortality from each of the above-mentioned zymotic diseases in the twenty-eight great towns, in fifty other large town districts, and in the rest, or comparatively rural parts, of England and Wales:—

ANNUAL DEATH-RATE per 1,000 from several ZYMOTIC DISEASES during the First Quarter  
of 1884.

	From Disenes in Cols. 2-8.	Small- pox.	Measles.	Scarlet Fever.	Diph- theria.	Whoop- ing- cough.	Fever.	Diarrhoea.

**CERTIFICATION OF CAUSES OF DEATH.**—The causes of 119,607, or 90·5 per cent., of the 132,097 deaths in England and Wales, were certified by registered medical practitioners in attendance during the last illness, and 7349, or 5·6 per cent., by coroners in inquest cases. The causes of the remaining 5141, or 3·9 per cent., of the deaths were uncertified. The proportion of uncertified deaths in London did not exceed 1·4 per cent., whereas it was 4·5 per cent. in the rest of England and Wales; it was but 0·9 in Rutlandshire, 1·0 in Wiltshire, 1·3 in Berkshire and in the extra-metropolitan portion of Middlesex, and 1·5 in Buckinghamshire; whereas it ranged upwards to 6·0 in Dorsetshire and in Durham, 7·2 in Cumberland, and 8·2 in Cornwall. In Wales 10·2 per cent. of the causes of death were uncertified, the proportion being 9·9 in South Wales and 10·9 in North Wales.

In the twenty-eight large towns the proportion of uncertified deaths was 2·5 per cent.; but while it was only 1·4 in London, it was 3·4 in the twenty-seven provincial towns. The per-centages in these provincial towns ranged from 1·0 in Portsmouth, 1·1 in Plymouth, and 1·3 in Derby, to 6·4 in Hull, 7·2 in Wolverhampton, and 8·0 in Halifax.

**VIOLENT DEATHS.**—The deaths referred to different forms of violence were 4309, and corresponded to an annual rate of 0·64 per 1000 of the estimated population, and were equal to 3·3 per cent. of the total deaths. The death-rate from violence in the different counties ranged from 0·32 in Sussex, 0·33 in Dorsetshire, and 0·35 in Hertfordshire and in Rutlandshire, to 0·73 in Lancashire, 0·74 in Durham, 0·82 in the counties of South Wales, and 0·92 in Monmouthshire. In the twenty-eight large towns the deaths from violence corresponded to an annual rate of 0·77 per 1000; the rates in the several towns ranged from 0·36 in Blackburn, 0·37 in Bolton, and 0·39 in Brighton, to 1·07 in Norwich, 1·23 in Liverpool, and 1·33 in Cardiff. In London the proportion was 0·77 per 1000.

**INQUESTS.**—During last quarter 7349 inquest cases were registered, or 5·6 per cent. of the total deaths. The proportion of inquests was 0·6 above the average proportion in the ten preceding corresponding quarters. In the twenty-eight large towns the proportion of inquests to deaths was 6·8 per cent.; it ranged from 2·3 in Oldham, 2·8 in Blackburn, and 3·5 in Brighton, to 10·0 in Cardiff, 10·5 in Derby, and 13·9 in Leicester.

DEATHS IN PUBLIC INSTITUTIONS.—The deaths registered in workhouses, hospitals, and public lunatic asylums numbered 13,920, or 10·5 per cent. of the total deaths; this proportion was 0·5 in excess of the mean per-centage in the first quarters of the ten years 1874–83. In the corresponding periods of 1882 and 1883 the proportions of deaths in public institutions were 10·1 and 10·8 per cent. respectively. In the twenty-eight large towns 7397, or 16·0 per cent., of the deaths were recorded in the principal public institutions, against 16·6 per cent. in the first quarter of 1883; the proportion of institution deaths in these towns last quarter ranged from 3·9 in Bolton, 6·1 in Plymouth, and 7·2 in Bradford, to 18·2 in Birmingham, 18·6 in Liverpool, 20·0 in London, and 20·1 in Manchester. Excluding the twenty-eight great towns, the proportion of such deaths in the rest of England and Wales did not exceed 7·6 per cent.

#### HEALTH OF FOREIGN AND COLONIAL CITIES.

A summary of the Weekly Returns with which the Registrar-General is favoured by various local authorities abroad, shows that the average annual death-rate during the first three months of this year in thirty Colonial and Foreign cities, having an aggregate population of nearly fifteen millions of persons, was 28·1 per 1000. In the twenty-three European cities the average rate was 28·9 per 1000, against 21·1 in twenty-eight of the largest English towns. Among the thirty Colonial and Foreign cities the lowest death-rates were 20·0 in Brooklyn, 20·1 in Christiania, 21·3 in Copenhagen, and 21·4 in Baltimore; in the other towns the rates ranged upwards to 37·4 in Prague, 37·6 in Trieste, 37·9 in Turin, and 39·8 in St. Petersburg. The deaths referred to diphtheria and croup in Paris, which had been 326 and 502 in the two preceding quarters, further rose to 762 during the first three months of this year; the 363 fatal cases of measles also showed a marked increase, while the deaths from typhoid fever had also further declined from the high numbers in the last two quarters of 1883. The fatal cases of measles in St. Petersburg were 337, against but 91 and 59 in the two preceding quarters; the deaths referred to scarlet fever and to typhus and typhoid fever in this city also showed a considerable increase upon those in recent quarters. Small-pox was epidemic during the three months under notice in Madras, Brussels, and Prague; in the last-mentioned town the 523 deaths referred to this disease were equal to an annual rate of 7·71 per 1000. Measles caused 248 deaths in Vienna, and 243 in Turin during the quarter. The 775 fatal cases of diphtheria in Berlin, showed a considerable decline from the very high number in the last three months of 1883; the deaths in this city from measles, scarlet fever, and typhoid fever had also declined. Typhoid fever showed fatal prevalence in Geneva, Turin, and Philadelphia.

---

## PRELIMINARY TABLES.

\* Furnished by the Chief Cashier of the Bank of England.

† As published by the Comptroller of Corn Returns to the Board of Trade.

‡ These are the average prices at which the best seaborne Newcastle, Sunderland, and Hartlepool coals are put in barge from the collier in the Thames; the difference between these prices and those charged to the consumer represents the cost of distribution and merchant's profit. These figures are derived from returns which have been supplied by Mr. Richard Meade of the Mineral Statistics Department, Home Office.

Note.—The letter M or P affixed to the name of each Town denotes whether the limits, which the district or sub-districts named in the last column approximately represent, are Municipal or Parliamentary. Imp† D. signifies an Improvement District, and L. G. D. a Local Government District.

The rates of mortality for these towns have been corrected by the exclusion of a proportional number of deaths occurring in County Hospitals and Lunatic Asylums, situate within the districts or sub-districts here taken as representing the towns, or by the exclusion or addition of a proportion of the deaths in Union Workhouses in cases where only a portion of the Union is embraced by the area taken, or where the Workhouse is situated outside that area.

TABLE VIII.—LONDON—OUTER RING. Population; Births; Deaths from All Causes, and from the principal Zymotic Diseases; and the Annual Rate of Mortality, during the First Quarter of 1884.

Note.—In estimating the population of these Districts, upon which the birth and death-rates have been calculated, it has been assumed that the rate of increase in Greater London since 1881 has been the same as that which prevailed between 1871 and 1881; the estimate for the Outer Ring is obtained by the deduction of the estimated population of Inner London from that of Greater London. The estimates for the suburban districts have been adjusted to cast to the estimated total of the population of the Outer Ring, obtained in the manner above described. In calculating the rates of mortality, a proportion of the deaths recorded in the three Middlesex County Lunatic Asylums, situated in the Districts of Epsom, Uxbridge, and Barnet, has been excluded as belonging to the Middlesex portion of Registration or Inner London, and the remainder distributed among the Middlesex Districts of the Outer Ring.

TABLE IX.—Births and Deaths in the First Quarter of 1884, in 30 Foreign Cities having an estimated aggregate Population of 14,921,572 persons.

<sup>a</sup> The Registration or Union Counties consist of groups of Superintending Registrars' Districts, which are generally co-extensive with Poor Law Unions. Those Districts which extend into two or more Counties (proper) are included entirely in that County in which the principal town of the District, or the greater part of the population, is located. The boundaries of Registration or Union Counties therefore differ more or less from the boundaries of Counties (proper).

<sup>b</sup> The averages of Marriages and Births are given only for the Eleven Divisions and for Registration Counties.

<sup>c</sup> See page 14, note.

NOTE.—The Registrars alone must be considered responsible for the accuracy of the figures shown in their Returns, and for the opinions expressed in the foot notes.

REGISTRATION COUNTIES, and SUPERINTENDENT REGISTRARS' DISTRICTS of ENGLAND.  
of INFANTS under one year of Age, and of PERSONS aged 60 years and upwards from  
WHOPING-COUGH, FEVER, DIARRHŒA, CHOLERA, and VIOLENCE, also INQUEST CASES and  
of the DIVISIONS, REGISTRATION COUNTIES, SUPERINTENDENT REGISTRARS' DISTRICTS, and  
of ENGLAND.

<sup>a</sup> The Superintendent Registrars' Districts (630 in number) are collections of contiguous Parishes or Places, combined for purposes connected with the Registration of Births, Deaths, and Marriages, and are nearly always identical with the Poor Law Unions of the same names; they are here arranged topographically under the Registration Counties.

<sup>b</sup> These areas, which were partly revised by the Ordnance Survey Department, are the same as those published in the Abstracts of the Census of 1881. They do not include space occupied by foreshore or tidal water of rivers and creeks.

<sup>c</sup> See page 14, note b.

## II.—SOUTH EASTERN COUNTIES.—SUPERINTENDENT REGISTRARS' DISTRICTS.—continued.

Superintendent Registrars' Districts.		Area in Statute Acres.	Enumerated Population, 1881.	Marriages Registered in Quarter ending 31 Dec. 1883.	Births Registered in Quarter ending 31 Mar. 1884. <sup>a</sup> The Registration Sub-districts (2154 in number) are sub-divisions of the Superintendent Registrars' Districts in which the Births and Deaths are registered by Registrars severally appointed for that purpose. The letter W denotes that the sub-district contains within its limits a Workhouse belonging to the District or Union; c indicates that a Workhouse Establishment receiving inmates from other Districts than the one in which it stands is included; H indicates Hospital or Infirmary, and L Lunatic Asylum.

<sup>b</sup> For London, the numbers of Births and Deaths, as well as the details given under "Infants under 1 year of age" and the twelve subsequent headings in this Table, are derived from the Weekly Returns made by the Registrars, and relate to 13 weeks ending 26th March 1884.

<sup>c</sup> On the 1st January 1884 the District of Islington, which had previously consisted of two Sub-districts, was divided into four, viz. Upper Holloway, Islington South West, Islington South-East, and Highbury.

I.—LONDON.—REGISTRATION SUB-DISTRICTS—continued.

Registration Sub-districts.		Area in Statute Acres.	Enumerated Population, 1881.	Births		Deaths		The DEATHS in the Quarter are stated by the Registrars to include

a 619 : 2.—The 3 deaths from diphtheria occurred in Ruthin Urban Sanitary District.

b 621 : 2.—The 4 deaths from measles occurred in Barmouth Urban Sanitary District.

c 625 : 2.—Of the 8 deaths from scarlet fever, 6 occurred in Festiniog Urban Sanitary District.

d 631 : 3.—Of the 5 deaths from scarlet fever, 4 occurred in Ynysybiann Urban Sanitary District.

e 627 : 2.—Of the 5 deaths from diphtheria, 4 occurred in the parish of Llanberis and one in the adjoining parish of Llanrug.

## METEOROLOGY OF ENGLAND.

## REMARKS ON THE WEATHER DURING THE QUARTER ENDING MARCH 31ST, 1884.

By JAMES GLAISHER, Esq., F.R.S., &amp;c.

The weather in January was remarkable; on the 1st there was a fall of snow at many places which was followed by fine weather till the 22nd; this was succeeded by a series of south-westerly gales, and heavy storms occurred on the 26th and 27th with snow generally over the country. The month was very mild; the mean daily temperature was below the average on only two days, viz., the 1st and 27th, and above on every other day, and on some days the excess was as large as  $10^{\circ}$  and  $11^{\circ}$ . The mean temperature of the month was  $43^{\circ}\cdot 9$ , being  $7^{\circ}\cdot 4$  above the average of 113 years, there having been two instances only in this interval in which the mean temperature in January was higher, viz., in the years 1796 and 1834. The readings of the barometer were high till the 22nd day, when a sudden decline took place of three quarters of an inch by the 23rd day, and the readings were low till the end of the month, particularly on the 26th and 27th days. The fall of rain was generally in excess at northern stations, and slightly less than the average at southern stations.

The weather in February was on the whole fine and open; till the 24th there were three days only whose mean temperature were below their averages, and during the middle of the month there were several days which were spring-like and very warm for the season. The pressure of the atmosphere was variable till the 16th, and steadily low afterwards. The fall of rain did not differ much from the average, being a little in excess in some places and a little in default at others; vegetation very forward.

The weather in March was cold during the first three days and during the last week, but singularly mild from the 4th to the 24th. The atmospheric pressure was generally low till the 12th, and high from the 13th; upon the whole the month was remarkably fine and dry, and very favourable for ploughing, spring sowing, and all tillage operations.

About London, with the exception of 3 or 4 days, the temperature was above its average till February 26th, the mean daily excess of these 57 days was  $5^{\circ}\cdot 1$ ; from February 27th to March 3rd, the weather was cold, the average daily deficiency of temperature being  $3^{\circ}\cdot 8$ . From March 4th to 24th the weather was fine with much sunshine. On the 15th the excess of temperature over its average was as large as  $15^{\circ}$ , and it was  $14^{\circ}$  on the 16th; the mean daily excess of the 5 days March 14th to March 18th was  $13^{\circ}$ , and of the 21 days ending March 24th it was  $5^{\circ}\cdot 4$ ; from the 25th the weather was cold with easterly winds, and the average daily deficiency of temperature was  $1^{\circ}\cdot 4$ .

The mean temperature of the air for January was  $43^{\circ}\cdot 9$ , being  $7^{\circ}\cdot 4$  and  $5^{\circ}\cdot 3$  above the averages of 113 years and 43 years respectively; it was  $2^{\circ}\cdot 7$ ,  $3^{\circ}\cdot 5$ , and  $12^{\circ}\cdot 3$  higher than in 1883, 1882, and 1881, respectively.

Back to the year 1771 there have been but 6 Januaries whose mean temperatures have exceeded  $43^{\circ}$ , viz.:

1796 - $45^{\circ}\cdot 3$	1834 - $44^{\circ}\cdot 4$	1875 - $43^{\circ}\cdot 4$
1804 - $43^{\circ}\cdot 2$	1846 - $43^{\circ}\cdot 7$	1884 - $43^{\circ}\cdot 9$

so that back to 1771, there have been only 2 Januaries of higher temperature, viz., in 1796 and 1834.

The mean temperature of the air for February was  $41^{\circ}\cdot 9$ , being  $3^{\circ}\cdot 2$  and  $2^{\circ}\cdot 4$  above the averages of 113 years and 43 years respectively; it was  $0^{\circ}\cdot 7$  lower than in 1883,  $0^{\circ}\cdot 1$  higher than in 1882, and  $4^{\circ}\cdot 2$  higher than in 1881.

Back to the year 1771 there have been 24 previous instances of a mean temperature in February as high as  $41^{\circ}\cdot 9$ :

1775 - $41^{\circ}\cdot 9$	1826 - $42^{\circ}\cdot 2$	1856 - $42^{\circ}\cdot 0$	1869 - $45^{\circ}\cdot 3$
1779 - $45^{\circ}\cdot 3$	1833 - $42^{\circ}\cdot 4$	1859 - $43^{\circ}\cdot 1$	1871 - $42^{\circ}\cdot 4$
1794 - $44^{\circ}\cdot 7$	1846 - $43^{\circ}\cdot 9$	1861 - $42^{\circ}\cdot 1$	1872 - $44^{\circ}\cdot 8$
1809 - $44^{\circ}\cdot 1$	1848 - $43^{\circ}\cdot 4$	1863 - $42^{\circ}\cdot 1$	1877 - $43^{\circ}\cdot 5$
1817 - $42^{\circ}\cdot 6$	1849 - $43^{\circ}\cdot 2$	1867 - $44^{\circ}\cdot 7$	1878 - $42^{\circ}\cdot 2$
1822 - $43^{\circ}\cdot 3$	1850 - $44^{\circ}\cdot 7$	1868 - $43^{\circ}\cdot 0$	1883 - $42^{\circ}\cdot 6$

The mean temperature of the air for March was  $44^{\circ}\cdot 5$ , being  $3^{\circ}\cdot 4$  and  $2^{\circ}\cdot 8$  above the averages of 113 years and 43 years respectively; it was  $8^{\circ}\cdot 4$  higher than in 1883,  $1^{\circ}\cdot 5$  lower than in 1882, and  $1^{\circ}\cdot 9$  higher than in 1881.

Back to 1771 there have been but 12 instances of a mean temperature in March being as high as  $44^{\circ}\cdot 5$ , viz.:

1777 - $44^{\circ}\cdot 6$	1822 - $47^{\circ}\cdot 3$	1871 - $44^{\circ}\cdot 9$
1779 - $47^{\circ}\cdot 0$	1830 - $45^{\circ}\cdot 8$	1872 - $44^{\circ}\cdot 6$
1780 - $49^{\circ}\cdot 2$	1841 - $46^{\circ}\cdot 2$	1882 - $46^{\circ}\cdot 0$
1815 - $45^{\circ}\cdot 0$	1842 - $44^{\circ}\cdot 9$	1884 - $44^{\circ}\cdot 5$

The mean temperature for the quarter was  $43^{\circ}\cdot 4$ , being  $4^{\circ}\cdot 7$  and  $3^{\circ}\cdot 5$  above the averages of 113 years and 43 years respectively.

Back to 1771 there have been but 3 previous instances of the mean temperature of the quarter ending March exceeding  $43^{\circ}\cdot 4$ , viz.:

1822 - $43^{\circ}\cdot 5$	1846 - $43^{\circ}\cdot 6$	1872 - $43^{\circ}\cdot 6$
----------------------------	----------------------------	----------------------------

The mean temperature of the quarter ending December 1883, was  $44^{\circ}9$  being  $1^{\circ}5$  above the average; the mean temperature of the six months ending March 1884, was  $44^{\circ}2$ . The previous instances of the mean temperature of these six months exceeding  $44^{\circ}$ , back to 1771, are:

1819 -  $44^{\circ}3$       1834 -  $44^{\circ}2$       1849 -  $44^{\circ}2$   
 1822 -  $45^{\circ}5$       1846 -  $44^{\circ}7$       1877 -  $44^{\circ}6$

so that the period we have just passed, rank as one of the warmest on record.

The mean high day temperature of the air in January was  $47^{\circ}8$ , being  $4^{\circ}9$  higher than the average of 43 years, in February it was  $47^{\circ}7$ , being  $2^{\circ}1$  higher than the average, and in March was  $52^{\circ}7$ , being  $2^{\circ}8$  higher than the average.

The mean low night temperature of the air in January was  $39^{\circ}2$ , being  $5^{\circ}6$  higher than the average of 43 years; in February it was  $36^{\circ}8$ , being  $2^{\circ}4$  higher than the average, and in March was  $37^{\circ}4$ , being  $2^{\circ}2$  higher than the average. Therefore the high day temperatures, and the low night temperatures were warm throughout the quarter, particularly in the month of January.

NOTE.—In reading this table it will be borne in mind that the plus sign (+) signifies *above* the average, and that the minus sign (−) signifies *below* the average.

Average duration of the different directions of the wind referred to eight points of the compass, and duration of each direction in each month in the quarter, were as follows:—

Direction of Wind.	JANUARY.			FEBRUARY.			MARCH.		
	1884.	Average.	Departure from Average.	1884.	Average.	Departure from Average.	1884.	Average.	Departure from Average.
N.W.	5½	1½	+ 3½	1½	2	- ½	1½	2½	- 1½
N.	1	3½	- 2½	1	3	- 2	2½	3½	- 1½
N.E.	1½	3½	- 1½	1½	3½	- 2½	6½	4	+ 2½
E.	½	½	- ½	7½	2	+ 5½	3½	2½	+ 1
S.E.	½	2½	- 2	1½	1½	- ½	5½	2	+ 3½
S.	4½	4½	+ ½	6½	3	+ 3½	6½	2½	+ 4½
S.W.	11½	9½	+ 2	4½	8	- 3½	2½	7½	- 5½
W.	6½	5½	+ 3	4½	2½	+ 2	2½	3½	- 1
Calm.	0	2½	- 2½	1½	2½	- 1	0	2½	- 2½

The plus sign (+) denotes excesses over averages; the largest numbers affected with this sign in the month of January are opposite to N.W. and W.; in February to E. and S.; and March to S. and S.E.

The minus sign (−) denotes deficiencies below averages. In January the largest numbers are opposite to N. and S.E.; in February to S.W. and N.E.; and in March to S.W., N.W., and N.

The mean daily range of temperature in January was  $1^{\circ}0$  smaller than the average, in February it was  $0^{\circ}2$  smaller than the average, and in March it was  $0^{\circ}6$  greater than the average.

The mean temperature of the air in January was  $3^{\circ} \cdot 4$  higher than in December, in February it was  $2^{\circ} \cdot 0$  lower than in January, and in March it was  $2^{\circ} \cdot 6$  higher than in February.

(From the preceding 42 years' observations the decrease of temperature from December to January is  $1^{\circ} \cdot 4$ , the increase of temperature from January to February is  $1^{\circ} \cdot 1$ , and the increase from February to March is  $2^{\circ} \cdot 1$ .)

From December to January there was increase of temperature at stations south of  $51^{\circ}$  of  $2^{\circ} \cdot 6$ , between  $51^{\circ}$  and  $52^{\circ}$  of  $3^{\circ} \cdot 3$ , between  $52^{\circ}$  and  $53^{\circ}$  of  $2^{\circ} \cdot 8$ , and between  $53^{\circ}$  and  $54^{\circ}$  of  $2^{\circ} \cdot 2$ , and north of  $54^{\circ}$  of  $2^{\circ} \cdot 3$ .

From January to February there was a decrease of temperature at stations south of  $51^{\circ}$  of  $1^{\circ} \cdot 4$ , between  $51^{\circ}$  and  $52^{\circ}$  of  $2^{\circ} \cdot 0$ , between  $52^{\circ}$  and  $53^{\circ}$  of  $1^{\circ} \cdot 8$ , between  $53^{\circ}$  and  $54^{\circ}$  of  $2^{\circ} \cdot 1$  and north of  $54^{\circ}$  of  $1^{\circ} \cdot 9$ .

From February to March there was an increase of temperature at stations south of  $51^{\circ}$  of  $1^{\circ} \cdot 0$ , between  $51^{\circ}$  and  $52^{\circ}$  of  $1^{\circ} \cdot 8$ , between  $52^{\circ}$  and  $53^{\circ}$  of  $1^{\circ} \cdot 9$ , between  $53^{\circ}$  and  $54^{\circ}$  of  $1^{\circ} \cdot 7$ , and north of  $54^{\circ}$  of  $1^{\circ} \cdot 8$ .

The mean reading of the barometer for the month of January at the height of 160 feet above the level of the sea was  $29 \cdot 915$  ins., being  $0 \cdot 163$  in. above the average of 43 years,  $0 \cdot 180$  in. higher than in 1883;  $0 \cdot 270$  in. lower than in 1882, and  $0 \cdot 205$  in. higher than in 1881.

The mean reading of the barometer for the month of February was  $29 \cdot 744$  ins., being  $0 \cdot 048$  in. below the average of 43 years;  $0 \cdot 160$  in. lower than in 1883,  $0 \cdot 307$  in. lower than in 1882, and  $0 \cdot 083$  in. higher than in 1881.

The mean reading of the barometer for the month of March was  $29 \cdot 762$  ins., being  $0 \cdot 013$  in. above the average of 43 years,  $0 \cdot 013$  in. higher than in 1883,  $0 \cdot 081$  in. lower than in 1882; and  $0 \cdot 034$  in. lower than in 1881.

From December to January there was a decrease of pressure at stations south of  $51^{\circ}$  of  $0 \cdot 082$  in.; between  $51^{\circ}$  and  $52^{\circ}$  of  $0 \cdot 078$  in.; between  $52^{\circ}$  and  $53^{\circ}$  of  $0 \cdot 081$  in.; between  $53^{\circ}$  and  $54^{\circ}$  of  $0 \cdot 150$  in. and north of  $54^{\circ}$  of  $0 \cdot 199$  in.

From January to February there was a decrease of pressure at stations south of  $51^{\circ}$  of  $0 \cdot 269$  in.; between  $51^{\circ}$  and  $52^{\circ}$  of  $0 \cdot 192$  in., between  $52^{\circ}$  and  $53^{\circ}$  of  $0 \cdot 137$  in., between  $53^{\circ}$  and  $54^{\circ}$  of  $0 \cdot 124$  in., and north of  $54^{\circ}$  of  $0 \cdot 056$  in.

From February to March there was an increase of pressure at stations south of  $51^{\circ}$  of  $0 \cdot 040$  in., between  $51^{\circ}$  and  $52^{\circ}$  of  $0 \cdot 02$  in., between  $52^{\circ}$  and  $53^{\circ}$  of  $0 \cdot 023$  in., between  $53^{\circ}$  and  $54^{\circ}$  of  $0 \cdot 044$  in., and north of  $54^{\circ}$  of  $0 \cdot 042$  in.

About London the barometric pressure was high till January 22nd, particularly from the 12th to the 21st, the mean excess of daily pressure for these 12 days was  $0 \cdot 62$  in., and for 22 days ending on the 22nd was  $0 \cdot 38$  in.; during the remainder of the month it was low, particularly on the 26th and 27th days, the defects below the average on the 26th, being  $0 \cdot 94$  in., and on the 27th  $0 \cdot 77$  in.; for the 10 days ending February 1st, it was  $0 \cdot 37$  in. Till February 16th the pressure was alternately in excess, and defect for a few days together. From February 17th to March 12th, with the exception of a few days, when it was about its average value, it was low, the average daily deficiency for these 25 days being  $0 \cdot 22$  in. From March 13th to the end of the quarter, the pressure differed but little from its average.

*Thunderstorms occurred* in January on the 25th at Guernsey, Osborne, Bath, Strathfield Turgiss, Barnet, Lowestoft, Nottingham, Halifax, Stonyhurst, and Bradford.

In February, on the 1st at Plymouth, Totnes, and Torquay; on the 10th at Bolton, Halifax, and Carlisle; on the 11th at Barnet; and on the 21st at Bolton and Stonyhurst.

In March, on the 10th at Rugby; and on the 20th at Bolton.

*Thunder was heard but lightning was not seen* in January, on the 2nd at Stonyhurst; on the 11th at Bolton; on the 25th at Truro; and on the 26th at Truro and Torquay.

In February, on the 10th at Barnet; and on the 25th at Royston and Cambridge.

*Lightning was seen but thunder was not heard* in January, on the 20th at Halifax and Stonyhurst; on the 21st at Stonyhurst; on the 25th at Bath, Barnet, Oxford, Cambridge, Somerleyton, and Wolverhampton; on the 26th at Plymouth, Torquay, Osborne, Bath, Strathfield Turgiss, Marlborough, Whitechurch, Blackheath, Barnet, Oxford, Royston, Cardington, Cambridge, Rugby, Somerleyton, Wolverhampton, Leicester, Burslem, and Bolton; on the 27th at Guernsey, Plymouth, Torquay, Blackheath, Barnet, Royston, Cambridge, Wolverhampton, and Leicester; on the 28th at Leicester; and on the 29th at Barnet.

In February, on the 13th at Leicester; on the 21st at Torquay, Burslem, and Carlisle; on the 22nd at Torquay; on the 26th and 27th at Totnes.

In March, on the 20th at Liverpool.

*Solar halos were seen* in January, on the 5th and 9th at Torquay, and on the 21st at Oxford.

In February, on the 14th at Oxford; on the 22nd at Torquay, Bath, and Oxford; on the 23rd at Oxford and Stonyhurst; on the 25th at Torquay and Oxford; on the 27th at Oxford; and on the 29th at Bath.

In March, on the 1st at Halifax; on the 9th at Torquay, Oxford, Bolton, and Halifax; on the 10th at Bolton; on the 11th at Bath and Halifax; on the 12th at Oxford; on the 14th and 15th at Oxford; on the 17th and 18th at Torquay; on the 23rd at Bath and Halifax; on the 24th and 25th at Torquay, Bath, and Oxford; and on the 30th at Torquay, Bath, and Oxford.

*Lunar halos were seen* in January, on the 3rd at Cambridge and Rugby; on the 10th at Torquay; and on the 12th at Rugby.

In February, on the 5th at Halifax; on the 6th at Strathfield Turgiss; on the 11th at Oxford; and on the 12th at Leicester.

In March, on the 3rd at Leicester and Burslem; on the 6th at Torquay, Oxford, and Burslem; on the 7th at Torquay, Salisbury, Strathfield Turgiss, Marlborough, Oxford, Royston, Cambridge,

(Continued at the end of the following Table.)

## MONTHLY METEOROLOGICAL TABLE FOR THE QUARTER ENDING MARCH 31ST, 1884.

The Observations have been reduced to Mean values by Glaisher's Barometrical and Diurnal Range Tables, and the Hygrometrical results have been deduced from the sixth edition of his Hygrometrical Tables.

Year 1884.	Height of Station Above Sea Level.	Names of Stations and Observers.	Pressure of Atmosphere in Month.		Temperature of Air in Month.			Mean Temperature.		Vapour.		Mean Reading of Thermometer.		Wind.			Mean Amount of		Rain.

Second Rain-gauges are placed—

At Eastonbury at the height of 160 feet above the sea; the amount collected was

Month.	Amount collected.
Oct.	3 00 inches.
Nov.	5 40 inches.
Dec.	1 43 inches.
Jan.	1 32 inches.
Feb.	1 33 inches.
Mar.	1 33 inches.
Total in Quarter.	11 38 inches.

Lunar Halos—continued.

Burslem, and Hull; on the 8th at Sraithfield Turgiss and Burslem; on the 9th at Oxford, Rugby, Leicester, Bolton, Halifax, and Hull; on the 10th at Torquay, Bath, Oxford, Rugby, Leicester, Burslem, and Hull; on the 11th at Torquay, Bath, Marlborough, Leicester, Burslem, Halifax, and Hull; on the 12th at Halifax; on the 14th at Halifax; and on the 31st at Blackheath.

Aurora borealis was seen in January, on the 17th and 19th at Carlisle.

Snow fell in January, on the 1st at Osborne, Bath, Marlborough, Barnet, Royston, Rugby, Burslem, and Bolton; on the 2nd at Osborne; on the 11th at Burslem, Halifax, Bradford, and Silloth; on the 23rd at Carlisle; on the 24th at Burslem, Halifax, Stonyhurst, Bradford, Silloth, and Carlisle; on the 25th at Marlborough, Burslem, Llandudno, Liverpool, Bradford, and Carlisle; on the 26th at Burslem, Llandudno, Liverpool, Bolton, Stonyhurst, and Carlisle; on the 27th at Plymouth, Tonnes, Torquay, Bath, Marlborough, Whitechurch, Blackheath, Oxford, Royston, Carlisle, Cambridge, Rugby, Wolverhampton, Leicester, Burslem, Llandudno, Liverpool, Bolton, Halifax, and Carlisle; on the 28th, at Bolton and Halifax.

In February, on the 2nd at Bolton and Halifax; on the 3rd at Burslem, Bolton, Stonyhurst; on the 10th at Torquay, Oxford, Wolverhampton, Burslem, Liverpool, Bolton, Halifax, and Stonyhurst; on the 11th at Bath, Rugby, Burslem, Liverpool,

Snow—continued.

Bolton, Halifax, Stonyhurst, Silloth, and Carlisle; on the 16th at Torquay and Halifax; on the 21st at Halifax; on the 28th at Bath, Blackheath, Barnet, Royston, and Cambridge; and on the 29th at Somerleyton, Silloth, and Carlisle.

In March, on the 1st at Bath and Burslem; on the 2nd at Wolverhampton, Bolton, Halifax; on the 3rd at Whitechurch, Barnet, Oxford, Rugby, Wolverhampton, Leicester, Burslem, Liverpool, Halifax, Silloth, and Carlisle; on the 9th at Bolton; on the 10th at Rugby, Burslem, Liverpool, Halifax; on the 20th at Whitechurch, Bolton, and Halifax; on the 31st at Torquay, Bath, and Burslem.

Hail fell in January on the 1st, 2nd, 7th, 10th, 11th, 23rd, 24th, 25th, 26th, 27th, and 28th; in February on the 1st, 2nd, 9th, 10th, 11th, 13th, 21st, 22nd, 23rd, 25th, 28th, and in March on the 2nd, 8th, 9th, 10th, 18th, 20th, 21st, 28th, and 31st, at different places.

Fog prevailed on 18 days in January; on the 1st at Ventnor; on the 2nd at several places south of 52°; on the 3rd, 4th, 5th, and 6th at many stations; on the 8th, 12th, 14th, 15th, 16th, 17th, 18th, 19th, 23rd, 28th, 29th, and 31st at a few places on the different days. In February it appeared on 9 days at stations south of 52°. In March it appeared at one or other station on 13 days.

NAMES OF STATIONS.	Mean Pressure of dry Air reduced to the level of the Sea.	Highest Reading of the Thermometer.	Lowest Reading of the Thermometer.	Range of Temperature in the Quarter.	Mean of all Highest.	Mean of all Lowest.	Mean Monthly Range of Temperature.	Mean Daily Range of Temperature.	Mean Temperature of the Air.	Mean Temperature of the Dew Point.	Mean Elastic Force of Vapour.	Mean Weight of Vapour in a cubic foot of Air.	Mean additional Weight required for saturation.	Mean degree of Humidity.	Mean Weight of a cubic foot of Air.	Mean Reading of Maximum in Rays of Sun.	Mean Reading of Minimum on Grass.	WIND.				Mean Amount of Ozone.	Mean Amount of Cloud.	Number of Days on which it fell.	Rain. A unit collected.

## INDEX OF SUPERINTENDENT REGISTRARS' DISTRICTS.

The following Index furnishes a reference to the *Number\** of each SUPERINTENDENT REGISTRAR'S DISTRICT. In forming the alphabetical arrangement, the principle adopted has been to place compound names in the order in which they are pronounced.

Abberayon, 604.	Black, 28.	Chorlton, 464.	Evesham, 381.	Hinckley, 404.
Abergavenny, 682.	Blofield, 228.	Christchurch, 93.	Exeter, 272.	Hitchin, 133.
Aberystwyth, 605.	Blything, 216.	Church Stretton, 346.		Holbeach, 416.
Abingdon, 115.	Bodmin, 294.	Cirencester, 331.		Holbeck, 499.
Ablester, 397.	Bolton, 461.	Cleobury Mortimer, 347.	Falmouth, 298.	Holborn, 13.
Alderbury (Salisbury), 254.	Bootle, 576.	Clitheroe, 473.	Fareham, 90.	Hollingbourn, 51.
Alnwick, 563.	Bosmere, 211.	Clun, 345.	Faringdon, 114.	Holsworthy, 288.
Alresford, 105.	Boston, 417.	Clun, 345.	Farnham, 33.	Holywell, 617.
Alston, 568.	Bourn, 414.	Cockermouth, 574.	Faversham, 59.	Honiton, 270.
Alton, 106.	Brackley, 156.	Colchester, 196.	Festiniog, 625.	Hoo, 45.
Altrincham, 445.	Bradfield, 118.	Congleton, 448.	Flegg, 220.	Horncastle, 421.
Alderston, 89.	Bradford-on-Avon, 249.	Conway, 629.	Foleshill, 391.	Horsham, 79.
Amersham, 140.	Bradford (York), 497.	Cookham, 121.	Forde (Montgomery), 615.	Houghton-le-Spring, 551.
Amesbury, 253.	Braintree, 199.	Corwen, 622.	Fordingbridge, 95.	Howden, 518.
Ampthill, 173.	Bramley, 500.	Cosford, 204.	Forehoe, 226.	Hoxne, 210.
Andover, 110.	Brampton, 570.	Coventry, 344.	Freebridge Lynn, 236.	Huddersfield, 495.
Angelsey, 639.	Brecknock, 608.	Cranbrook, 52.	Frome, 312.	Hull, 521.
Asborne, 438.	Brentford, 126.	Crediton, 232.	Fulham, 2.	Hungerford, 113.
Asby-de-la-Zouch, 406.	Bridge, 56.	Crickhowell, 609.	Fyde, 477.	Hunslet, 498.
Ashdon-under-Lyne, 468.	Bridgend, 589.	Cricklade, 242.		Huntingdon, 168.
Aston, 337.	Bridgnorth, 343.	Croydon, 88.		
Astham (Shrewsbury), 351.	Bridgewater, 307.	Cuckfield, 75.		
Atherstone, 389.	Brighthelm, 525.		Gainsborough, 425.	Ipswich, 213.
Buckland, 545.	Bridport, 268.		Garstang, 478.	Isle of Wight, 91.
Buxbridge, 315.	Brighton, 773.	Darlington, 542.	Gateshead, 555.	Islington, 9.
Camminster, 269.	Bristol, 320.	Dartford, 42.	Glanford Brigg, 425.	
Caslesbury, 143.	Brixworth, 162.	Daventry, 161.	Glendale, 566.	
Caslesham, 223.	Bromley, 41.	Depwade, 230.	Gloucester, 327.	Keighley, 492.
Casgarth, 539.	Bromsgrove, 384.	Derby, 436.	Godstone, 37.	Kendal, 579.
	Bromyard, 341.	Devizes, 247.	Goole, 513.	Kensington, 1.
	Buckingham, 146.	Dewsbury, 502.	Gower, 593.	Keynsham, 318.
	Bulth, 607.	Docking, 235.	Grantham, 419.	Kidderminster, 376.
	Burnley, 472.	Dolgelly, 624.	Gravesend, 43.	Kingsbridge, 275.
	Burton-upon-Trent, 367.	Doncaster, 511.	Great Ouseburn, 488.	Kingsclere, 111.
	Bury, 462.	Dorchester, 265.	Greenwich, 27.	Kings Lynn, 237.
	Bury St. Edmunds, 206.	Dorking, 35.	Guildford, 32.	Kings Norton, 385.

# QUARTERLY RETURN

OF

## MARRIAGES, BIRTHS, AND DEATHS

REGISTERED IN THE DIVISIONS, COUNTIES, AND DISTRICTS OF

### ENGLAND;

WITH CERTAIN DETAILED INFORMATION RELATING TO THE DEATHS IN EACH  
REGISTRATION SUB-DISTRICT.

By Authority of the Registrar General.

PUBLISHED BY EYRE AND SPOTTISWOODE, 9, EAST HARDING ST., FETTER LANE, E.C.

No. 142.]

**Marriages**—*January, February, March, 1884.*  
**Births and Deaths**—*April, May, June, 1884.*

[Price 9d.]

*General Register Office, Somerset House,  
31st July, 1884.*

The resident POPULATION of the UNITED KINGDOM in the middle of 1884 is estimated at 35,951,865 persons; that of England and Wales at 27,132,449, of Scotland at 3,866,521, and of Ireland at 4,952,895.

In the United Kingdom the *births* of 296,591 children, and the *deaths* of 170,565 persons, were registered in the three months ending 30th June 1884. The recorded natural increase of population was thus 126,026. The registered number of persons married in the quarter ending 31st March 1884 was 112,680.

The birth-rate in the United Kingdom in the second quarter of 1884 was 33·1 per 1000, and the death-rate 19·0. The marriage-rate in the first quarter of 1884 was 12·6 per 1000.

The several facts concerning Scotland and Ireland are recorded in the Quarterly Returns of the Registrars-General of those parts of the United Kingdom.

### ENGLAND.

This Return comprises the BIRTHS and DEATHS registered in the 2151 registration sub-districts of England and Wales during the quarter ending 30th June 1884; and the MARRIAGES in 14,679 churches or chapels, in 9224 registered places of worship unconnected with the Established Church, and in 630 Superintendent Registrars' Offices, in the three months ending 31st March 1884.

### *Marriages.*

During the first three months of this year, the marriages of 83,076 persons were registered in England and Wales, corresponding to an annual rate of 12·3 per 1000 of the estimated population in the middle of the year. This marriage-rate was 0·7 below the mean rate in the corresponding quarters of the ten years 1874-83, and 1·0 below the rate that prevailed in the first quarter of 1883. The annual marriage-rate in the three months ending March last ranged in the several counties from 7·7 in Rutlandshire, 8·1 in Hertfordshire and in the extra-metropolitan portion of Middlesex, and 8·9 in Essex, to 14·5 in Monmouthshire, 15·1 in the East Riding of Yorkshire, and 15·6 in Northumberland.

### *Births.*

During the three months ending with June last, 231,149 births were registered in England and Wales, corresponding to an annual rate of 34·2 per 1000 of the estimated population. This birth-rate differed but little from the low rates prevailing in the three preceding corresponding quarters, and was 1·6 below the mean rate in the ten preceding corresponding quarters. So low a birth-rate has not been recorded in the second quarter of any year since 1869. The lowest county birth-rates last quarter were 26·4 in Rutlandshire, 27·5 in Herefordshire, and 29·1 in the extra-metropolitan portion of Surrey; the highest were 39·2 in Staffordshire and in Monmouthshire, 39·7 in Nottinghamshire, and 41·7 in Durham.

In the twenty-eight great towns the births registered last quarter corresponded to an annual rate of 35·0 per 1000 of their aggregate population, which was 0·8 above the general English birth-rate. In London the rate did not exceed 33·8, whereas in the twenty-seven provincial towns it was 36·0, and ranged from 28·0 in Brighton, 29·0 in Huddersfield, and 29·2 in Halifax, to 40·6 in Cardiff, 41·0 in Nottingham, and 45·3 in Sunderland. In fifty other large town districts the birth-rate was 35·8, and 0·7 above the rate in the great towns; but while the rates did not exceed 22·9 in Bath, 23·3 in Hastings, and 23·5 in Southport, they ranged upwards to 44·2 in Warrington, 45·2 in Dudley, 47·2 in St. Helens, and 47·3 in Ystradyfodwg.

### *Movement of the Population.*

The *natural* increase of the population of England and Wales, or the excess of births over deaths, which had been 102,318 and 94,920 in the second quarters of 1882 and 1883, increased to 103,203 in the corresponding period of this year. It appears from returns issued by the Board of Trade that 120,102 emigrants embarked during last quarter from the various ports of the United Kingdom at which emigration officers are stationed. Distributing 703 whose nationality was undistinguished, and excluding 27,651 foreigners, the emigrants of British origin were 92,451, including 46,345 English, 7854 Scotch, and 38,252 Irish; in the three preceding corresponding quarters the numbers of British emigrants were 88,167, 107,763, and 134,707 respectively. The proportions of emigrants last quarter to a million of the population in the three divisions of the United Kingdom were 1708 from England, 2031 from Scotland, and 7723 from Ireland. Compared with recent corresponding quarters the proportion of emigration last quarter showed a decline in each of the three divisions of the United Kingdom.

### *Prices and Pauperism.*

The average price of wheat during the three months ending June last was 37s. 6d., and was 3d. below the average in the preceding quarter; it was below the average price in the second quarter of any year on record. The mean wholesale prices of beef and of mutton last quarter were 6½d. and 7½d., per lb. respectively; the mean price of beef corresponded with, while that of mutton was ¼d. above, the mean prices in the preceding quarter. The average price of the best sea-borne coal in the London market, put in barge from the collier in the Thames, was 14s. 11d. per ton, showing a decrease of 4d. from the average price in the preceding quarter, and was 1s. 10d. per ton below that recorded in the second quarter of 1883. The mean price of Consols was 101½l. showing an increase of 2s. 6d. upon the mean price in the preceding quarter. The minimum annual rate of discount charged at the Bank of England, which had been reduced to 3 per cent. on the 13th March last, was further reduced to 2½ per cent. on 3rd April and to 2 per cent. on 19th June, at which rate it remained until the end of the quarter; the average rate during the quarter was 2·42 per cent.

The average number of paupers (exclusive of lunatics in asylums, and vagrants) relieved in England and Wales on the last day of each week in the quarter was 696,931, of whom 173,749 received in-door and 523,182 out-door relief. The proportion of the population in receipt of pauper relief during the three months ending with June last was 25·7 per 1000, against 27·0 and 26·5 in the two preceding corresponding quarters.

### *Meteorology.*

The remarks upon the Meteorology of the quarter at the Royal Observatory, Greenwich, and at various stations of observation, furnished by Mr. James Glaisher, F.R.S., with accompanying Tables, will be found on pages 65-72. The mean reading of the barometer was 29·775 inches, and was 0·003 below the mean reading for the corresponding periods of 43 years; the mean reading was above the average in May and June, while that in April was below the average. The mean temperature of the air during the quarter was 52°·5, and was 0°·2 above the average for the corresponding periods in 113 years. The weather was moderately warm at the beginning of April, but cold afterwards; snow fell on several days during the month. It was cold at the beginning and end of May, and warm in the middle of the month; generally the weather was fine, dry, and warm, but easterly winds prevailed during the latter half of the month. In June, northerly and easterly winds prevailed, and the weather was very cold during the first three weeks, but warm afterwards. The mean temperature in April was 1°·0, and in June was 0°·2, below the average; whereas in May it showed an excess of 1°·8. At 42 stations of observation the mean temperature during the quarter ranged from 48°·5 at Halifax, and 48°·8 at Bolton, to 52°·6 at Camden Square and at Oxford, and 54°·5 at Barnstaple.

The amount of rain measured at Greenwich during the quarter was 4·31 inches, and was 1·50 inches below the average amount in the corresponding periods of 68 years. The rainfall was below the average in April and May, and above the average in June. Rain was measured at Greenwich on 15 days in April, 10 in May, and 8 in June, or on 33 of the 91 days in the quarter. The rainfall recorded at 42 stations of observation ranged from 2·71 inches at Royston and 3·19 inches at Somerleyton, to 6·56 inches at Guernsey and 7·91 inches at Bath.

The number of hours of bright sunshine recorded during the quarter at the Royal Observatory, Greenwich, was 405·9, against 510·6 and 474·6 in the two preceding corresponding quarters.

### *State of the Public Health; Deaths.*

The deaths registered in England and Wales during the three months ending June last were 127,946, showing a decrease of 5,837 from the number returned in the corresponding period of 1883. The annual death-rate, which was 18·9 per 1,000 of the estimated population, was 1·5 below the mean rate in the ten preceding corresponding quarters. In the second or spring quarter of 1881 the rate was so low as 18·6; with this single exception the death-rate last quarter was lower than in any spring quarter since civil registration commenced in 1837. This low rate implied that between 18,000 and 19,000 persons survived the three months who would have died had the death-rate corresponded with the average rate in the 46 preceding corresponding quarters. The death-rates in the English counties last quarter ranged from 14·3 in Sussex, 14·7 in Huntingdonshire, and 15·4 in Berkshire, to 20·6 in Staffordshire, 21·8 in Lancashire, and 22·1 in Cornwall.

The 127,946 deaths last quarter included 66,572 of males, and 61,374 of females. The annual death-rate among males was 20·2, and among females 17·7 per 1000 estimated to be living of each sex. In equal numbers living the deaths of males were 114 to 100 deaths of females.

URBAN AND RURAL MORTALITY.—In the registration districts and sub-districts comprising the chief towns (see Table III.) and containing an estimated population of nearly sixteen millions of persons, the death-rate was 20·0 per 1000; in the remaining and chiefly rural population of more than ten millions and three quarters of persons, the rate was 17·3. These urban and rural rates were respectively 1·3 and 1·7 below the average rates in the ten preceding corresponding quarters. In equal numbers living, the deaths were 116 in the urban to 100 in the rural population, whereas the average proportion in the second quarter of the ten years 1874-83 was 112 to 100.

In the twenty-eight great English towns, including London, and having an estimated population of nearly eight millions and three quarters of persons, the registered deaths corresponded to an annual rate of 20·8 per 1000, which was 0·8 above the general urban rate. In London the death-rate did not exceed 19·9, whereas it was 21·6 in the twenty-seven provincial towns, among which it ranged from 16·1 in Brighton, 16·8 in Derby, and 17·2 in Bristol, to 24·9 in Wolverhampton, 25·5 in Manchester, and 25·6 in Oldham.

In fifty other large town districts, with an aggregate population estimated at about two millions and three quarters, the registered deaths corresponded to an annual rate of 18·9, being 1·9 below the rate in the twenty-eight larger towns. The lowest rates among these fifty towns were 10·5 in Barrow-in-Furness, 13·9 in Gloucester and in Burton-on-Trent, and 14·1 in Hastings; the highest rates were 24·5 in Bury, 25·4 in Wigan, and 25·7 in Gateshead.

MORTALITY AT DIFFERENT AGES.—The 127,946 deaths last quarter included 28,001 of infants under one year of age, 66,629 of children and adults aged between one and 60 years, and 33,316 of persons aged 60 years and upwards.

The rate of infant mortality, measured by the proportion of deaths under one year to registered births, was 121 per 1000; in the ten preceding corresponding quarters the proportion of infant mortality averaged 128 per 1000, and ranged from 139 in 1875, to 121 in 1881. The lowest county rates of infant mortality last quarter were 74 in Sussex, 80 in Hertfordshire, and 82 in Huntingdonshire, while the highest were 133 in Cornwall, 140 in Nottinghamshire, and 142 in Staffordshire and in Lancashire.

In the twenty-eight large towns the proportion of infant mortality was 137 per 1000 births, and 16 above the general English rate. The rate did not exceed 131 in London, but averaged 142 in the twenty-seven provincial towns, among which it ranged from 82 in Brighton, 92 in Birkenhead, and 113 in Derby, to 163 in Plymouth and in Wolverhampton, 165 in Preston, and 175 in Oldham.

In fifty other large town districts the rate of infant mortality was 126 per 1000 births; while the proportion was but 52 in Gloucester, 74 in Warrington, and 76 in Ipswich, it ranged upwards to 195 in West Bromwich, 202 in Macclesfield, and 206 in Bury.

Among persons aged between one and 60 years the annual rate of mortality was 11·0 per 1000, against an average of 11·8 in the ten preceding corresponding quarters. In the twenty-eight great towns the deaths at these ages corresponded to an annual rate of 13·1 per 1000, ranging from 9·2 in Derby, 9·4 in Leicester, and 9·8 in Bristol, to 16·4 in Manchester, 17·0 in Liverpool, and 17·3 in Oldham.

The deaths among persons aged 60 years and upwards corresponded to an annual rate of 66·8 per 1000, being 3·2 below the mean rate in the ten preceding spring quarters. The deaths at this age period in the twenty-eight towns corresponded to an annual rate of 68·6 per 1000, which exceeded the general English rate by 1·8. In London this rate was 62·7, while it was 74·2 in the twenty-seven provincial towns, ranging from 61·1 in Norwich, 62·4 in Brighton, and 62·6 in Plymouth, to 91·1 in Manchester, 93·4 in Halifax, and 99·2 in Bolton.

During last quarter the death-rate of infants was 5·5 per cent., that of children and adults aged between one and 60 years 6·8 per cent., and that of persons aged 60 years and upwards 4·6 per cent., below the mean rates in the ten preceding corresponding quarters.

ZYMOTIC DISEASES.—The 127,946 deaths from all causes included—

3603	attributed to whooping-cough,
3457	„ measles,
2620	„ scarlet fever,
1674	„ diarrhœa,
1491	„ fever,
902	„ diphtheria,
652	„ small-pox.

Thus 14,399 deaths were ascribed to these causes, and corresponded to an annual rate of 2·13 per 1000, against an average rate of 2·38 in the ten preceding corresponding quarters.

The rate was under 1·00 per 1000 in Sussex, Buckinghamshire, Huntingdonshire, Cambridgeshire, Suffolk, Dorsetshire, Herefordshire, Shropshire, and Cumberland; while it was 2·60 in Nottinghamshire, and 3·02 in Lancashire. In the twenty-eight great towns the rate was 3·13, varying from 0·82 in Brighton and 0·92 in Derby, to 4·16 in Oldham, 4·22 in Portsmouth, 4·30 in Wolverhampton, and 4·64 in Liverpool. In fifty other considerable towns the rate was 1·95, rising, however to 4·14 in Bury, 4·16 in Ystradyfodwg, 4·69 in Gateshead, and 6·77 in Wigan.

The deaths from *whooping-cough* numbered 3603, and corresponded to an annual death-rate of 0·53 per 1000, against an average rate of 0·54 in the ten preceding second quarters.

The rate was 0·00 in Herefordshire and in Westmorland, 0·03 in Suffolk, and 0·05 in Shropshire, while it was 1·05 in Rutlandshire, and 1·45 in Cornwall. In the twenty-eight great towns the rate was 0·95, but varied from 0·00 in Blackburn, to 1·29 in London, 1·62 in Bolton, and 1·74 in Liverpool. In fifty other considerable towns the rate was 0·42, rising to 1·28 in Coventry, 1·30 in Oxford, 1·54 in Bury, and 2·12 in Gateshead. The mortality was also excessive in the following sub-districts, Terrington St. Clement, Shipdham, Britford, Salisbury, Fowey, Redruth, Illogan, and Rastrick.

The deaths from *measles* numbered 3457, and corresponded to an annual rate of 0·51 per 1000, against an average rate of 0·44 in the ten preceding second quarters.

The rate was 0·94 in Warwickshire and 0·99 in Nottinghamshire, while no death was registered as due to this disease in Bedfordshire, Cambridgeshire, Huntingdonshire, or Rutlandshire. In the twenty-eight great towns the rate was 0·94, varying from 0·00 in Leicester, Sunderland, and Cardiff, to 2·56 in Portsmouth, 3·40 in Oldham, and 3·43 in Wolverhampton. In fifty other considerable towns the rate was 0·32, rising, however, to 1·40 in Bury and 2·75 in Macclesfield. The mortality was also excessive in the sub-districts of Folkestone, Hambleton, Salisbury, Britford, Yeovil, Radford, Haslingden, and Holyhead.

The deaths from *scarlet-fever* numbered 2620, and corresponded to an annual rate of 0·39, against an average of 0·55 in the ten preceding second quarters.

No death was attributed to this disease either in Dorsetshire or Rutlandshire, while elsewhere the rate varied from 0·03 in Norfolk and in Suffolk, to 0·72 in the North Riding and in Lancashire, and 0·85 in Staffordshire. In the twenty-eight great towns the rate was 0·41, varying from 0·00 in Norwich, Plymouth, and Bolton, to 1·05 in Preston, 1·21 in Leeds, 1·42 in Cardiff, and 1·67 in Sheffield. In fifty other considerable towns the rate was 0·52, rising to 1·33 in Middlesbrough, 1·36 in Dudley, 1·37 in Walsall, 1·47 in Stoke-upon-Trent, 1·60 in Ystradyfodwg, 1·73 in Gateshead, 1·79 in Ashton-under-Lyne, and 4·51 in Wigan. The mortality was also in excess in the sub-districts of Abingdon, Ware, Lowton, and Morley.

The deaths from *diarrhœa* numbered 1674, and corresponded to an annual rate of 0·25 per 1000, against an average rate of 0·33 in the ten preceding second quarters.

The rates varied from 0·08 in Sussex and in Cambridgeshire, to 0·37 in Cheshire, 0·38 in Staffordshire, and 0·41 in Lancashire. In the twenty-eight great towns the rate was 0·27, being, however, 0·65 in Blackburn and 1·09 in Preston. In fifty other considerable towns the rate was 0·31, while in the remaining and mainly rural part of England and Wales it was 0·24.

The deaths from *fever*, including typhus, enteric fever, simple and ill-defined forms of continued fever, numbered 1491, and corresponded to an annual rate of 0·22 per 1000, against an average rate of 0·33 in the ten preceding second quarters.

The rate varied from 0·07 in Dorsetshire, and 0·08 in Northamptonshire, Bedfordshire, and Huntingdonshire, to 0·37 in Westmorland, 0·38 in South Wales, and 0·41 in Hertfordshire. In the twenty-eight great towns the rate was 0·23; it was, however, 0·60 in Portsmouth and 0·62 in Blackburn. In fifty other considerable towns the rate was 0·28; it was 0·59 in St. Helen's, 0·65 in Chester, 0·76 in Middlesbrough, and 0·96 in Ystradlyfodwg. Among sub-districts, the mortality was excessive in St. Albans, where the deaths from fever were 16 in number.

The deaths ascribed to *diphtheria* numbered 902, and corresponded to an annual rate of 0·13 per 1000, against an average of 0·11 in the ten preceding second quarters.

No death was ascribed to this cause either in Westmorland or in Rutlandshire, and one only in each of the counties of Wilts, Hunts, and Hereford, while the rate was 0·35 in Nottinghamshire and 0·48 in Norfolk. In the twenty-eight great towns the rate was 0·14, varying from 0·00 in Wolverhampton, Derby, Bolton, Blackburn, Halifax, and Sunderland, to 0·51 in Portsmouth and 0·56 in Cardiff. In fifty other considerable towns the rate was 0·06, while in the remaining part of England and Wales it was 0·14, or the same as in the great towns.

The deaths from *small-pox* numbered 652, and were equal to an annual rate of 0·10 per 1000, corresponding with the average rate in the ten preceding second quarters. Of the 652 deaths, 344 occurred in Greater London, and 87 more in the sub-district of Dartford, in which are placed the floating hospitals and the Convalescent Camp Hospital for the use of London small-pox patients. Of the remaining 221 deaths, 50 occurred in Liverpool, 20 in Sheffield, 15 in West Bromwich, 15 in Sunderland, 33 in other parts of the county of Durham, and 88 in the rest of England and Wales.

The following Table shows the relative mortality from each of the above-mentioned zymotic diseases in the twenty-eight great towns, in fifty other large town districts, and in the rest, or comparatively rural parts, of England and Wales:—

ANNUAL DEATH-RATE per 1,000 from several ZYMOTIC DISEASES during the Second Quarter of 1884.

	From Diseases in Cols. 2-8.	Small- pox.	Measles.	Scarlet Fever.	Diph- theria.	Whoop- ing- cough.	Fever.	Diar- rhœa.

England and Wales, less the 78 Towns -	1·60	0·05	0·30	0·35	0·14	0·32	0·20	0·24

**WATERING PLACES AND SUMMER RESORTS.**—The deaths registered last quarter in the forty-six districts or sub-districts which are taken (Table viii.) as approximately representing the principal English watering places, corresponded to an annual rate of 16·0 per 1000, and of this 16·0, the share due to the chief zymotic diseases was 0·99. This zymotic rate contrasts very favourably, not only with that of all England and Wales, which was 2·13, but with that of the comparatively rural parts of the country which remain after excluding the 78 chief towns or urban districts; the zymotic rate in these rural parts having been 1·60.

The zymotic death-rate, or annual rate of mortality from the principal zymotic diseases, was 0·00 in Southend, Littlehampton, Bognor, Lyme, Sidmouth, Ilfracombe, Bangor, Llandudno, and Matlock; while it rose to 3·93 in Penzance, owing to an outbreak of whooping-cough, to 4·11 in Deal, and to 5·93 in Folkestone, owing to the prevalence of measles.

**CERTIFICATION OF CAUSES OF DEATH.**—The causes of 116,661, or 91·2 per cent., of the 127,946 deaths in England and Wales, were certified by registered medical practitioners in attendance during the last illness, and 6671, or 5·2 per cent., by coroners in inquest cases. The causes of the remaining 4614, or 3·6 per cent., of the deaths were uncertified. The proportion of uncertified deaths was but 1·3 per cent. in London, whereas it was 4·0 per cent. in the rest of England and Wales. The per-centage of uncertified causes of death did not exceed 0·9 in Wiltshire, 1·0 in Rutlandshire, 1·1 and 1·4 in the extra-metropolitan portions of Middlesex and Surrey respectively, and 1·6 both in Sussex and Buckinghamshire; whereas it ranged upwards to 6·1 in Herefordshire, 6·2 in Cornwall, and 6·3 in Westmorland. In Wales 10·4 per cent. of the causes of death were uncertified. In the twenty-eight large towns the proportion of uncertified deaths was 2·4 per cent.; it did not exceed, as above stated, 1·3 per cent. in London, while it was 3·4 in the twenty-seven provincial towns. The per-centages in these provincial towns ranged from 0·7 in Portsmouth, 1·1 in Plymouth, and 1·2 in Norwich, to 5·4 in Sheffield, 5·6 in Hull, 6·3 in Halifax, and 7·4 in Oldham.

**VIOLENT DEATHS.**—The deaths referred to different forms of violence were 4016, and corresponded to an annual rate of 0·59 per 1000 of the estimated population, and were equal to 3·1 per cent. of the total deaths. The death-rate from violence in the different counties ranged from 0·18 in Bedfordshire, 0·27 in Herefordshire, and 0·33 both in Norfolk and Dorsetshire, to 0·72 in Durham, 0·73 in Northumberland, 0·74 in the extra-Metropolitan portion of Middlesex, and 0·75 in the counties of South Wales. In the twenty-eight large towns the deaths from violence corresponded to an annual rate of 0·71 per 1000; the rates in the several towns ranged from 0·23 in Bradford, 0·33 in Oldham, and 0·36 in Norwich, to 0·93 in Birkenhead, 0·97 in Wolverhampton, 1·02 in Liverpool, and 1·25 in Cardiff.

**INQUESTS.**—During last quarter 6671 inquest cases were registered, being 5·2 per cent. of the total deaths. The average proportion in the ten preceding corresponding quarters was 5·1. In the twenty-eight large towns the proportion of inquests to deaths was 6·3 per cent.; it ranged from 1·8 in Oldham, 2·9 in Huddersfield, and 3·0 in Blackburn, to 8·6 in Birmingham, 10·1 in Leicester, and 10·2 in Birkenhead.

**DEATHS IN PUBLIC INSTITUTIONS.**—The deaths registered in workhouses, hospitals, and public lunatic asylums numbered 13,767, or 10·8 per cent. of the total deaths; this proportion was 0·8 per cent. in excess of the mean per-centage in the second quarter of the ten years 1874–83. In the corresponding periods of 1882 and 1883 the proportions of deaths in public institutions were 10·5 and 11·0 respectively. In the twenty-eight great towns 7308, or 16·1 per cent., of the deaths last quarter were recorded in the principal public institutions, against 16·7 per cent. in the second quarter of 1883; the proportions of institution deaths in these towns ranged from 5·7 in Bradford, 6·3 in Plymouth, and 7·5 in Oldham, to 17·2 in Brighton, 21·0 in London, and 22·7 in Manchester. Excluding the twenty-

eight great towns, the proportion of such deaths in the rest of England and Wales did not exceed 7·8 per cent.

#### HEALTH OF FOREIGN AND COLONIAL CITIES.

A summary of the Weekly Returns with which the Registrar-General is favoured by various local authorities abroad, shows that the average annual death-rate during the quarter ending June last in thirty Colonial and Foreign cities, having an aggregate population of nearly fifteen millions of persons, was 27·5 per 1000. The average-rate in the twenty-four European cities was 28·7 per 1000, against 20·8 in twenty-eight of the largest English towns. The lowest death-rates among the thirty Colonial and Foreign cities were 17·3 in Christiania, 19·2 in Brooklyn, 19·5 in Baltimore, and 21·1 in Philadelphia; the rates ranged upwards in the other towns to 38·2 in St. Petersburg, 38·6 in Prague, 39·0 in Buda-Pesth, and 44·6 in Madras. The epidemic of small-pox in Madras, which caused 3017 deaths, or a weekly average of 232, during the first quarter of the year, showed a considerable decline during April and May; in the first eleven weeks of the quarter under notice the deaths from this disease did not exceed 1037, or 94 weekly. The 19 fatal cases of small-pox in Paris showed a further decline from the numbers recorded in the four preceding quarters; the 598 deaths from diphtheria and croup also showed a decline from the high number in the first quarter of the year, but the fatality of measles and of typhoid fever showed an increase, the death-rate from the latter disease being more than four times greater than in London. The deaths referred to small-pox in Brussels, which had been 113 in the first three months of this year, rose last quarter to 163; the fatal cases of this disease in Prague, which had risen from 12 to 523 in the four previous quarters, declined to 364, which were, however, equal to a rate of 5·36 per 1000, while the small-pox death-rate in London did not exceed 0·29 per 1000. Measles caused no fewer than 624 deaths in St. Petersburg, against 59 and 337 in the two preceding quarters; this disease was also fatally prevalent in Rotterdam, Rome, Madrid, and New York. The 574 deaths from diphtheria in Berlin showed a further decline from the high numbers in the two previous quarters.

592	Swansea - - - M -	89,973	842	441	37'5	19'7	1'65	153	{ Llanafelach, Swansea, and Llan- samlet Sub-districts.	

Note.—The letter M or P affixed to the name of each Town denotes whether the limits, which the district or sub-districts named in the last column approximately represent, are Municipal or Parliamentary. Imp† D. signifies an Improvement District, and L. G. D. a Local Government District.

† The rates of mortality for these towns have been corrected by the exclusion of a proportional number of deaths occurring in County Hospitals and Lunatic Asylums, situate within the districts or sub-districts here taken as representing the towns, or by the exclusion of a proportion of the deaths in Union Workhouses in cases where only a portion of the Union is embraced by the area taken, or where the Workhouse is situate outside that area.

† The rate of increase of population in Barrow-in-Furness and in Ystradgofwg was so abnormally large between 1871 and 1881 as to preclude the probability of the rate being maintained between 1881 and 1891. The present population of these towns has therefore been estimated from special returns of inhabited houses with which the R. Registrar-General has been favoured by the local authorities.

TABLE VIII.—Mortality in Districts or Sub-districts containing the principal English Watering Places during the Second or Spring Quarter of 1884.

District Numbers.	WATERING PLACES.	AREA in Acres.	Estimated POPULA- TION in the middle of the Year 1884.	Deaths registered in the Quarter ending 30th June 1884.	DEATHS from							ANNUAL DEATH-RATE per 1000 living		DISTRICTS and SUB-DISTRICTS taken as approximately representing the Watering Places.

\* The figures for Folkestone relate only to the civil population. The population of Shorecliffe Camp and the deaths occurring therein have been excluded.

† The rates of mortality for these towns have been corrected by the exclusion of deaths occurring in County Hospitals and Lunatic Asylums situate within the districts or sub-districts taken to represent the watering places, or by the exclusion or addition of a portion of the deaths in Union Workhouses in cases where a portion of the Union only is embraced by the area taken or where the Workhouse is situate outside that area.

Note.—In estimating the population of these Districts, upon which the birth and death-rates have been calculated, it has been assumed that the rate of increase in Greater London since 1881 has been the same as that which prevailed between 1871 and 1881; the estimate for the Outer Ring is obtained by the deduction of the estimated population of Inner London from population of the Outer Ring, obtained in the manner above described. In calculating the rates of mortality, a proportion of the deaths recorded in the three Middlesex County Lunatic Asylums, situated in the Districts of Epsom, Uxbridge, and Barnet, has been excluded as belonging to the Middlesex portion of Registration or Inner London, and the remainder distributed among the Middlesex Districts of the Outer Ring.

TABLE X.—Births and Deaths in the Second Quarter of 1884, in 30 Foreign Cities having an estimated aggregate Population of 14,878,364 persons.

\* The Registration or Union Counties consist of groups of Superintendent Registrars' Districts, which are generally co-extensive with Poor Law Unions. Those Districts which extend into two or more Counties (proper) are included entirely in that County in which the principal town of the district, or the greater part of the population, is located. The boundaries of Registration or Union Counties therefore differ more or less from the boundaries of Counties (proper).

b The averages of Marriages and Births are given only for the Eleven Divisions and for Registration Counties.

c See page 14, note

NOTE.—The Registrars alone must be considered responsible for the accuracy of the figures shown in their Returns, and for the opinions expressed in the foot notes.

REGISTRATION COUNTIES, and SUPERINTENDENT REGISTRARS' DISTRICTS of ENGLAND of INFANTS under one year of Age, and of PERSONS aged 60 years and upwards from WHOOPING-COUGH, FEVER, DIARRHŒA, CHOLERA, and VIOLENCE, also INQUEST CASES and in the DIVISIONS, REGISTRATION COUNTIES, SUPERINTENDENT REGISTRARS' DISTRICTS, and of ENGLAND.

a The Superintendent Registrars' Districts (630 in number) are collections of contiguous Parishes or Places, combined for purposes connected with the Registration of Births, Deaths, and Marriages, and are nearly always identical with the Poor Law Unions of the same name; they are here arranged topographically under the Registration Counties.

b These areas, which were partly revised by the Ordnance Survey Department, are the same as those published in the Abstracts of the Census of 1881. They do not include space occupied by foreshore or tidal water of rivers and creeks. c See page 14, note b.

## II.—SOUTH EASTERN COUNTIES.—SUPERINTENDENT REGISTRARS' DISTRICTS—continued.

Superintendent Registrars' Districts.		Area in Statute Acres.	Enumerated Population, 1881.	Mar- riages Registered in Quarter ending 31 Mar. 1884.	Births Registered in Quarter ending 30 June 1884.	Deaths Average in Quarters ending 30 June in the 3 Years 1881-83. Registered in Quarter ending 30 June 1884.	The DEATHS in the Quarter are stated by the Registrars to include											Deaths in Public Insti- tutions.
							Deaths of Infants under 1 Year of Age.	Persons aged 10 Years & upwards.	Deaths from									
									Small-pox.	Measles.	Scarlet Fever.	Diphtheria.	Whooping-cough.	Fever.	Diarrhoea.	Cholera.	Violence.

\* The Registration Sub-districts (2151 in number) are sub-divisions of the Superintendent Registrars' Districts in which the Births and Deaths are registered by Registrars severally appointed for that purpose. The letter W denotes that the Sub-district contains within its limits a Workhouse belonging to the District or Union; w indicates that a Workhouse Establishment receiving inmates from other Districts than the one in which it stands is included; H indicates Hospital or Infirmary; and L Lunatic Asylum.

b For London, the numbers of Births and Deaths, as well as the details given under "Infants under 1 year of age" and the twelve subsequent headings in this Table, are derived from the Weekly Returns made by the Registrars, and relate to 13 weeks ending 28th June 1884.

c 5: 1.—Prior to 1st April 1884 the parish of St. James Westminster was comprised in two registration sub-districts, viz., Golden Square, and Berwick Street.

a 629: 2.—Of the 3 deaths from diphtheria, 2 occurred in the parish of Llanfodr, and one in the parish of Eifwnechtyd, all in the Rural Sanitary District.

b 625: 2.—Of the 12 deaths from scarlet fever, all of which occurred in Festiniog Urban Sanitary District, one was registered in April, 2 in May, and 9 in June.

c 65: 3.—The 9 deaths from measles and 8 from scarlet fever occurred in Ynys-cynhalarn Urban Sanitary District.

d 69: 1.—Of the 11 deaths from measles (8 of them in June), 10 occurred in Conway Urban Sanitary District.

e 630: 6.—Of the 18 deaths from measles, 17 occurred in Holyhead Urban Sanitary District.

## METEOROLOGY OF ENGLAND.

REMARKS ON THE WEATHER DURING THE QUARTER ENDING JUNE 30TH, 1884.

By JAMES GLAISHER, Esq., F.R.S., &amp;c.

The weather in April was moderately warm at the beginning, but cold with an unusual prevalence of E. and N.E. winds after the middle of the month, the barometer readings were low and the temperature of the month was below its average. The rainfall was less than its average,—there were but very few thunderstorms. The nights were frequently frosty, and snow fell on several days at different places.

The weather in May was very dry and rain became very much needed, on the whole it was a fine, dry, and warm month. During the latter half of the month the east wind was very prevalent. The atmospheric pressure was low during the first week and was generally high afterwards. The weather was cold during the first week and at the end of the month, but warm in the middle.

The weather in June was very cold during the first three weeks, and warm at the end. The north wind was unusually prevalent, and the east wind was very frequent. Rain fell during the first half of the month, and very little afterwards. The atmospheric pressure was below its average during the first 9 days of the month, and was generally above afterwards.

About London the mean daily temperature of the air in April was above its average till the 9th day (the 2nd being as much as  $12^{\circ}\cdot3$  and the 3rd  $11^{\circ}\cdot1$  above their averages), and the mean daily excess of the 9 days was  $6^{\circ}\cdot2$ ; it was below from April 10th to May 8th, the average daily deficiency of these 29 days being  $4^{\circ}\cdot3$ ; from May 9th to the 17th it was warmer (the 11th and 12th being  $13^{\circ}\cdot2$  and  $11^{\circ}\cdot9$  respectively above their averages), the mean daily excess being  $6^{\circ}\cdot9$ ; for 3 days the deficiency daily was  $0^{\circ}\cdot5$ , then for 7 days the excess was  $3^{\circ}\cdot0$ ; from May 28th to June 11th the weather was very cold, the average daily deficiency of mean temperature was  $5^{\circ}\cdot0$ ; from the 12th to the 14th it was warmer, being  $3^{\circ}\cdot0$  above the average; from the 15th to the 21st it was  $3^{\circ}\cdot0$  below the average, and the 9 days at the end of the quarter were warm, their mean being  $2^{\circ}\cdot1$  above the average.

The mean temperature of the air for April was  $45^{\circ}\cdot1$ , being  $1^{\circ}\cdot0$  and  $2^{\circ}\cdot0$  below the averages of 113 years and 43 years respectively; it was  $1^{\circ}\cdot7$ ,  $2^{\circ}\cdot8$ , and  $0^{\circ}\cdot8$  lower than in 1883, 1882, and 1881 respectively.

The mean temperature of the air for May was  $54^{\circ}\cdot3$ , being  $1^{\circ}\cdot8$  and  $1^{\circ}\cdot6$  above the averages of 113 years and 43 years respectively; it was  $1^{\circ}\cdot2$  higher than in 1883,  $0^{\circ}\cdot2$  lower than in 1882, and  $0^{\circ}\cdot2$  higher than in 1881.

The mean temperature of the air for June was  $58^{\circ}\cdot0$ , being  $0^{\circ}\cdot2$  and  $0^{\circ}\cdot9$  below the averages of 113 years and 43 years respectively; it was  $1^{\circ}\cdot0$  lower than in 1883,  $1^{\circ}\cdot5$  higher than in 1882, and  $0^{\circ}\cdot7$  lower than in 1881.

The mean temperature for the quarter was  $52^{\circ}\cdot5$ , being  $0^{\circ}\cdot2$  higher than the average of 113 years and  $0^{\circ}\cdot4$  lower than the average of 43 years.

The mean high day temperature of the air in April was  $54^{\circ}\cdot3$ , being  $3^{\circ}\cdot3$  lower than the average of 43 years, in May it was  $65^{\circ}\cdot7$ , being  $1^{\circ}\cdot5$  higher than the average, and in June it was  $69^{\circ}\cdot3$ , being  $1^{\circ}\cdot6$  lower than the average.

The mean low night temperature of the air in April was  $37^{\circ}\cdot1$ , being  $2^{\circ}\cdot0$  lower than the average of 43 years; in May it was  $43^{\circ}\cdot8$ , being  $0^{\circ}\cdot1$  higher than the average, and in June it was  $49^{\circ}\cdot1$ , being  $0^{\circ}\cdot8$  lower than the average.

The mean daily range of temperature in April was  $1^{\circ}\cdot3$  lower than the average, in May it was  $1^{\circ}\cdot4$  higher than the average, and in June it was  $0^{\circ}\cdot7$  lower than the average.

The mean temperature of the air for April was  $0^{\circ}\cdot6$  higher than in March, in May it was  $9^{\circ}\cdot2$  higher than in April, and in June it was  $3^{\circ}\cdot7$  higher than in May.

(From the preceding 43 years' observations the increase of temperature from March to April is  $5^{\circ}\cdot4$ , the increase of temperature from April to May is  $5^{\circ}\cdot6$ , and the increase from May to June is  $6^{\circ}\cdot2$ .)

From March to April there was an increase of temperature at stations south of  $51^{\circ}$  of  $0^{\circ}\cdot3$ , between  $51^{\circ}$  and  $52^{\circ}$  of  $0^{\circ}\cdot8$ , between  $52^{\circ}$  and  $53^{\circ}$  of  $0^{\circ}\cdot9$ , between  $53^{\circ}$  and  $54^{\circ}$  of  $1^{\circ}\cdot3$ ; and north of  $54^{\circ}$  of  $1^{\circ}\cdot7$ .

From April to May there was an increase of temperature at stations south of  $51^{\circ}$  of  $7^{\circ}\cdot3$ , between  $51^{\circ}$  and  $52^{\circ}$  of  $8^{\circ}\cdot8$ , between  $52^{\circ}$  and  $53^{\circ}$  of  $8^{\circ}\cdot2$ , between  $53^{\circ}$  and  $54^{\circ}$  of  $6^{\circ}\cdot9$ , and north of  $54^{\circ}$  of  $5^{\circ}\cdot3$ .

From May to June there was an increase of temperature at stations south of  $51^{\circ}$  of  $4^{\circ}\cdot3$ , between  $51^{\circ}$  and  $52^{\circ}$  of  $3^{\circ}\cdot9$ , between  $52^{\circ}$  and  $53^{\circ}$  of  $3^{\circ}\cdot7$ , between  $53^{\circ}$  and  $54^{\circ}$  of  $4^{\circ}\cdot5$ , and north of  $54^{\circ}$  of  $6^{\circ}\cdot4$ .

The mean reading of the barometer for the month of April at the height of 160 feet above the level of the sea was  $29^{\circ}\cdot645$  ins., being  $0^{\circ}\cdot107$  in. below the average of 43 years,  $0^{\circ}\cdot181$  in. lower than in 1883;  $0^{\circ}\cdot043$  in. higher than in 1882, and  $0^{\circ}\cdot127$  in. lower than in 1881.

The mean reading of the barometer for the month of May was  $29^{\circ}\cdot824$  ins., being  $0^{\circ}\cdot033$  in. above the average of 43 years;  $0^{\circ}\cdot040$  in. higher than in 1883,  $0^{\circ}\cdot051$  in. lower than in 1882, and  $0^{\circ}\cdot105$  in. lower than in 1881.

The mean reading of the barometer for the month of June was  $29^{\circ}\cdot857$  ins., being  $0^{\circ}\cdot053$  in. above the average of 43 years,  $0^{\circ}\cdot064$  in. higher than in 1883,  $0^{\circ}\cdot122$  in. higher than in 1882, and  $0^{\circ}\cdot051$  in. higher than in 1881.

From March to April there was a decrease of pressure at stations south of  $51^{\circ}$  of  $0.120$  in.; between  $51^{\circ}$  and  $52^{\circ}$  of  $0.106$  in., between  $52^{\circ}$  and  $53^{\circ}$  of  $0.086$  in., between  $53^{\circ}$  and  $54^{\circ}$  of  $0.028$  in., and north of  $54^{\circ}$  of  $0.012$  in.

From April to May there was an increase of pressure at stations south of  $51^{\circ}$  of  $0.209$  in., between  $51^{\circ}$  and  $52^{\circ}$  of  $0.185$  in., between  $52^{\circ}$  and  $53^{\circ}$  of  $0.154$  in., between  $53^{\circ}$  and  $54^{\circ}$  of  $0.112$  in., and north of  $54^{\circ}$  of  $0.033$  in.

From May to June there was an increase of pressure at stations south of  $51^{\circ}$  of  $0.035$  in., between  $51^{\circ}$  and  $52^{\circ}$  of  $0.045$  in., between  $52^{\circ}$  and  $53^{\circ}$  of  $0.045$  in., between  $53^{\circ}$  and  $54^{\circ}$  of  $0.092$  in., and north of  $54^{\circ}$  of  $0.123$  in.

NOTE.—In reading this table it will be borne in mind that the plus sign (+) signifies *above* the average, and that the minus sign (−) signifies *below* the average.

Average duration of the different directions of the wind referred to eight points of the compass, and duration of each direction in each month in the quarter, were as follows:—

Direction of Wind.	APRIL.			MAY.			JUNE.		
	1884.	Average.	Departure from Average.	1884.	Average.	Departure from Average.	1884.	Average.	Departure from Average.
	d.	d.	d.	d.	d.	d.	d.	d.	d.
N.W.	3½	2½	+ 1	½	1½	− ½	5½	2½	+ 2½
N.	6½	4½	+ 2	0	4½	− 4½	8½	3½	+ 4½
N.E.	8½	6½	+ 2½	2½	7½	− 4½	2½	3½	− 1
E.	1½	3½	− 1½	9½	2½	+ 7	4	2½	+ 1½
S.E.	3½	2½	+ 1½	½	1½	− 1½	½	1½	− 1
S.	5	2½	+ 2½	5½	2½	+ 2½	½	2½	− 1½
S.W.	1½	6½	− 4½	5½	8½	− 2½	2	10	− 8
W.	0	2½	− 2½	6½	2½	+ 4½	6½	4	+ 2½

The plus sign (+) denotes excesses over averages; the largest numbers affected with this sign in the month of April are opposite to S. and N.E.; in May to E. and W.; and in June to N., N.W., and W.

The minus sign (−) denotes deficiencies below averages. In April the largest numbers are opposite to S.W. and W.; in May to N. and N.E.; and in June to S.W. and S.

About London the barometric pressure in April was below its average till the 8th day; the mean deficiency was  $0.32$  in.; from the 9th to the 14th the mean excess was  $0.11$  in. daily; for 5 days there was a deficiency of  $0.02$  daily. From April 15th to the 23rd the departures from the averages were very small. From April 24th to May 6th the barometer was low, the average daily deficiency was  $0.23$  in. From May 7th to the 16th there was an average daily excess of  $0.15$  in.; for 3 days a deficiency little differing from the average. From May 20th to the end of the month the pressure was in excess, averaging  $0.26$  in. daily; from June 1st to the 9th the daily deficiency averaged  $0.23$  in.; from June 10th to the end of the quarter the pressure was

above its average, excepting the 24th, which was slightly below, and the mean daily excess of this period was 0.19 in.

*Thunderstorms occurred* in April on the 1st at Halifax; on the 2nd at Blackheath, Royston, Cardington, and Bradford; on the 3rd at Barnet, Cambridge, Burslem, Halifax, and Bradford; on the 5th at Lancaster.

In May, on the 4th at Cardington, Cambridge, and Rugby; on the 5th at Osborne, Stratfield Turgis, Whitechurch, Blackheath, Barnet, Oxford, Cambridge; on the 6th at Torquay, Cambridge, Somerleyton; on the 12th at Ventnor, Osborne, Whitechurch, Blackheath, Barnet, Oxford, Royston, Cardington, Cambridge, and Rugby; and on the 24th at Bath.

In June, on the 5th at Blackheath, Barnet, Oxford, Royston, and Burslem; on the 6th at Stratfield Turgis, Rugby; on the 7th at Southbourne, Bath, Oxford, Wolverhampton, Burslem, Bolton, Halifax, Bradford, and Carlisle; on the 8th at Osborne, Bath, and Oxford; on the 28th at Torquay, Osborne, Southbourne, Bath; on the 29th at Guernsey, Ventnor, Bath, Stratfield Turgis, Whitechurch, Oxford, Bedford, Cambridge, and Rugby.

*Thunder was heard but lightning was not seen* in April, on the 2nd at Whitechurch and Stonyhurst; on the 3rd at Lowestoft, Bolton, and Stonyhurst; on the 5th at Burslem and Halifax; on the 27th at Barnet; on the 28th at Wolverhampton and Burslem.

In May, on the 5th at Royston, Cardington, Rugby, Wolverhampton, and Hull; on the 6th at Hull; on the 12th at Totnes and Torquay; on the 19th at Rugby; on the 24th at Guernsey and Osborne.

In June, on the 2nd at Stratfield Turgis and Silloth; on the 3rd at Silloth; on the 4th at Bath; on the 5th at Stratfield Turgis and Wolverhampton; on the 6th at Royston, Cambridge, and Hull; on the 7th at Cambridge and Stonyhurst; on the 8th at Rugby; on the 28th at Torquay; and on the 29th at Torquay, Stratfield Turgis, and Royston.

*Lightning was seen but thunder was not heard* in April, on the 2nd at Barnet and Oxford; on the 4th at Oxford; on the 14th at Stonyhurst. In May, on the 3rd at Cambridge; on the 4th at Hull; on the 12th at Torquay and Blackheath; on the 24th at Totnes, Torquay, Marlborough, Whitechurch, Oxford, Burslem, and Halifax; and on the 25th at Guernsey and Truro.

In June, on the 2nd at Oxford; on the 28th at Plymouth, Torquay, Whitechurch, and Royston; on the 29th at Torquay; and on the 30th at Guernsey.

*Solar halos were seen* in April, on the 4th at Oxford; on the 5th at Halifax; on the 6th at Torquay, Bath, Oxford, Halifax; on the 17th at Torquay, and on the 30th at Hull.

In May on the 1st at Torquay, Bath, and Halifax; on the 3rd at Oxford; on the 5th at Oxford and Stonyhurst; on the 7th at Oxford; on the 15th at Halifax; on the 18th and 19th at Oxford; on the 24th at Torquay and Halifax.

In June, on the 11th at Halifax; on the 15th at Torquay; on the 25th and 26th at Halifax.

*Lunar halos were seen* in April, on the 3rd at Torquay and Halifax; on the 4th at Hull; on the 5th at Stratfield Turgis; on the 6th at Bath.

In May, on the 8th at Oxford; and on the 9th at Oxford and Cambridge.

In June, on the 6th at Cambridge.

*Aurora boreales* were seen in April, on the 24th at Oxford, Cambridge, Halifax, and Stonyhurst.

*Snow fell* in April, on the 17th at Whitechurch, Oxford, and Cambridge; on the 18th at Halifax, Hull; on the 19th at Bath; on the 20th at Oxford; on the 21st at Bath and Cambridge; and on the 23rd at Lowestoft and Somerleyton.

In May on the 3rd at Halifax; on the 5th at Whitechurch, Blackheath; on the 18th at Carlisle.

*Hail fell* in April, on the 2nd at Oxford, Royston, Cambridge; on the 3rd at Halifax; on the 5th at Torquay, on the 13th at Royston and Hull; on the 14th at Barnet; on the 17th at Torquay, Bath, Blackheath, Barnet, Cardington, Rugby, Lowestoft; on the 18th at Hull; on the 20th at Cardington; on the 21st at Osborne, Whitechurch, Barnet, and Cardington; on the 22nd at Barnet, Royston, Cambridge, Hull; on the 24th at Blackheath, Royston, Hull; on the 26th at Torquay; on the 27th at Halifax; on the 28th at Rugby; on the 29th at Hull, and on the 30th at Royston and Rugby.

In May, on the 1st at Stonyhurst; on the 2nd at Bolton; on the 3rd at Stratfield Turgis, Cardington, Cambridge, Rugby, Bolton, Halifax, and Stonyhurst; on the 4th at Cardington, Rugby, Wolverhampton, Burslem, Bolton, Halifax, Hull, Stonyhurst, Bradford, and Carlisle; on the 5th at Torquay, Ventnor, Osborne, Stratfield Turgis, Whitechurch, Blackheath, Oxford, Royston, Cardington, Cambridge, Rugby, Somerleyton, Wolverhampton, Burslem, Bolton, Halifax, Hull; on the 6th at Cardington, Somerleyton, Halifax, and Hull; and on the 18th and 20th at Carlisle.

In June, on the 6th at Truro, Oxford; on the 7th at Truro, Rugby; on the 8th at Oxford and Halifax; on the 29th at Oxford.

*Fog prevailed* in April, on the 2nd at Torquay; on the 7th at Bolton; on the 8th at Oxford; on the 9th, 10th, 11th, 13th, and 27th at Bath; on the 29th at Osborne, Bath, Blackheath, Barnet, Cambridge; and on the 30th at Lowestoft.

In May, on the 2nd at Guernsey; on the 7th at Stonyhurst; on the 10th at Totnes, Torquay, and Bath; on the 11th at Guernsey; on the 12th at Guernsey and Bolton; on the 13th at Guernsey and Bath; on the 16th at Guernsey and Ventnor; on the 17th and 20th at Guernsey; on the 25th at Guernsey, Torquay; and on the 27th at Cambridge.

In June, on the 7th at Bath; on the 11th at Guernsey, Torquay, Ventnor, Bath; on the 12th at Guernsey, Bath; on the 17th at Bath; on the 23rd and 24th at Guernsey; on the 25th at Bolton; on the 26th at Guernsey; on the 27th at Ventnor; and on the 28th at Guernsey.

MONTHLY METEOROLOGICAL TABLE FOR THE QUARTER ENDING JUNE 30TH, 1884.

*The Observations have been reduced to Mean values by Glušier's Barometrical and Diurnal Range Tables, and the Hygrometrical results have been deduced from the sixth edition of his Hygrometrical Tables.*

Year 1881.	Month.	Height of Station above Sea Level.	Pressure of Air in Month.			Temperature of Air in Month.			Mean Tem- perature.			Mean Degree of Humi- dity, "Sat" = 100.	Vapour.			Mean Reading of Thermometer.	Wind.			Mean Amount of Precipitation.	Mean Amount of Cloud.	Number of Days it fell.	Rain. Amount in inches.		
			Range.	Mean.	Range.	Lowest.	Range.	Or all Highest.	Or all Lowest.	Daily Range.	Air.		Dew Point.	Elastic Force.	In a cubic foot of Air.		Estimated Strength.	Relative Proportion of							
															Short of Saturation.			Mean.	N.					E.	S.

The highest temperatures of the air were at Carlisle, 86° 2; at Salisbury and Cardington, 85° 0; and at Nottingham, 85° 8.

The lowest temperatures of the air were at Barnet, 21° 2; at Rugby, 21° 6; and at Salisbury and Cardington, 22° 0.

The greatest ranges of temperature were at Salisbury, 24° 9; at Cambridge, 22° 8; and at Barnet and Cardington, 22° 1.

The least ranges of temperature were at Guernsey, 12° 0; at Llandudno, 12° 2; and at Liverpool, 13° 1.

The greatest number of days of rain were at Leicester and Bradford 45; and at Nottingham 43.

The least number of days of rain were at Ventnor and Royston, 22; and at Eastbourne, Osborne, and Llandudno, 24.

The greatest falls of rain were at Bath, 7.91 inches; at Guernsey, 6.56 inches; and at Salisbury, 6.17 inches.

The least falls of rain were at Royston and Holkham, 2.71 inches; at Somerleyton, 3.19 inches; and at Liverpool, 3.24 inches.

# QUARTERLY RETURN

OF

## MARRIAGES BIRTHS, AND DEATHS

REGISTERED IN THE DIVISIONS, COUNTIES, AND DISTRICTS OF

### ENGLAND;

WITH CERTAIN DETAILED INFORMATION RELATING TO THE DEATHS IN EACH  
REGISTRATION SUB-DISTRICT.

By Authority of the Registrar General.

PUBLISHED BY EYRE AND SPOTTISWOODE, 9, EAST HARDING ST., FETTER LANE, E.C.

No. 143.] **Marriages**—*April, May, June, 1884.*  
**Births and Deaths**—*July, August, September, 1884.* [Price 9d.]

*General Register Office, Somerset House,  
31st October, 1884.*

The POPULATION of the UNITED KINGDOM in the middle of 1884 is estimated at 35,951,865 persons; that of England and Wales at 27,132,449, of Scotland at 3,866,521, and of Ireland at 4,952,895.

In the United Kingdom the *births* of 286,991 children, and the *deaths* of 170,474 persons, were registered in the three months ending 30th September 1884. The recorded natural increase of population was thus 116,517. The registered number of persons married in the quarter ending 30th June 1884 was 130,392.

The birth-rate in the United Kingdom in the third quarter of 1884 was 31·7 per 1000, and the death-rate 18·8. The marriage-rate in the second quarter of 1884 was 14·5 per 1000.

The several facts concerning Scotland and Ireland are recorded in the Quarterly Returns of the Registrars-General of those parts of the United Kingdom.

#### ENGLAND.

This Return comprises the BIRTHS and DEATHS registered in the 2149 registration sub-districts of England and Wales during the quarter ending 30th September 1884; and the MARRIAGES in 14,696 churches or chapels, in 9288 registered places of worship unconnected with the Established Church, and in 630 Superintendent Registrars' Offices, in the three months ending 30th June 1884.

#### *Marriages.*

During the three months ending June last, the marriages of 107,278 persons were registered in England and Wales, corresponding to an annual rate of 15·8 per 1000 of the estimated population in the middle of 1884. This marriage-rate was exactly the same as the mean rate in the corresponding quarters of the ten years 1874-83, but showed an increase of 1·4 upon the rate recorded in the second quarter of 1883. The annual marriage-rate in the three months ending June last ranged from 10·1 in Rutlandshire, 11·0 in Cambridgeshire, 11·2 in Suffolk, and 11·5 in the extra-metropolitan portion of Middlesex, to 17·6 in Northumberland, 18·4 in London, 19·5 in Nottinghamshire, and 19·7 in Lincolnshire.

### *Births.*

The births registered in England and Wales during the three months ending September last, were 225,454, showing an increase of 11,310 upon the number returned in the corresponding period of 1883. The annual birth-rate, which was 33.0 per 1000 of the estimated population, was 1.0 below the mean rate in the ten preceding corresponding quarters. The lowest county birth-rates last quarter were 26.7 in Herefordshire, 27.2 in Westmorland, 27.8 in Sussex, and 28.0 in Huntingdonshire; while the highest were 37.2 in Northumberland, 37.4 in Monmouthshire, 38.3 in Nottinghamshire, and 40.5 in Durham.

In the twenty-eight great towns the births registered last quarter corresponded to an annual rate of 33.9 per 1000, which was 0.9 above the general English birth-rate. In London the rate did not exceed 32.8, whereas in the twenty-seven provincial towns it was 34.9, and ranged from 27.4 in Brighton, 28.3 in Bradford, and 29.2 in Huddersfield, to 40.7 in Sunderland, 41.6 in Newcastle-upon-Tyne, and 42.2 in Cardiff. In fifty other large town districts the birth-rate was 34.9, and was 1.0 above the rate in the great towns; but while the rates did not exceed 21.7 in Bath, 22.6 in Cheltenham, and 23.4 in Hastings and in Southport, they ranged upwards to 41.5 in St. Helens, 42.4 in Stoke-upon-Trent, 43.1 in Middlesbrough, 45.5 in South Shields, and 49.5 in Ystradyfodwg.

### *Movement of the Population.*

The *natural* increase of the population of England and Wales, or the excess of births over deaths, which had been 102,004 and 101,026 in the third quarters of 1882 and 1883, declined to 90,776 last quarter. It appears from returns issued by the Board of Trade that 87,522 emigrants embarked during last quarter from the various ports of the United Kingdom at which emigration officers are stationed. Distributing 1085 whose nationality was undistinguished, and excluding 14,891 foreigners, the emigrants of British origin were 72,631, including 48,414 English, 6339 Scotch, and 17,878 Irish; in the three preceding corresponding quarters the numbers of British emigrants were 72,665, 75,407, and 90,791 respectively. The proportions of emigrants last quarter to a million of the population in the three divisions of the United Kingdom were 1784 from England, 1639 from Scotland, and 3610 from Ireland. Compared with the corresponding quarter of 1883 the proportion of emigration last quarter showed a decline in each of the three divisions of the United Kingdom.

### *Prices and Pauperism.*

The average price of wheat during the three months ending September last was 35s. 11d., and showed a decline of 1s. 7d. from that in the preceding quarter. The mean wholesale prices of beef and of mutton last quarter were 6½d. and 6¾d., per lb. respectively; the mean price of beef corresponded with, while that of mutton was ¾d. below, the mean prices in the preceding quarter. The average price of the best sea-borne coal in the London market, put in barge from the collier in the Thames, was 15s. 11d. per ton, showing an increase of 1s. upon the average price in the preceding quarter, and was 1s. 1d. per ton below that recorded in the third quarter of 1883. The mean price of Consols was 100½l. showing a slight decline from the mean price in the preceding quarter. The minimum annual rate of discount charged at the Bank of England, which was reduced to 2 per cent. on 19th June, has since remained unchanged.

The average number of paupers (exclusive of lunatics in asylums, and vagrants) relieved in England and Wales on the last day of each week in the quarter was 682,057, of whom 168,076 received in-door and 513,981 out-door relief. The proportion of the population in receipt of pauper relief during the three months ending September last was 25.1 per 1000, against 26.3 and 25.6 in the two preceding corresponding quarters.

### *Meteorology.*

The remarks upon the Meteorology of the quarter at the Royal Observatory, Greenwich, and at various stations of observation, furnished by Mr. James Glaisher, F.R.S., with accompanying Tables, will be found on pages 65-72. The mean reading of the barometer was 29·817 inches, and was 0·025 inch above the mean reading for the corresponding periods of 43 years; the mean reading was above the average in August and September, while that in July was below the average. The mean temperature of the air during the quarter was 62°·7, and was 3°·0 above the average for the corresponding periods in 112 years. The weather was warm at the beginning of July, but cold afterwards. The weather in August was generally fine and hot. September was for the most part fine, with low temperature during the first week, but high afterwards. The mean temperature was above the average in each month of the quarter, but the greatest excess, 4°·4, was in August. At 40 stations of observation the mean temperature during the quarter ranged from 57°·8 at Wolverhampton and Bolton, to 62°·7 at the Royal Observatory and at Camden Square, London, and 62·8 at Barnstaple.

The amount of rain measured at Greenwich during the quarter was 4·53 inches, and was 2·87 inches below the average amount in the corresponding periods of 68 years. The rainfall was below the average in each month of the quarter, but the greatest deficiency was in August. Rain was measured at Greenwich on 16 days in July, 8 in August, and 12 in September, or on 36 of the 92 days in the quarter. The rainfall recorded at 41 stations of observation ranged from 4·53 inches at the Royal Observatory, and 4·59 at Blackheath, to 12·41 inches at Silloth, and 12·42 inches at Bolton.

The number of hours of bright sunshine recorded during the quarter at the Royal Observatory, Greenwich, was 449·0, against 420·4 and 421·6 in the two preceding corresponding quarters.

### *State of the Public Health; Deaths.*

During the three months ending September last 134,678 deaths were registered in England and Wales, corresponding to an annual death-rate of 19·7 per 1000 of the estimated population. This death-rate, which was 1·1 in excess of the mean rate in the ten preceding corresponding quarters, considerably exceeded the rates prevailing in the three preceding corresponding quarters, which were 16·8, 17·8, and 16·8 respectively. The lowest county rates last quarter were 13·5 in Westmorland, 14·4 in Oxfordshire, 14·8 in Dorsetshire, and 15·0 in Rutlandshire and in Cumberland; the rates in the other counties ranged upwards to 22·1 in Northumberland, 22·3 in Nottinghamshire, and 23·3 in Leicestershire and in Lancashire.

The 134,678 deaths last quarter included 69,907 of males, and 64,771 of females. The annual death-rate among males was 21·0, and among females 18·4 per 1000 estimated to be living of each sex. In equal numbers living the deaths of males were 114 to 100 deaths of females.

URBAN AND RURAL MORTALITY.—In the registration districts and sub-districts comprising the chief towns (see Table III.) and containing an estimated population of more than sixteen millions of persons, the death-rate was 21·8 per 1000; in the remaining and chiefly rural population of about ten millions and three quarters the rate was 16·5. These urban and rural rates were respectively 1·3 and 0·5 above the average rates in the ten preceding corresponding quarters. In equal numbers living, the deaths were 132 in the urban to 100 in the rural population, whereas the average proportion in the third quarter of the ten years 1874-83 was 128 to 100.

In the twenty-eight great English towns, including London, and having an estimated population of more than eight millions and three quarters of persons, the deaths registered corresponded to an annual rate of 22·8 per 1000, which was 1·0 above the general urban rate. In London the death-rate did not exceed 20·9, whereas it was 24·3 in the twenty-seven provincial towns, among which it ranged

from 17·0 in Bristol, 17·1 in Brighton, 18·0 in Derby, and 18·5 in Huddersfield, to 27·1 in Cardiff, 27·2 in Bolton, 27·5 in Liverpool, 28·6 in Leicester, and 30·3 in Preston.

In fifty other large town districts, with an aggregate population estimated at about two millions and three quarters, the deaths registered corresponded to an annual rate of 20·6 per 1000, being 2·2 below the rate in the twenty-eight larger towns. The lowest rates among these fifty towns were 12·5 in Barrow-in-Furness, 13·7 in Reading, 14·3 in Oxford, 14·6 in Bath, 15·4 in Southport, and 15·6 in Cheltenham; the highest rates were 25·9 in Northampton, 27·0 in Ashton-under-Lyne, 27·2 in Wigan, and 28·8 in Gateshead.

**MORTALITY AT DIFFERENT AGES.**—The 134,678 deaths last quarter included 43,143 of infants under one year of age, 62,184 of children and adults aged between one and 60 years, and 29,351 of persons aged 60 years and upwards.

The rate of infant mortality, measured by the proportion of deaths under one year to registered births, was 191 per 1000; in the ten preceding corresponding quarters the proportion of infant mortality was 159 per 1000, and ranged from 115 in 1879 to 195 in 1880. The lowest rates of infant mortality last quarter were 95 in Dorsetshire and in Westmorland, 99 in Oxfordshire, 100 in Wiltshire, and 103 in Somersetshire; while the highest were 230 in Lancashire, 231 in the East Riding of Yorkshire, 241 in Nottinghamshire, and 282 in Leicestershire.

In the twenty-eight large towns the proportion of infant mortality was 242 per 1000 births, and 51 above the general English rate. The rate was 223 in London, and averaged 258 in the twenty-seven provincial towns, among which it ranged from 161 in Bristol, 184 in Huddersfield, and 185 in Plymouth, to 302 in Nottingham, 333 in Norwich, 355 in Preston, and 424 in Leicester.

In fifty other large town districts the rate of infant mortality was 209 per 1000 births; while the proportion was but 112 in Oxford, 115 in Bath, and 117 in Reading, it ranged upwards to 300 in Stockport, 315 in Yarmouth, and 366 in Northampton.

Among persons aged between one and 60 years the annual rate of mortality was 10·1 per 1000, against an average of 10·2 in the ten preceding corresponding quarters. In the twenty-eight great towns the deaths at these ages corresponded to an annual rate of 12·0 per 1000, ranging from 8·2 in Brighton, 8·4 in Derby, 8·8 in Norwich, and 9·1 in Bristol, to 15·3 in Bolton, 15·5 in Manchester, and 15·9 in Liverpool.

The deaths among persons aged 60 years and upwards corresponded to an annual rate of 58·2, being 3·4 above the mean rate in the ten preceding summer quarters of 1874-83. The deaths at this age-period in the twenty-eight towns corresponded to an annual rate of 60·8 per 1000, which exceeded the general English rate by 2·6. In London this rate was 55·2, while it was 66·2 in the twenty-seven provincial towns, ranging from 44·4 in Brighton, 47·7 in Derby, and 49·8 in Plymouth, to 82·0 in Oldham, 84·1 in Sheffield, and 86·4 in Bolton.

The death-rate was considerably above the average among infants and elderly persons, while among children and adults it almost corresponded with the average.

**ZYMOTIC DISEASES.**—The 134,678 deaths from all causes included—

18,630	attributed to diarrhœa,
2256	„ scarlet fever,
2255	„ whooping-cough,
2125	„ measles,
1982	„ fever,
1049	„ diphtheria,
451	„ small-pox.

Thus 28,748 deaths were ascribed to these causes, corresponding to an annual rate of 4·20 per 1000, against an average rate of 3·65 in the ten preceding corresponding quarters.

This excess of mortality above the average was almost exclusively due to *diarrhoea*. The deaths from this cause numbered 18,630, and corresponded to an annual rate of 2.72 per 1000, the average rate in the ten preceding summer quarters having been only 1.91. This increase is of course attributable to the long continuance of hot weather during the quarter; the mean temperature at Greenwich having been considerably higher than in any one of the ten preceding summer quarters.

The rate was only 0.48 in North Wales, and under 1.00 in Wiltshire, Dorsetshire, Oxfordshire, Somersetshire, Herefordshire, Shropshire, and Westmorland, while it was 3.84 in Lancashire, 4.05 in Warwickshire, 4.21 in Nottinghamshire, and 5.38 in Leicestershire.

In the twenty-eight great towns the rate was 3.92, varying from 1.58 in Halifax, and 1.68 in Huddersfield, to 6.22 in Norwich, 6.48 in Nottingham, 8.32 in Preston, and 9.14 in Leicester.

In fifty other considerable towns the rate was 3.20; but while it was under 1.00 in Bath, Merthyr-Tydfil, and Swansea, it was 5.69 in Stockport, 5.77 in St. Helens, 6.96 in Ipswich, and 8.42 in Northampton. In the remainder of England and Wales, after excluding the seventy-eight towns, the rate was 1.98; but was 6.00 or more in the following sub-districts, Grays, Harwich, Kidderminster, Wigston, Rothley, Arnold, Carlton, Runcorn, Farnworth, Darfield, Thornaby, and Houghton-le-Spring.

The deaths ascribed to *scarlet-fever* numbered 2256, and corresponded to an annual rate of 0.33, against an average of 0.61 in the ten preceding summer quarters.

The rate varied from 0.00 in the little counties of Huntingdon and Rutland to 0.52 in Lancashire and in Northumberland, 0.72 in the West Riding, and 0.79 in Staffordshire. In the twenty-eight great towns the rate was 0.41, varying from 0.00 in Norwich and in Plymouth, to 0.97 in Wolverhampton, 0.98 in Leeds, 1.60 in Sheffield, and 2.36 in Cardiff. In fifty other considerable towns the rate was 0.39, but rose to 1.16 in Gateshead, 1.50 in Ystradyfodwg, 1.93 in Walsall, and 3.00 in Wigan. In the remainder of England and Wales, after exclusion of these seventy-eight towns, the rate was 0.27; being, however, far in excess in the sub-districts of Tipton, Hindley, Ashton-in-Makerfield, Ashby-de-la-Zouch, Barnsley, and Wallsend.

The deaths ascribed to *whooping-cough* numbered 2255, and corresponded to an annual rate of 0.33, against an average of 0.36 in the ten preceding summer quarters.

The rate was under 0.05 in Hampshire, Huntingdonshire, Herefordshire, Shropshire, and Westmorland, while it was 0.55 in Leicestershire, 0.56 in Cambridge-shire, 0.58 in Durham, 0.59 in Cornwall, and 0.61 in Warwickshire. In the twenty-eight great towns the rate was 0.49, varying from 0.00 in Blackburn and 0.06 in Portsmouth, to 0.91 in Birmingham, 0.93 in Liverpool, and 1.40 in Sunderland. In fifty other considerable towns the rate was 0.28, rising, however, to 0.83 in Gateshead, 1.18 in Hastings, and 1.23 in Accrington. In the remainder of England and Wales, after excluding the seventy-eight towns, the rate was 0.25.

The deaths ascribed to *measles* numbered 2125, and corresponded to an annual rate of 0.31, against an average of 0.27 in the ten preceding summer quarters.

The rate was 0.00 in Huntingdonshire, Herefordshire, Rutlandshire, Cumberland, and Westmorland, while it was 0.65 in Warwickshire and in Lancashire, 0.76 in Dorsetshire, and 0.77 in Worcestershire. In the twenty-eight great towns the rate was 0.48, but varied from 0.00 in Brighton, Derby, and Sunderland, to 1.01 in Preston, 1.27 in Liverpool, 1.73 in Bolton, 1.78 in Blackburn, and 1.94 in Halifax. In fifty other considerable towns the rate was 0.26, rising, however, to 1.42 in Hastings, 2.80 in Warrington, and 3.92 in Accrington. In the remainder of England and Wales, after exclusion of the seventy-eight towns, the rate was 0.23. Among sub-districts the mortality was excessive in Bridgwater, Martock, and Halesowen.

The deaths ascribed to *fever*, including typhus, enteric fever, simple and ill-defined forms of continued fever, numbered 1982, and corresponded to an annual rate of 0·29, against an average of 0·35 for the ten preceding summer quarters.

The rate varied from 0·09 in Sussex and 0·11 in Berkshire, to 0·65 in Worcestershire and 0·72 in the East Riding. In the twenty-eight great towns the rate was 0·31, varying from 0·09 in Derby and 0·10 in Wolverhampton, to 0·52 in Preston, 0·53 in Plymouth and in Salford, and 0·58 in Blackburn. In fifty other considerable towns the rate was 0·35 per 1000, rising, however, to 1·03 in Ystradyfodwg, 1·21 in York, and 1·23 in Colechester. In the remainder of England and Wales, after excluding these seventy-eight towns, the rate was 0·27. The mortality was excessively high in the sub-district of Kidderminster, where 46 deaths were registered last quarter in a population which in 1881 numbered 27,675.

The deaths ascribed to *diphtheria* numbered 1049, and corresponded to an annual rate of 0·15, against an average of 0·10 for the ten preceding summer quarters.

No death from this cause was registered either in Oxfordshire or Rutlandshire, and only one each in Buckinghamshire, Cumberland, and Westmorland; while the rate was 0·31 in Huntingdonshire, 0·32 in Norfolk, 0·33 in Hertfordshire, 0·34 in Lincolnshire, and 0·37 in Surrey (*extra-met.*). In the twenty-eight great towns the rate was 0·16, and varied from 0·00 in Norwich, Derby, Bolton, Blackburn, Huddersfield, and Halifax, to 0·24 in London, 0·27 in Portsmouth, and 0·30 in Cardiff. In fifty other considerable towns the rate was 0·09, rising to 0·61 in Northampton, 0·62 in Southport, and 0·76 in Chatham. In the remainder of England and Wales, after excluding these seventy-eight towns, the rate was 0·16, but was far higher in the sub-districts of Frimley, Yapton, Alresford, Finchfield, Holt, Burnham, Wainfleet, and North Collingham.

The deaths from *small-pox* were 451, and corresponded to an annual rate of 0·07, against an average of 0·05 in the ten preceding summer quarters.

Of the 451 deaths, 196 were registered in London and 153 more in the closely adjoining counties of Middlesex, Surrey, Kent, and Essex, nearly one-half of these 153 being deaths of London residents who had been removed to the Metropolitan Asylum Hospitals outside the boundary of Registration London. Of the remaining 102, 22 were registered in Liverpool, and 12 each in Sheffield and Sunderland, leaving 56 cases scattered over the rest of the country.

The following Table shows the relative mortality from each of the above-mentioned zymotic diseases in the twenty-eight great towns, in the fifty other considerable urban districts, and in the remainder of the country:—

ANNUAL DEATH-RATE per 1,000 from several ZYMOTIC DISEASES during the Third Quarter of 1884.

	From Diseases in Cols. 2-8.	Small-pox.	Measles.	Scarlet Fever.	Diphtheria.	Whooping-cough.	Fever.	Diar-rhoea.

CERTIFICATION OF CAUSES OF DEATH.—The causes of 123,123, or 91·4 per cent., of the 134,678 deaths in England and Wales were certified by registered medical practitioners in attendance during the last illness, and 6981, or 5·2 per cent., by coroners in inquest cases. The causes of the remaining 4574, or 3·4 per cent., of the deaths were uncertified. The proportion of uncertified deaths was

but 1·2 per cent. in London, whereas it was 3·8 per cent. in the rest of England and Wales. The per-centage of uncertified causes of death did not exceed 0·9 in the extra-metropolitan portion of Surrey, 1·2 in the extra-metropolitan portion of Middlesex, 1·3 in Leicester, 1·6 in Hampshire, 1·7 in Berkshire, and 1·8 in Sussex; whereas it ranged upwards to 6·1 in Durham, 6·3 in Shropshire, and 6·4 in Cornwall. In South and North Wales the proportions were 8·4 and 10·0 per cent. respectively. In the twenty-eight large towns the proportion of uncertified deaths was 2·2 per cent.; it did not exceed, as above stated, 1·2 per cent. in London, while it averaged 2·9 in the twenty-seven provincial towns. The per-centages in these provincial towns ranged from 0·6 and 0·8 in Portsmouth and Nottingham, to 5·2 in Birkenhead, 5·4 in Halifax, and 7·8 in Oldham.

**VIOLENT DEATHS.**—The deaths referred to different forms of violence were 4559, and corresponded to an annual rate of 0·67 per 1000 of the estimated population, and to 3·4 per cent. of the total deaths. The death-rate from violence in the different counties ranged from 0·31 in Westmorland, 0·45 in Dorsetshire, and 0·46 in Oxfordshire, to 0·79 in the extra-metropolitan portion of Kent, 0·83 in Northumberland, and 0·88 in Monmouthshire. In the twenty-eight large towns the deaths from violence corresponded to an annual rate of 0·71 per 1000; the rates in the several towns ranged from 0·41 in Salford, 0·42 in Portsmouth, and 0·44 in Bradford, to 0·93 in Newcastle-upon-Tyne, 1·02 in Liverpool, and 1·07 in Cardiff.

**INQUESTS.**—During last quarter 6981 inquest cases were registered, being 5·2 per cent. of the total deaths. The average proportion in the ten preceding corresponding quarters was 5·3. In the twenty-eight large towns the proportion of inquests to deaths was 5·5 per cent.; it ranged from 2·3 in Preston, 2·8 in Blackburn, and 3·4 in Sheffield, to 7·6 in Bristol, 7·9 in Birkenhead, and 8·1 in Cardiff.

**DEATHS IN PUBLIC INSTITUTIONS.**—The deaths registered in workhouses, hospitals, and public lunatic asylums numbered 12,462, or 9·3 per cent. of the total deaths; this proportion was 0·3 per cent. in excess of the mean per-centage in the third quarter of the ten years 1874–83. In the corresponding periods of 1882 and 1883 the proportions of deaths in public institutions were 9·5 and 10·4 respectively. In the twenty-eight great towns 6769, or 13·6 per cent., of the deaths last quarter were recorded in the principal public institutions, against 15·4 per cent. in the third quarter of 1883; the proportions of institution deaths in these towns ranged from 4·7 in Bolton, 5·7 in Norwich, and 6·0 in Leicester, to 17·2 in Bristol, 18·5 in Manchester, and 18·7 in London. Excluding the twenty-eight great towns, the proportion of such deaths in the rest of England and Wales did not exceed 6·7 per cent.

#### HEALTH OF FOREIGN AND COLONIAL CITIES.

A summary of the Weekly Returns with which the Registrar-General is favoured by various local authorities abroad, shows that the average annual death-rate during the quarter ending September last in thirty Colonial and Foreign cities, having an aggregate population of more than fifteen millions of persons, was 27·4 per 1000. In the twenty-three European cities the average rate was 27·3 per 1000, against 22·8 in twenty-eight of the largest English towns. Among the thirty Colonial and Foreign cities the lowest death-rates were 21·4 in Christiania, 21·8 in Calcutta, 22·0 in Baltimore, and 22·5 in Geneva; in the other towns the rates ranged upwards to 30·3 in New York, 32·6 in Munich, 33·7 in Madrid, 33·9 in Berlin, 37·4 in Breslau, and 41·2 in Madras. The rate of mortality in Paris was equal to 23·9, and showed a further decline from that recorded in the two preceding quarters; the deaths referred to small-pox, measles, whooping-cough, typhoid fever, and diphtheria and croup were fewer than in the previous quarter. The fatal cases of small-pox in Brussels, which had been 113 and 163 in the first two quarters of the year, declined last quarter to 48; the deaths referred to this disease in Prague, which had been 523 and 364 in the two

previous quarters, fell to 67 during the three months ending September last. Small-pox was also somewhat prevalent during the quarter in Madras, Turin, and Lisbon. Measles caused 277 deaths in Paris, 253 in Madrid, and 218 in New York. Scarlet fever caused 128 deaths in Amsterdam during the quarter, and diphtheria and croup were fatally prevalent in Paris, St. Petersburg, Berlin, Madrid, New York, and Philadelphia, and Baltimore. The deaths referred to typhoid fever in Paris, which had been 406 and 472 in the two preceding quarters, were 454 during the three months under notice, and were equal to an annual rate of 0·81 per 1000, while the rate of mortality from this disease in London last quarter did not exceed 0·29 per 1000. Diarrhœal diseases showed excessive fatality in most of the continental and American cities; the annual death-rate from these diseases, which averaged 3·9 per 1000 in the twenty-eight large English towns, was last quarter equal to 7·8 in New York, 8·6 in Munich, 8·7 in Brooklyn, 8·9 in Breslau, and 12·3 in Berlin.

---

## PRELIMINARY TABLES.

TABLE I.—Marriages, Births, and Deaths registered in England and Wales in the Years 1874-84, and in each Quarter of those Years.

\* Furnished by the Chief Cashier of the Bank of England.

† As published by the Comptroller of Corn Returns to the Board of Trade.

‡ These are the average prices at which the best seaborne Newcastle, Sunderland, and Hartlepool coals are put in barge from the collier in the Thames; the difference between these prices and those charged to the consumer represents the cost of distribution and merchant's profit. These figures are derived from returns with which the Registrar-General has been favoured by Mr. Richard Meade of the Mineral Statistics Department, Home Office.

The Deaths registered in the Quarter include

Swansea - - - - M -	89,973	853	387	37.6	17.1	2.34	135	Llangafelach, Swansea, and Llan samlet Sub-districts.	

Note.—The letter M or P affixed to the name of each Town denotes whether the limits, which the district or sub-districts named in the column approximately represent, are Municipal or Parliamentary. Imp. D. signifies an Improvement District, and L. G. D. a Local Government District.

The rates of mortality for these towns have been corrected by the exclusion of a proportional number of deaths occurring in County Asylums and Lunatic Asylums, situate within the districts or sub-districts here taken as representing the towns, or by the exclusion of a proportion of the deaths in Union Workhouses in cases where only a portion of the Union is embraced by the area taken, or where Workhouse is situate outside that area.

The rate of increase of population in Barrow-in-Furness and in Ystradgynodwg was so abnormally large between 1871 and 1881 as to preclude probability of the rate being maintained between 1881 and 1891. The present population of these towns has therefore been estimated from the returns of inhabited houses with which the Registrar-General has been favoured by the local authorities.

TABLE VIII.—**Annual Death-rate** per 1,000 living from **Diarrhoea** in **ENGLAND**, and in 78 LARGE TOWNS during the Third or Summer Quarter of each of the Years 1882, 1883, and 1884.

*Note.*—In estimating the population of these Districts, upon which the birth and death-rates have been calculated, it has been assumed that the rate of increase in Greater London since 1881 has been the same as that which prevailed between 1881 and 1881; the estimate for the Outer Ring is obtained by the deduction of the estimated population of Inner London from that of Greater London. The estimates for the suburban districts have been adjusted to cast to the estimated total of the population of the Outer Ring, obtained in the manner above described. In calculating the rates of mortality, a proportion of the deaths recorded in the three Middlesex County Lunatic Asylums, situated in the Districts of Epsom, Uxbridge, and Barnet, has been excluded as belonging to the Middlesex portion of Registration or Inner London, and the remainder distributed among the Middlesex Districts of the Outer Ring.

TABLE XIII.—Births and Deaths in the Third Quarter of 1884, in 30 Foreign Cities, having an estimated aggregate Population of 15,163,338 persons.

<sup>a</sup> The Registration or Union Counties consist of groups of Superintendent Registrars' Districts, which are generally co-extensive with Poor Law Unions. Those Districts which extend into two or more Counties (proper) are included entirely in that County in which the prime town of the district, or the greater part of the population, is located. The boundaries of Registration or Union Counties therefore differ more or less from the boundaries of Counties (proper).

<sup>b</sup> The averages of Marriages and Births are given only for the Eleven Divisions and for Registration Counties.

<sup>c</sup> See page 14, note.

NOTE.—The Registrars alone must be considered responsible for the accuracy of the figures shown in their Returns, and for the opinions expressed in the foot notes.

REGISTRATION COUNTIES, and SUPERINTENDENT REGISTRARS' DISTRICTS of ENGLAND. <sup>a</sup> The Registration Sub-districts (2149 in number) are sub-divisions of the Superintendent Registrars' Districts in which the Births and Deaths are registered by Registrars severally appointed for that purpose. The letter *W* denotes that the Sub-district contains within its limits a Workhouse belonging to the District or Union; *w* indicates that a Workhouse Establishment receiving inmates from other Districts than the one in which it stands is included; *H* indicates Hospital or Infirmary; and *L* Lunatic Asylum.

<sup>b</sup> For London, the numbers of Births and Deaths, as well as the details given under "Infants under 1 year of age" and the twelve subsequent headings in this Table, are derived from the Weekly Returns made by the Registrars, and relate to 13 weeks ending 27th September 1884.

a 618 : 3.—Of the 10 deaths from scarlet fever, 8 occurred in Wrexham Urban Sanitary District.

b 622 : 2.—The deaths from scarlet fever and diphtheria occurred in two houses at Pontcysyllte in the parish of Llangollen.

c 625 : 2.—The 7 deaths from scarlet fever occurred in Festiniog Urban Sanitary District.

d 625 : 3.—The 3 deaths from measles and 4 from scarlet fever occurred in Ynys-cynhaearn Urban Sanitary District.

# METEOROLOGY OF ENGLAND.

REMARKS ON THE WEATHER DURING THE QUARTER ENDING SEPT. 30TH, 1884.

By JAMES GLAISHER, Esq., F.R.S., &c.

The weather in July was warm at the beginning, but cold from the 11th day till near the end of the month, the barometer readings were generally low from the 4th to the 24th, and rain fell frequently between these days; the three preceding months having been dry, the rain was welcome as all the green crops needed it; it exceeded its average for the month at most places, and somewhat retarded the gathering in of hay, and at the end of the month some grass remained uncut.

The weather in August was generally fine and hot, the temperature rose above 90° on different days at different places (see table below); the readings of the barometer were generally above their averages till towards the end of the month, and there was but little rain. The weather was very favourable for harvest work, and the grain crops were gathered in good condition.

The weather in September was generally fine, the temperature low during the first week and high afterwards, particularly about the middle of the month. The reading of the barometer was low during the first week, and generally above its average from the 8th day. The rainfall was small, and the month was favourable for completing the harvest.

About London the mean daily temperature of the air was above its average by 5°·2 till the 10th day of July, excepting the 6th, which was slightly below; from the 11th a cold period set in and continued till the 29th, the mean daily deficiency being 1°·4; for four days the mean excess was 4°·5 daily, then for three days the temperature was slightly below its average; from August 6th to the 24th the mean daily excess was 5°·9, the 8th day being as much as 10°·4, and the 11th 13°·5 above their average values; from August 25th to September 8th the temperature was cold, the mean daily deficiency of these 15 days being 2°·2, and from September 9th to the end of the quarter the mean average excess was 4°·6 daily.

Table showing the MAXIMUM TEMPERATURES at the several Stations on different days between August 1st and the 25th 1884.

On looking over this table, and also the general tables, it will be seen how great the differences of maximum daily temperatures have been at the different places on the same day; on the 1st the temperature exceeded 85°·0 at Cambridge, whilst at Lowestoft it reached 67°·5, and at Liverpool 69°·1 only; on the 2nd the extremes were at Royal Observatory 85°·3, at Stonyhurst 66°·1; on the 3rd there were many places between Osborne and Wolverhampton with readings of 70°·0 or higher, the highest was 81°·2 at Royston; on this day at Llandudno the highest reading was 62°·5; on the 4th there were several stations between Salisbury and Nottingham with readings exceeding 73°·0, the highest was 76°·0 at Whitechurch, whilst at Bolton the highest reading was 62°·2; on the 5th temperatures exceeding 74°·0 took place at many stations between Truro and Halifax, the highest being 80°·4 at Cambridge, on this day the

maximum temperature at Liverpool was  $62^{\circ} \cdot 9$ ; on the 6th the extremes were  $83^{\circ} \cdot 2$  at Cardington and  $67^{\circ} \cdot 0$  at Liverpool; on the 7th the extremes were  $91^{\circ} \cdot 2$  at Osborne and  $72^{\circ} \cdot 7$  at Torquay; on the 8th temperatures exceeding  $89^{\circ} \cdot 0$  were recorded at several stations between Salisbury and Leicester, the highest was  $93^{\circ} \cdot 6$  at Cardington, whilst at Lowestoft the highest was  $70^{\circ} \cdot 8$ ; on the 9th the extremes were  $92^{\circ} \cdot 2$  at Royston and  $73^{\circ} \cdot 0$  at Torquay and Somerleyton; on the 10th the extremes were  $89^{\circ} \cdot 9$  at Royston and  $71^{\circ} \cdot 0$  at Liverpool. The most remarkable day is the 11th, the highest temperature was  $94^{\circ} \cdot 2$  at Greenwich, several stations were above  $90^{\circ}$ , and many between  $85^{\circ}$  and  $90^{\circ}$ , on this day at Torquay the highest temperature was  $70^{\circ} \cdot 7$ . On the 12th extremes were  $90^{\circ} \cdot 2$  at Royston and  $67^{\circ} \cdot 7$  at Burslem; on the 13th the extremes were  $85^{\circ} \cdot 6$  at Whitechurch and  $69^{\circ} \cdot 6$  at Wolverhampton; on the 14th the highest was  $81^{\circ} \cdot 0$  at Carlisle, at Llandudno the highest was  $65^{\circ} \cdot 2$ ; on the 15th the highest was  $81^{\circ} \cdot 0$  at Carlisle, and at Liverpool  $65^{\circ} \cdot 1$ . (Continued on the sixth line from the bottom of the page.)

NOTE.—In reading this table it will be borne in mind that the sign (+) signifies above the average, and the minus sign (−) signifies below the average.

Average duration of the different directions of the wind referred to eight points of the compass, and duration of each direction in each month in the quarter, were as follows:—

Direction of Wind.	JULY.			AUGUST.			SEPTEMBER.		
	1884.	Average.	Departure from Average.	1884.	Average.	Departure from Average.	1884.	Average.	Departure from Average.
	d.	d.	d.	d.	d.	d.	d.	d.	d.
N.W.	$7\frac{1}{2}$	$2\frac{1}{2}$	$+4\frac{1}{2}$	$10\frac{1}{2}$	$2\frac{1}{2}$	$+8\frac{1}{2}$	$6$	$2$	$+4$
N.	$3\frac{1}{2}$	$3\frac{1}{2}$	$0$	$0$	$3\frac{1}{2}$	$-3\frac{1}{2}$	$1$	$4\frac{1}{2}$	$-3\frac{1}{2}$
N.E.	$3\frac{1}{2}$	$3\frac{1}{2}$	$0$	$3\frac{1}{2}$	$3\frac{1}{2}$	$0$	$1\frac{1}{2}$	$5\frac{1}{2}$	$-4$
E.	$3\frac{1}{2}$	$1\frac{1}{2}$	$+2$	$3\frac{1}{2}$	$1\frac{1}{2}$	$+2$	$9\frac{1}{2}$	$2\frac{1}{2}$	$+7$

S.	$6$	$1\frac{1}{2}$	$+4\frac{1}{2}$	$3\frac{1}{2}$	$3\frac{1}{2}$	$0$	$8\frac{1}{2}$	$8$	$0$
S.W.	$3\frac{1}{2}$	$11$	$-7\frac{1}{2}$	$4\frac{1}{2}$	$10\frac{1}{2}$	$-6\frac{1}{2}$	$2\frac{1}{2}$	$3$	$-1$
W.	$8\frac{1}{2}$	$4\frac{1}{2}$	$+4$	$4\frac{1}{2}$	$4\frac{1}{2}$	$0$	$2\frac{1}{2}$	$3$	$-1$

The plus sign (+) denotes excesses over averages; the largest numbers affected with this sign in the month of July are opposite to N.W. and W.; in August to N.W. and S.E.; and in September to E. and N.W.

The minus sign (−) denotes deficiencies below averages. In July the largest numbers are opposite to S.W. and N.; in August to S.W. and N.; and in September to N.E. and N.

On the 16th the extremes were  $83^{\circ} \cdot 1$  at Greenwich,  $81^{\circ} \cdot 9$  at Cambridge,  $81^{\circ} \cdot 0$  at Blackheath; while at Silloth the highest temperature reached was  $66^{\circ} \cdot 6$ , at Torquay  $67^{\circ} \cdot 3$ , at Bradford  $70^{\circ} \cdot 4$ ; on the 17th the extremes were  $87^{\circ} \cdot 1$  at Greenwich,  $85^{\circ} \cdot 1$  at Osborne,  $85^{\circ} \cdot 0$  at Cambridge, at Lancaster  $70^{\circ} \cdot 0$ , at Llandudno  $71^{\circ} \cdot 0$ , at Bath  $71^{\circ} \cdot 8$ ; on the 18th the highest were  $84^{\circ} \cdot 5$  at Cambridge,  $84^{\circ} \cdot 4$  at Royston,  $84^{\circ} \cdot 2$  at Greenwich; on the 19th the extremes were  $81^{\circ} \cdot 2$  at Royston, and  $63^{\circ} \cdot 0$  at Halifax; on the 20th the highest temperature reached  $81^{\circ} \cdot 1$  at Osborne,

the highest at Liverpool was  $64^{\circ}3$ ; on the 21st the highest was  $83^{\circ}6$  at Osborne, whilst at Plymouth the highest was  $69^{\circ}1$ ; on the 22nd the highest was  $85^{\circ}0$  at Cardington, whilst at Llandudno the highest was  $68^{\circ}$ ; on the 23rd the extremes were  $85^{\circ}5$  at Leicester, and  $79^{\circ}9$  at Torquay; on the 24th the extremes were at Cardington  $88^{\circ}6$ , and at Torquay  $71^{\circ}7$ ; on the 25th the highest temperature reached was  $87^{\circ}3$  at Royston, but the highest at Barnstaple reached only  $61^{\circ}0$ . After this day there was a great fall in the temperature.

The mean temperature of the air for July was  $63^{\circ}4$ , being  $1^{\circ}7$  and  $1^{\circ}5$  above the average of 113 years and 43 years respectively; it was  $3^{\circ}5$  higher than in 1883,  $3^{\circ}0$  higher than in 1882, and  $2^{\circ}0$  lower than in 1881. Back to 1771 there have been nine Julys as warm or warmer than  $63^{\circ}4$ .

The mean temperature of the air for August was  $65^{\circ}3$ , being  $4^{\circ}4$  and  $3^{\circ}9$  above the averages of 113 years and 43 years respectively; it was  $3^{\circ}4$  higher than in 1883,  $5^{\circ}7$  higher than in 1882, and  $6^{\circ}2$  higher than in 1881. Back to the year 1771 there have been but three Augusts whose mean temperature exceeded  $65^{\circ}3$ ; the instances were: 1780, when it was  $65^{\circ}7$ ; 1842, when it was  $65^{\circ}4$ ; and 1857, when it was  $65^{\circ}8$ .

The mean temperature of the air for September was  $59^{\circ}3$ , being  $2^{\circ}8$  and  $2^{\circ}2$  above the averages of 113 years and 43 years respectively; it was  $2^{\circ}5$  higher than in 1883,  $5^{\circ}0$  higher than in 1882, and  $3^{\circ}9$  higher than in 1881. Back to the year 1771 there have been 18 Septembers whose mean temperature was equal to or exceeded  $59^{\circ}3$ ; they were in the years 1779, 1780, 1795, 1804, 1805, 1810, 1815, 1818, 1821, 1823, 1843, 1846, 1857, 1858, 1865, 1868, 1875, and 1880.

The mean temperature for the quarter was  $62^{\circ}7$ , being  $3^{\circ}0$  and  $2^{\circ}5$  above the averages of 113 years and 43 years respectively. Back to the year 1771 there have been 6 instances in which the mean temperature of the quarter ending with September has been of the same or of higher temperature than in this year; the instances were: 1779, when it was  $63^{\circ}2$ ; 1780, when it was  $62^{\circ}7$ ; 1818, when it was  $63^{\circ}5$ ; 1857, when it was  $63^{\circ}3$ ; 1859, when it was  $62^{\circ}8$ ; 1868, when it was  $63^{\circ}9$ .

The mean high day temperature of the air in July was  $75^{\circ}3$ , being  $1^{\circ}2$  above the average of 43 years, in August it was  $78^{\circ}7$ , being  $5^{\circ}8$  above the average, and in September it was  $69^{\circ}2$ , being  $1^{\circ}8$  above the average.

The mean low night temperature of the air in July was  $53^{\circ}5$ , being  $0^{\circ}4$  above the average of 43 years; in August it was  $53^{\circ}6$ , being  $0^{\circ}4$  above the average, and in September it was  $51^{\circ}3$ , being  $2^{\circ}2$  above the average.

The mean daily range of temperature in July was  $21^{\circ}8$ , being  $0^{\circ}8$  higher than the average; in August it was  $25^{\circ}1$ , being  $5^{\circ}4$  higher than the average, and in September it was  $17^{\circ}9$ , being  $0^{\circ}4$  lower than the average.

The mean temperature of the air for July was  $5^{\circ}4$  higher than in June, in August it was  $1^{\circ}9$  higher than in July, and in September it was  $6^{\circ}0$  lower than in August.

(From the preceding 43 years' observations the increase of temperature from June to July is  $3^{\circ}2$ , the decrease from July to August is  $0^{\circ}7$ , and the decrease from August to September is  $4^{\circ}0$ .)

From June to July there was an increase of temperature at stations south of  $51^{\circ}$  of  $3^{\circ}2$ , between  $51^{\circ}$  and  $52^{\circ}$  of  $4^{\circ}1$ , between  $52^{\circ}$  and  $53^{\circ}$  of  $5^{\circ}4$ , between  $53^{\circ}$  and  $54^{\circ}$  of  $4^{\circ}2$ ; and north of  $54^{\circ}$  of  $2^{\circ}9$ .

From July to August there was an increase of temperature at stations south of  $51^{\circ}$  of  $2^{\circ}6$ , between  $51^{\circ}$  and  $52^{\circ}$  of  $1^{\circ}4$ , between  $52^{\circ}$  and  $53^{\circ}$  of  $1^{\circ}4$ , between  $53^{\circ}$  and  $54^{\circ}$  of  $1^{\circ}6$ , and north of  $54^{\circ}$  of  $1^{\circ}3$ .

From August to September there was a decrease of temperature at stations south of  $51^{\circ}$  of  $3^{\circ}6$ , between  $51^{\circ}$  and  $52^{\circ}$  of  $4^{\circ}3$ , between  $52^{\circ}$  and  $53^{\circ}$  of  $4^{\circ}7$ , between  $53^{\circ}$  and  $54^{\circ}$  of  $4^{\circ}6$ , and north of  $54^{\circ}$  of  $4^{\circ}4$ .

The mean reading of the barometer for the month of July at the height of 160 feet above the level of the sea was  $29.780$  ins., being  $0.014$  in. below the average of 43 years,  $0.092$  in. higher than in 1883;  $0.080$  in. higher than in 1882, and  $0.045$  in. lower than in 1881.

The mean reading of the barometer for the month of August was  $29.835$  ins., being  $0.053$  in. higher than the average of 43 years;  $0.006$  in. lower than in 1883,  $0.095$  in. lower than in 1882,  $0.159$  in. higher than in 1881.

The mean reading of the barometer for the month of September was  $29.835$  ins., being  $0.036$  in. higher than the average of 43 years,  $0.187$  in. higher than in 1883,  $0.148$  in. higher than in 1882,  $0.034$  in. higher than in 1881.

From June to July there was a decrease of pressure at stations south of  $51^{\circ}$  of  $0.079$  in.; between  $51^{\circ}$  and  $52^{\circ}$  of  $0.089$  in., between  $52^{\circ}$  and  $53^{\circ}$  of  $0.106$  in., between  $53^{\circ}$  and  $54^{\circ}$  of  $0.139$  in., and north of  $54^{\circ}$  of  $0.150$  in.

From July to August there was an increase of pressure at stations south of  $51^{\circ}$  of  $0.049$  in., between  $51^{\circ}$  and  $52^{\circ}$  of  $0.054$  in., between  $52^{\circ}$  and  $53^{\circ}$  of  $0.079$  in., between  $53^{\circ}$  and  $54^{\circ}$  of  $0.076$  in., and north of  $54^{\circ}$  of  $0.078$  in.

From August to September there was an increase of pressure at stations south of  $51^{\circ}$  of  $0.003$  in., between  $51^{\circ}$  and  $52^{\circ}$  of  $0.009$  in., between  $52^{\circ}$  and  $53^{\circ}$  of  $0.003$  in., between  $53^{\circ}$  and  $54^{\circ}$  of  $0.010$  in., and north of  $54^{\circ}$  a decrease of  $0.022$  in.

About London the barometric pressure was a little above its average in July for the first three days; from the 4th to the 17th it was below, the average daily deficiency being  $0.12$  in.; from the 18th to the 20th the pressure was  $0.13$  in. in excess of the daily average; from the 21st to the 24th it was slightly deficient. From July 25th to August 17th the excess daily was  $0.13$  in., the 18th and 19th days were below; from the 20th to the 26th the excess over the average was  $0.11$  in. daily. From August 27th to September 7th the mean deficiency equalled  $0.34$  in. (September 4th being as much as six-tenths below its average), and from September 8th to the end of the quarter the daily excess of atmospheric pressure was  $0.14$  in.

## MONTHLY METEOROLOGICAL TABLE FOR THE QUARTER ENDING SEPTEMBER 30TH, 1884.

The Observations have been reduced to Mean values by Glaisher's Barometrical and Diurnal Range Tables, and the Hygrometrical results have been deduced from the sixth edition of his Hygrometrical Tables.

Year.	1884.	Month.	Pressure in Atmosphere in Month.		Temperature of Air in Month.			Mean Temperature.		Wind.	Mean Amount of Cloud.	Rain.

*Thunderstorms occurred* in July on the 4th at Marlborough, Cardington, Cambridge, Hull, and Bradford; on the 5th at Royston, Cambridge, and Hull; on the 6th at Royston, Cambridge, Cambridge, Halifax, and Bradford; on the 8th at Gueney, Ventnor, Wolverhampton, Bressingham, Bolton, Halifax, Hull, and Bradford; on the 9th at Royston, Cardington, Cambridge, Lowestoft, Somerton, Burslem, Bolton, Halifax, Hull, and Bradford; on the 10th at Barmet and Bradford; on the 11th at Ventnor, Burslem, Bolton, Hull, and Bradford; on the 12th at Barmet and Bradford; on the 13th at Royston, Cardington, Cambridge, Lowestoft, Hull, and Bradford; on the 14th at Royston, Lowestoft, and Somerton; on the 15th at Bolton and Bradford; on the 16th at Marlborough, Barmet, Oxford, Royston, Cardington, Cambridge, Lowestoft, Hull, and Bradford; on the 17th at Ventnor, Royston, Cardington, and Hull; on the 18th at Ventnor, Royston, Cardington, and Hull; on the 19th at Ventnor, Royston, Cardington, and Hull; on the 20th at Ventnor, Royston, Cardington, and Hull; on the 21st at Ventnor, Royston, Cardington, and Hull; on the 22nd at Ventnor, Royston, Cardington, and Hull; on the 23rd at Ventnor, Royston, Cardington, and Hull; on the 24th at Ventnor, Royston, Cardington, and Hull; on the 25th at Ventnor, Royston, Cardington, and Hull; on the 26th at Ventnor, Royston, Cardington, and Hull; on the 27th at Ventnor, Royston, Cardington, and Hull; on the 28th at Ventnor, Royston, Cardington, and Hull; on the 29th at Ventnor, Royston, Cardington, and Hull; on the 30th at Ventnor, Royston, Cardington, and Hull.

In August, on the 8th at Carlisle; on the 9th at Guernsey, Royston, Cardington, Rugby, Halifax, Hull, and Carlisle; on the 10th at Guernsey, Turro, Torquay, Lindhurst and Longwester; on the 11th at Hull and Carlisle; on the 12th at Guernsey, Turro, Torquay, Lindhurst and Longwester; on the 13th at Hull and Carlisle; on the 14th at Osborne, Whitechurch, Oxford, Cambridge, and Somerleyton; on the 15th at Barnet; on the 16th at Royston, Cardington, Oxford, Cambridge; on the 17th at Guernsey, Toynes, Torquay, and Vouthor; on the 18th at Guernsey and Torquay; on the 19th at Guernsey, Toynes, Torquay, and Vouthor; on the 20th at Bolton, Hull, Carlisle, and Silloth. In September, on the 1st at Stonyhurst; on the 2nd at Bolton, Hull, Carlisle, and Silloth; on the 3rd at Bradford; on the 4th at Bradford; on the 5th at Somerleyton; on the 6th at Plymouth, Burslem, Halifax, Hull, Bradford, and Silloth.

*Thunder was heard but lightning was not seen* in July on 17 days; in August on 9 days; and in September on 7 days.

*Lightning was seen but thunder was not heard* in July on 8 days; in August on 9 days; and in September on 8 days.

*Solar halos were seen in July, on the 9th at Oxford; on the 14th at Oxford and Halifax; and on the 28th at Oxford.*

In August, on the 14th at Halifax; on the 17th and 26th at Torquay; on the 25th at Torquay and Oxford; and on the 28th at Oxford.

In September, on the 3rd at Torquay and Oxford; on the 4th, 5th, and 13th at Halifax; on the 14th and 16th at Oxford and Halifax; on the 23rd and 24th at Halifax; on the 25th at Torquay; on the 27th at Halifax; on the 29th at Torquay, Oxford, and Halifax, and on the 30th at Halifax.

*Lunar halos were seen in August, on the 2nd at Oxford; on the 5th at Bolton; on the 8th at Marlborough; on the 16th at Torquay; on the 24th, 26th, and 26th at Ventim.*

*Haist* fell in July, on the 4th at Cambridge; on the 6th at Bradford; on the 9th at Royston; on the 19th at Barnet; on the 24th at Marlborough, Barnet, and Oxford; on the 25th at Whitchurch. In August, on the 12th at Lowestoft.

*hog* prevailed in July, on the 1st at Guernsey; on the 2nd at Hull; on the 3rd and 4th at Lowestoft; on the 20th and 21st at Guernsey; on the 22nd at Guernsey and Lowestoft; on the 26th at Cambridge.

In August, on the 5th and 6th at Cambridge; on the 7th at Cardington and Cambridge; on the 8th at Guernsey and Bolton; on the 11th at Guernsey, Totton, and Torquay; on the 13th and 18th at Guernsey; on the 10th at Bolton; on the 20th at Bath; on the 23rd at Cardington and Cambridge.

## INDEX OF SUPERINTENDENT REGISTRARS' DISTRICTS.

The following Index furnishes a reference to the *Number\** of each SUPERINTENDENT REGISTRAR'S DISTRICT. In forming the alphabetical arrangement, the principle adopted has been to place compound names in the order in which they are pronounced.

Aberystwyth, 604.  
Abergavenny, 582.  
Aberystwith, 605.  
Abingdon, 115.  
Alcester, 397.  
Alderbury (Salisbury), 254.  
Alnwick, 563.  
Alresford, 105.  
Alston, 568.  
Alton, 106.  
Altrincham, 445.  
Alverstoke, 89.  
Amersham, 140.  
Amesbury, 253.  
Amphill, 173.  
Andover, 110.  
Anglesey, 630.  
Ashborne, 438.  
Ashby-de-la-Zouch, 406.  
Ashton-under-Lyne, 468.  
Aston, 387.  
Atcham (Shrewsbury), 351.  
Atherstone, 389.  
Auckland, 545.  
Axbridge, 316.  
Axminster, 269.  
Aylesbury, 143.  
Aylsham, 223.  
Aysgarth, 539.

Bakewell, 440.  
Bala, 623.  
Banbury, 155.  
Bangor, 628.  
Barnet, 128.  
Barnesley, 508.  
Barnstaple, 285.  
Barrow-in-Furness, 492.  
Barrow-upon-Soar, 408.  
Barton Regis, 321.  
Barton-upon-Irwell, 463.  
Basford, 430.  
Basingstoke, 108.  
Bath, 317.  
Battle, 69.  
Beaminster, 267.  
Bedale, 537.  
Bedford, 171.  
Bedminster, 319.  
Bedwelty, 683.  
Belford, 564.  
Bellingham, 561.  
Belper, 437.  
Berkhampstead, 139.  
Bewick, 565.  
Bethnal Green, 16.  
Beverly, 519.  
Bicester, 151.  
Biggleswade, 172.  
Billericay, 191.  
Billiesden, 402.  
Bingham, 434.  
Birkenhead, 452.  
Birmingham, 386.  
Bishop Stortford, 131.  
Blaby, 403.  
Blackburn, 474.  
Blandford, 250.

Blean, 58.  
Blofield, 228.  
Blything, 216.  
Bodmin, 294.  
Bolton, 461.  
Bootle, 576.  
Bozmere, 211.  
Boston, 417.  
Bourn, 414.  
Brackley, 156.  
Bradfield, 118.  
Bradford-on-Avon, 249.  
Bradford (Yorks), 497.  
Braintree, 199.  
Bramley, 500.  
Brampton, 570.  
Brecknock, 608.  
Brentford, 126.  
Bridge, 56.  
Bridgend, 589.  
Bridgnorth, 348.  
Bridgewater, 307.  
Bridlington, 625.  
Bridport, 268.  
Brighton, 77.  
Bristol, 320.  
Brixworth, 162.  
Bromley, 41.  
Bromsgrove, 384.  
Bromyard, 341.  
Buckingham, 146.  
Buith, 607.  
Burnley, 472.  
Burton-upon-Trent, 367.  
Bury, 462.  
Bury St. Edmunds, 206.

Blairstown, 424.  
Calne, 245.  
Camberwell, 26.  
Cambridge, 179.  
Camelford, 290.  
Canmock, 370.  
Canterbury, 57.  
Cardiff, 586.  
Cardigan, 601.  
Carlisle, 572.  
Carmarthen, 597.  
Carnarvon, 627.  
Castle Ward, 558.  
Catherington, 108.  
Caxton, 177.  
Chapel-en-le-Grith, 441.  
Chard, 309.  
Cheadle, 365.  
Chelmsford, 192.  
Chelsea, 3.  
Cheltenham, 385.  
Chepstow, 580.  
Chertsey, 31.  
Chester, 450.  
Chesterfield, 439.  
Chester-le-Street, 552.  
Chesterton, 178.  
Chichester, 84.  
Chippenham, 244.  
Chipping Norton, 154.  
Chipping Sodbury, 322.  
Chorley, 475.

Chorlton, 464.  
Christchurch, 98.  
Church Stretton, 346.  
 Cirencester, 331.  
Cleobury Mortimer, 347.  
Clitheroe, 473.  
Clun, 345.  
Clutton, 316.  
Cockermouth, 574.  
Colchester, 195.  
Congleton, 449.  
Conway, 628.  
Cookham, 121.  
Corwen, 622.  
Cosford, 204.  
Coventry, 392.  
Cranbrook, 52.  
Crediton, 282.  
Crickhowell, 609.  
Cricklade, 242.  
Croydon, 88.  
Cuckfield, 75.

Darlington, 542.  
Dartford, 42.  
Daventry, 161.  
Depwade, 230.  
Derby, 436.  
Derizes, 247.  
Dewsbury, 502.  
Docking, 235.  
Dolgelly, 624.  
Doncaster, 511.  
Dorchester, 265.  
Dorking, 35.  
Dover, 64.  
Downham, 238.  
Driffield, 524.  
Droitwich, 383.  
Droxford, 102.  
Dudley, 374.  
Dulverton, 304.  
Dumfries, 200.  
Durham, 549.  
Dursley, 324.

Easington, 550.  
Easingwold, 528.  
East Ashford, 55.  
Eastbourne, 70.  
East Grinstead, 74.  
Easthamstead, 122.  
East Preston (Worthing), 82.  
East Retford, 427.  
Eastry, 63.  
East Stonehouse, 278.  
East Weymouth, 508.  
Edmonton, 129.  
Elham, 65.  
Ellismere, 853.  
Ely, 132.  
Epping, 137.  
Epsom, 80.  
Erpingham, 222.  
Eton, 141.

Evesham, 381.  
Exeter, 272.

Falmouth, 298.  
Fareham, 90.  
Faringdon, 114.  
Farnham, 33.  
Faversham, 59.  
Festiniog, 625.  
Flegg, 220.  
Foleshill, 391.  
Forden (Montgomery), 615.  
Fordingbridge, 95.  
Forehoe, 236.  
Freebridge Lynn, 236.  
Frome, 312.  
Fulham, 2.  
Fylde, 477.

Gainsborough, 426.  
Garstang, 478.  
Gateshead, 555.  
Glaford Brig, 425.  
Glendale, 568.  
Gloucester, 327.  
Godstone, 37.  
Goole, 513.  
Gower, 593.  
Grantham, 419.  
Gravesend, 43.  
Great Ouseburn, 488.  
Greenwich, 27.  
Guildford, 39.  
Guilberton, 231.  
Guisbrough, 533.

Hackney, 10.  
Hailsham, 71.  
Hallifax, 496.  
Halstead, 198.  
Haltwhistle, 560.  
Hambleton, 34.  
Hampstead, 7.

# QUARTERLY RETURN

OF

## MARRIAGES, BIRTHS, AND DEATHS

REGISTERED IN THE DIVISIONS, COUNTIES, AND DISTRICTS OF

### ENGLAND;

WITH CERTAIN DETAILED INFORMATION RELATING TO THE DEATHS IN EACH  
REGISTRATION SUB-DISTRICT.

By Authority of the Registrar General.

PUBLISHED BY EYRE AND SPOTTISWOODE, 9, EAST HARDING ST., FETTER LANE, E.C.

No. 144.] **Marriages**—*July, August, September, 1884.*  
**Births and Deaths**—*October, November, December, 1884.* [Price 9d.

*General Register Office, Somerset House,  
31st January, 1885.*

The POPULATION of the UNITED KINGDOM in the middle of 1884 is estimated at 35,951,865 persons; that of England and Wales at 27,132,449, of Scotland at 3,866,521, and of Ireland at 4,952,895.

In the United Kingdom the *births* of 287,676 children, and the *deaths* of 178,238 persons, were registered in the three months ending 31st December 1884. The recorded natural increase of population was thus 109,438. The registered number of persons married in the quarter ending 30th September 1884 was 121,424.

The birth-rate in the United Kingdom in the fourth quarter of 1884 was 31·7 per 1000, and the death-rate 19·7. The marriage-rate in the third quarter of 1884 was 13·4 per 1000.

The several facts concerning Scotland and Ireland are recorded in the Quarterly Returns of the Registrars-General of those parts of the United Kingdom.

#### ENGLAND.

This Return comprises the BIRTHS and DEATHS registered in the 2149 registration sub-districts of England and Wales during the quarter ending 31st December 1884; and the MARRIAGES in 14,717 churches or chapels, in 9342 registered places of worship unconnected with the Established Church, and in 630 Superintendent Registrars' Offices, in the three months ending 30th September 1884.

#### *Marriages.*

During the three months ending September last, the marriages of 100,550 persons were registered in England and Wales, corresponding to an annual rate of 14·7 per 1000 of the estimated population in the middle of 1884. This rate was 0·6 below the mean rate in the corresponding quarters of the ten years 1874-83. The marriage-rate, which was 16·4 in each of the summer quarters of 1874 and 1875, steadily declined in the succeeding corresponding quarters to 14·1 in 1879; in the summer quarters of 1882 and 1883 the rate recovered to 15·4 and 15·5 respectively. The annual marriage-rate in the third quarter of last year ranged from 6·9 in Rutlandshire, 8·4 in Herefordshire, 9·9 in Westmorland, and 10·6 in North Wales, to 15·3 in Gloucestershire, 16·2 in Monmouthshire, 16·4 in Lancashire, and 18·9 in London.

### *Births.*

The births registered in England and Wales during the three months ending December last were 227,277, corresponding to an annual birth-rate of 33·2 per 1000 of the estimated population. This birth-rate was 0·7 below the mean rate in the ten preceding corresponding quarters, and 1·4 above the rate in the corresponding quarter of 1883. The birth-rate last quarter did not exceed 25·6 in North Wales, 27·3 in Huntingdonshire, 27·5 in Rutlandshire, and 27·6 in Westmorland, whereas it ranged upwards to 36·9 in Staffordshire, 37·4 in Nottinghamshire, 38·3 in Monmouthshire, and 38·4 in Durham.

In the twenty-eight great towns the births registered last quarter corresponded to an annual rate of 34·2 per 1000, which was 1·0 above the general English birth-rate. In London the rate did not exceed 33·3, whereas in the twenty-seven provincial towns it was 34·9, and ranged from 28·6 in Brighton, 29·5 in Bradford, and 30·2 in Plymouth and in Huddersfield, to 38·4 in Nottingham, 39·0 in Preston, 39·7 in Sunderland, and 42·9 in Cardiff. In fifty other large town districts the birth-rate was 34·2, which corresponded exactly with the rate in the great towns; but while the rate did not exceed 22·6 in Hastings, 23·7 in Bath, and 24·0 in Southport, it ranged upwards to 41·5 in Wigan, 42·0 in Dudley, 42·6 in Newport, and 43·8 in Ystradyfodwg.

### *Movement of the Population.*

The *natural* increase of the population of England and Wales, or the excess of births over deaths, which had been 84,400 and 85,977 in the fourth or December quarters of 1882 and 1883, amounted to 90,047 last quarter. It appears from returns issued by the Board of Trade that 50,958 emigrants embarked during last quarter from the various ports of the United Kingdom at which emigration officers are stationed. Distributing 1506 whose nationality was undistinguished, and excluding 8104 foreigners, the emigrants of British origin were 42,854, including 30,135 English, 3804 Scotch, and 8915 Irish; in the three preceding corresponding quarters the numbers of British emigrants were 48,587, 47,123, and 52,805 respectively. The proportions of emigrants last quarter to a million of the population in the three divisions of the United Kingdom were 1111 from England, 984 from Scotland, and 1800 from Ireland. Compared with the corresponding quarter of 1883 the proportion of emigration last quarter showed a decline in each of the three divisions of the United Kingdom.

### *Prices and Pauperism.*

The average price of wheat during the three months ending December last was 31s. 7d., and was 4s. 4d. below the average price in the preceding quarter. The mean wholesale prices of beef and of mutton last quarter were 5½d. and 6¾d., per lb. respectively; the mean price of beef was ⅔d. below, and that of mutton was ⅔d. below, the mean prices in the preceding quarter. The average price of the best sea-borne coal in the London market, put in barge from the collier in the Thames, was 15s. 11d. per ton, corresponding with the average price in the preceding quarter, and was 1s. 10d. per ton below that recorded in the fourth quarter of 1883. The mean price of Consols was 100½l. corresponding with that which prevailed in the previous quarter. The minimum annual rate of discount charged at the Bank of England, which had been reduced to 2 per cent. on 19th June last, was raised to 3 per cent. on 9th October, was further raised to 4 per cent. on the 30th October, and to 5 per cent. on the 6th November, at which rate it remained until the end of the quarter; the average rate during the quarter was 4·17 per cent.

The average number of paupers (exclusive of lunatics in asylums, and vagrants) relieved in England and Wales on the last day of each week in the quarter was 700,587, of whom 181,776 received in-door and 518,811 out-door relief. The proportion of the population in receipt of pauper relief during the three months ending December last was 25·8 per 1000, against 27·1 and 26·0 in the two preceding corresponding quarters.

### *Meteorology.*

The remarks upon the Meteorology of the quarter at the Royal Observatory, Greenwich, and at various stations of observation, furnished by Mr. James Glaisher, F.R.S., will be found on pages 65-72, with accompanying Tables. The mean reading of the barometer was 29.854 inches, and was 0.043 inch above the mean reading for the corresponding period of 43 years; the mean reading was above the average in October and November, while that for December was below the average. The mean temperature of the air during the quarter was  $44^{\circ}.1$ , and was  $0^{\circ}.5$  above the average for the corresponding period of 112 years. The weather in October was fine and dry, and during the first half of November it was warm and bright, but cold afterwards; there was a deficiency of South-west winds throughout these two months. From 3rd to 20th December the weather was mild, but from the 21st to the end of the month the temperature was below the average. The mean temperature in October was  $0^{\circ}.6$  below the average of 112 years; whereas in November and December it showed an excess of  $0^{\circ}.1$  and  $1^{\circ}.9$  respectively. At 41 stations of observation the mean temperature during the quarter ranged from  $41^{\circ}.0$  at Halifax, and  $41^{\circ}.4$  at Wolverhampton, to  $47^{\circ}.1$  at Truro,  $47^{\circ}.6$  at Barnstaple, and  $47^{\circ}.8$  at Guernsey.

The amount of rain measured at Greenwich during the quarter was 4.57 inches, and was 2.59 inches below the average amount in the corresponding periods of 68 years. The rainfall was below the average in October and November, but in excess of the average in December. Rain was measured at Greenwich on 12 days in October, 12 in November, and 18 in December, or on 42 of the 92 days in the quarter. The rainfall recorded at 41 stations of observation ranged from 3.72 inches at Nottingham, and 4.06 inches at Cambridge, to 11.93 inches at Barnstaple, and 12.15 inches at Bolton.

The number of hours of bright sunshine recorded during the quarter at the Royal Observatory, Greenwich, was 101.6, against 134.3 and 143.2 in the two preceding corresponding quarters.

### *State of the Public Health; Deaths.*

The deaths registered in England and Wales during the three months ending December last were 137,230, corresponding to an annual rate of 20.1 per 1000 of the estimated population. This death-rate, although 1.0 in excess of the rate in the preceding corresponding quarter of 1883, was 0.5 below the mean rate in the corresponding quarters of the ten years 1874-83. The death-rates in the English counties last quarter ranged from 14.5 in Westmorland, 15.8 in Herefordshire, and 16.2 in the extra-metropolitan portion of Surrey and in Rutlandshire, to 21.6 in Monmouthshire, 21.8 in Nottinghamshire, 22.5 in the East Riding of Yorkshire, and 23.5 in Lancashire.

The 137,230 deaths last quarter included 69,588 of males, and 67,642 of females. The annual death-rate among males was 20.9, and among females 19.3 per 1000 estimated to be living of each sex. In equal numbers living the deaths of males were 108 to 100 deaths of females.

URBAN AND RURAL MORTALITY.—In the registration districts and sub-districts comprising the chief towns (see Table III.) and containing an estimated population of more than sixteen millions of persons, the death-rate was 21.7 per 1000; in the remaining and chiefly rural population of about ten millions and three quarters of persons, the rate was 17.6. These urban and rural rates were respectively 0.9 and 0.2 below the average rates in the ten preceding corresponding quarters. In equal numbers living, the deaths were 123 in the urban to 100 in the rural population, whereas the average proportion in the fourth quarters of the ten years 1874-83 was 127 to 100.

In the twenty-eight great English towns, including London, and having an estimated population of nearly nine millions of persons, the deaths registered corresponded to an annual rate of 21.7 per 1000, which was exactly the same as the general urban rate. In London the death-rate did not exceed 20.2, whereas

it was 22·9 in the twenty-seven provincial towns, among which it ranged from 17·8 in Portsmouth, 19·1 in Brighton, and 19·5 in Birkenhead, to 25·3 in Liverpool, 25·8 in Manchester, 26·5 in Cardiff, and 29·9 in Preston.

In fifty other large town districts, with an aggregate population estimated at about two and three quarter millions, the deaths registered corresponded to an annual rate of 21·2 per 1000, being 0·5 below the rate in the twenty-eight larger towns. The lowest rates among these fifty towns were 12·3 in Barrow-in-Furness, 14·4 in Cambridge, 15·4 in Maidstone, and 15·9 in Hastings; the highest rates were 27·6 in Warrington, 28·9 in Newport, and 33·7 in St. Helen's.

**MORTALITY AT DIFFERENT AGES.**—The 137,230 deaths last quarter included 32,290 of infants under one year of age, 68,152 of children and adults aged between one and 60 years, and 36,788 of persons aged 60 years and upwards.

The rate of infant mortality, measured by the proportion of deaths under one year to registered births, was 142 per 1000; in the ten preceding corresponding quarters the proportion of infant mortality averaged 143 per 1000, and ranged from 129 in 1881 to 154 in 1874. The lowest county rates of infant mortality last quarter were 87 in Dorsetshire and in Herefordshire, 88 in Rutlandshire, and 92 in Wiltshire, while the highest were 165 in the West Riding of Yorkshire, 167 in Nottinghamshire, 168 in Staffordshire, 171 in Leicestershire, and 174 in Lancashire.

In the twenty-eight great towns the proportion of infant mortality was 156 per 1000 births, and exceeded the general English rate by 14. The rate did not exceed 136 in London, but was 172 in the twenty-seven provincial towns, among which it ranged from 107 in Portsmouth, 125 in Brighton, 136 in Plymouth, and 140 in Derby, to 198 in Bradford, 199 in Leicester and in Cardiff, 206 in Preston, and 213 in Bolton. In fifty other large town districts the rate of infant mortality was 158 per 1000 births; while the proportion was but 89 in Cambridge, 97 in Macclesfield, and 104 in Southampton, it ranged upwards to 203 in Stoke-upon-Trent, 218 in Ystradyfodwg, 219 in Accrington, and 240 in Ashton-under-Lyne.

Among persons aged between one and 60 years the annual rate of mortality was 11·1 per 1000, against an average of 11·7 in the ten preceding corresponding quarters. In the twenty-eight great towns the deaths at these ages corresponded to an annual rate of 12·8 per 1000, ranging from 10·0 in Brighton, 10·4 in Portsmouth, and 10·9 in Huddersfield, to 15·7 in Cardiff, 16·1 in Manchester, 16·3 in Liverpool, and 17·5 in Preston.

The deaths among persons aged 60 years and upwards corresponded to an annual rate of 72·9 per 1000, and was 1·6 above the mean rate in the ten preceding fourth quarters of 1874-83. The deaths at this age-period in the twenty-eight towns corresponded to an annual rate of 79·5 per 1000, and exceeded the general English rate by 6·6. In London this rate was 76·0, while it was 82·8 in the twenty-seven provincial towns, ranging from 61·8 in Birkenhead, 68·3 in Plymouth, and 68·5 in Portsmouth, to 101·6 in Preston, 104·5 in Oldham, and 111·0 in Blackburn.

The rate of mortality at all ages was 2·4 per cent. below the mean rate in the ten preceding corresponding quarters. The death-rate of infants showed a decrease of 0·7 per cent., that among children and adults aged between one and 60 years a decrease of 5·1 per cent., while that among persons aged 60 years and upwards exceeded the same average by 2·2 per cent.

**ZYMOTIC DISEASES.**—The 137,230 deaths from all causes included—

3203	attributed to diarrhœa,
2793	„ measles,
2540	„ scarlet fever,
2234	„ fever,
1974	„ whooping-cough,
1475	„ diphtheria,
844	„ small-pox.

Thus the total number of deaths ascribed to these seven causes was 15,063, corresponding to an annual rate of 2.20 per 1000, against an average rate of 2.78 for the ten preceding fourth quarters.

The lowest county rates from these causes were 0.21 in Rutlandshire, 0.78 in Herefordshire, and 0.83 in Westmorland; while the highest were 3.05 in Lancashire, 3.14 in Monmouthshire, and 3.27 in the East Riding. In the twenty-eight great towns the rate was 2.41, ranging from 0.99 in Plymouth and 1.09 in Brighton and in Portsmouth, to 4.00 in Bolton, 5.28 in Preston, and 6.54 in Cardiff. In fifty other considerable towns the rate was 2.68, and higher than in the twenty-eight great towns, while in the remainder of England and Wales it was 1.99.

The deaths from *diarrhœa* numbered 3203, and corresponded to an annual rate of 0.47 per 1000, against an average rate of 0.51 for the ten preceding fourth quarters.

The highest county rates were 0.73 in Staffordshire and the East Riding, 0.74 in Lancashire, and 0.76 in Warwickshire. In the twenty-eight great towns the rate was 0.52, rising, however, to 1.06 in Blackburn, 1.10 in Bolton, and 1.62 in Preston. In fifty other considerable towns the rate was 0.50; while in the remainder of England and Wales it was 0.43.

The deaths from *measles* numbered 2793, and corresponded to an annual rate of 0.41 per 1000, against an average rate of 0.37 for the ten preceding fourth quarters.

The highest county rates were 1.07 in the North Riding, 1.36 in Monmouthshire, and 1.45 in Somersetshire. In the twenty-eight great towns the rate was 0.39, rising, however, to 1.30 in Hull, 1.43 in Leicester, 2.02 in Bolton, and 3.87 in Cardiff. In fifty other considerable towns the rate was 0.88; being, however, 2.46 in Yarmouth, 2.80 in Accrington, 3.27 in Middlesbrough, 4.56 in Bath, 5.86 in Warrington, 7.18 in Newport, and 8.75 in St. Helens. In the remainder of England and Wales the rate was 0.33, but was in considerable excess in the sub-districts of Abingdon, Buntingford, Wheatley, North Curry, Taunton St. Mary Magdalen, Bridgwater, St. Martin, Newton-in-Makerfield, Farnworth, Colne.

The deaths from *scarlet-fever* numbered 2540, and corresponded to an annual rate of 0.37 per 1000, against an average rate of 0.88 for the ten preceding fourth quarters.

The highest county rates were 0.68 in Leicestershire, 0.77 in the West Riding, and 0.83 in Northumberland. In the twenty-eight great towns the rate was 0.40, rising, however, 1.00 in Cardiff, 1.04 in Sheffield, and 1.23 in Newcastle-upon-Tyne. In fifty other considerable towns the rate was 0.41, being, however, 1.08 in Stoke-upon-Trent, 1.59 in York, 1.85 in Southport, 1.93 in Rotherham, and 3.16 in Ystradyfodwg. In the remainder of England and Wales the rate was 0.35; but was in excess in the sub-districts of Camelford, Ashby-de-la-Zouch, Uppingham, Lymm, Middlewich, Ashton-in-Makerfield, Newton-in-Makerfield, Harwood, Morley, Barnsley, Darfield, Bradfield, Wallsend, Holt.

The deaths from *fever*, including typhus, enteric fever, and also simple and ill-defined forms of continued fever, numbered 2234, and corresponded to an annual rate of 0.33 per 1000, against an average rate of 0.45 for the ten preceding fourth quarters.

The highest county rates were 0.51 in Derbyshire, 0.54 in Northumberland, 0.74 in the East Riding, and 0.84 in Worcestershire. In the twenty-eight great towns the rate was 0.34, rising, however, to 0.71 in Preston, 0.72 in Salford, 0.88 in Leeds, and 1.70 in Derby. In fifty other considerable towns the rate was 0.43; being, however, 0.87 in Ystradyfodwg, 0.97 in St. Helens, 1.59 in York, and 1.74 in Bury. In the remainder of England and Wales the rate was 0.30. The mortality was in excess in the registration sub-districts of Antony (St. Germans), and of Kidderminster. In the latter 64 deaths from fever were registered.

The deaths from *whooping-cough* numbered 1974, and corresponded to an annual rate of 0·29 per 1000, against an average rate of 0·37 for the ten preceding fourth quarters.

The highest county rates were 0·56 in Warwickshire, and 0·66 in Durham. In the twenty-eight great towns the rate was 0·38, rising, however, to 0·81 in Birmingham, 0·88 in Oldham, 0·89 in Leeds, and 0·97 in Preston. In fifty other considerable towns the rate was 0·31, being, however, 0·90 in Walsall, 1·13 in Middlesbrough, 1·38 in Wigan, and 1·42 in South Shields. In the remainder of England and Wales the rate was 0·23.

The deaths from *diphtheria* numbered 1475, and corresponded to an annual rate of 0·22 per 1000, against an average rate of 0·14 for the ten preceding fourth quarters.

The highest county rates were 0·50 in Cambridgeshire, and 0·53 in Norfolk. In the twenty-eight great towns the rate was 0·21, rising, however, to 0·27 in Liverpool, 0·28 in Cardiff, 0·29 in London, and 0·37 in Norwich. In fifty other considerable towns the rate was 0·13, being, however, 0·92 in Southport. In the remainder of England and Wales the rate was 0·24. Among sub-districts, the mortality was in excess in Frimley, West Horsham, Wisbech, Orford, Holt, Wymondham, Wells (Norfolk), Shaftesbury, Milverton, Culmstock, Winterton, Sutton-in-Ashfield, Whixley, Lydney, Nevin.

The deaths from *small-pox* numbered 844, and corresponded to an annual rate of 0·12, against an average of 0·05 for the ten preceding fourth quarters.

Of the 844 deaths, 530 were either in London or in the hospitals for the treatment of London sick; while 146 more were in the Outer Ring, and mostly in West Ham. Of the remainder, 47 were in the county of Durham (including 38 in Durham City), 14 in Staffordshire, 12 in Bedfordshire, 11 in Somersetshire (all in Taunton), 10 each in Cheshire and Lancashire, leaving 64 in the rest of England and Wales.

The following Table shows the relative mortality from each of the above-mentioned zymotic diseases in the twenty-eight great towns, in the fifty other considerable urban districts, and in the remainder of the country :—

ANNUAL DEATH-RATE per 1,000 from several ZYMOTIC DISEASES during the Fourth Quarter of 1884.

	From Diseases in Cols. 2-8.	Small- pox.	Measles.	Scarlet Fever.	Diph- theria.	Whoop- ing- cough.	Fever.	Diarrhoea.

CERTIFICATION OF CAUSES OF DEATH.—The causes of 125,011, or 91·1 per cent., of the 137,230 deaths in England and Wales were certified by registered medical practitioners in attendance during the last illness, and 7200, or 5·2 per cent., by coroners in inquest cases. The causes of the remaining 5019, or 3·7 per cent., of the deaths were uncertified. The proportion of uncertified deaths in London did not exceed 1·3 per cent., whereas it was 4·1 per cent. in the rest of England and Wales. The per-centage of uncertified causes of death did not exceed 0·5 in Wiltshire, 1·0 in Berkshire, and 1·2 and 1·3 in the extra-metropolitan portions of Middlesex and Surrey respectively; whereas it ranged upwards to 5·7 in Cornwall and in Durham, 7·5 in Herefordshire, and 8·0 in Shropshire. In North Wales 11·6 per cent. of the causes of death were uncertified.

In the twenty-eight great towns the proportion of uncertified deaths was 2·4 per cent.; but while it was only 1·3 in London, it was 3·3 in the twenty-seven provincial towns. The per-centages in those provincial towns ranged from 0·6 in Derby, 0·7 in Plymouth, 1·4 in Portsmouth, and 1·5 in Cardiff, to 5·1 in Sheffield, 5·7 in Liverpool, 6·2 in Oldham, and 6·7 in Hull.

**VIOLENT DEATHS.**—The deaths referred last quarter to different forms of violence were 4042; they corresponded to an annual rate of 0·59 per 1000 of the estimated population, and were 2·9 per cent. of the total deaths. The death-rate from violence ranged from 0·30 in Wiltshire, 0·31 in Essex, and 0·33 in Northamptonshire, to 0·73 in Warwickshire, 0·74 in Westmorland, 0·75 in Shropshire, and 1·03 in Monmouthshire. In the twenty-eight great towns the deaths from violence corresponded to an annual rate of 0·72; the rates in the several towns ranged from 0·36 in Bradford, 0·38 in Wolverhampton, 0·44 in Plymouth, and 0·48 both in Portsmouth and Sheffield, to 0·89 in Newcastle-upon-Tyne, 0·94 in Sunderland, 1·00 in Birmingham, and 1·27 in Liverpool.

**INQUESTS.**—During last quarter 7200 inquest cases were registered, being 5·2 per cent. of the total deaths. The average proportion in the ten preceding corresponding quarters was 5·3. In the twenty-eight great towns the proportion of inquests to deaths was 6·6 per cent.; it ranged from 2·2 in Oldham, 2·8 in Hull, and 3·0 in Preston, to 8·2 in Manchester and in Birkenhead, 9·6 in Leicester, and 9·7 in Birmingham.

**DEATHS IN PUBLIC INSTITUTIONS.**—The deaths registered last quarter in workhouses, hospitals, and public lunatic asylums numbered 14,797, or 10·8 per cent. of the total deaths; this proportion was 1·2 per cent. in excess of the mean per-centage in the fourth quarter of the ten years 1874–83. In the corresponding periods of 1882 and 1883 the proportions of deaths in public institutions were 10·3 and 10·0 respectively. In the twenty-eight great towns 8376, or 16·4 per cent. of the deaths last quarter were recorded in the principal public institutions, against 15·8 per cent. in the fourth quarter of 1883; the proportions of institution deaths in these towns ranged from 6·8 in Bradford, 6·9 in Hull, and 7·0 in Preston, to 16·0 in Portsmouth, 18·5 in Brighton, 19·8 in Manchester, and 22·3 in London. Excluding the twenty-eight great towns, the proportion of such deaths in the rest of England and Wales did not exceed 7·4 per cent.

#### HEALTH OF FOREIGN AND COLONIAL CITIES.

A summary of the Weekly Returns with which the Registrar-General is favoured by various local authorities abroad, shows that the average annual death-rate during the quarter ending December last in thirty Colonial and Foreign cities, having an aggregate population of more than fifteen millions of persons, was 24·6 per 1000. In the twenty-three European cities the average rate was 24·3 per 1000, against 21·7 in twenty-eight of the largest English towns. Among the thirty Colonial and Foreign cities the lowest death-rates were 19·0 in Baltimore, 19·3 in Christiania, 20·2 in Philadelphia, and 20·8 in Geneva; the rates ranged upwards in the other towns to 31·7 in Turin and in Lisbon, 32·7 in Madrid, and 40·9 in Madras. The 23 deaths from small-pox in Paris showed an increase upon the number in the preceding quarter; the fatal cases of measles and of diphtheria and croup also showed a marked increase, while the prevalence of typhoid fever considerably declined during the quarter. The deaths referred to typhus and typhoid fever in St. Petersburg showed a further decline from the numbers returned in the three preceding quarters; the mortality from measles also showed a considerable decline, while that from diphtheria increased. Small-pox was prevalent during the quarter in Prague, Rome, Turin, Venice, Lisbon, and Madrid. Measles was epidemic in Copenhagen during the quarter under notice, and caused 246 deaths, against 3 and 48 in the two preceding quarters; this disease was also fatally prevalent in Amsterdam and in Madrid. Scarlet fever caused 242 deaths in Amsterdam

during the quarter, against 76 and 128 in the two preceding quarters, and showed increased prevalence in Stockholm, Berlin, New York, and Philadelphia. No fewer than 710 deaths were referred to diphtheria in Berlin, against 423 in the previous quarter; this disease also showed increased prevalence in Prague and New York. The deaths referred to typhus and typhoid fever showed an increase in Brussels, Stockholm, Hamburg, Turin, Buda-Pesth, Madrid, New York, and Philadelphia.

### The Year 1884.

During the four quarters of 1884, 908,574 births and 531,951 deaths were registered in England and Wales. The *natural* increase of population during the year, by excess of births over deaths, was 376,623, against 372,360 and 367,153 in 1882 and 1883. The estimated increase of population during the year, calculated in accordance with the rate of increase that prevailed during the last intercensal period (1871-81) was 364,148, and 12,475 less than the excess of births over deaths. According to returns issued by the Board of Trade, 245,765 British emigrants (of whom 150,652 were English, 22,276 Scotch, and 72,837 Irish) left the various ports of the United Kingdom at which emigration officers are stationed, during the year. This number showed a decline of 76,149 from the number in 1883. Compared with the returns for 1883, the decrease of emigration last year from England was equal to 19·1 per cent., from Scotland 29·2 per cent., and from Ireland 30·1 per cent.

The birth-rate in England and Wales in 1884 was equal to 33·5, and the death-rate to 19·6 per 1000 persons estimated to be living in the middle of the year. The birth-rate showed a slight recovery from the exceptionally low rate in 1883, but was 1·4 below the mean rate in the ten years 1874-83. The death-rate, which had been 18·9, 19·6, and 19·5 in 1881-82-83, was again 19·6 last year. The mean annual death-rate during the first four years of the current decade 1881-90 was so low as 19·4 per 1000, and was 2·0 below the mean rate in the preceding decade 1871-80. This reduction in the death-rate implies that nearly 213,000 persons in England and Wales survived the last four years whose deaths would have been recorded had the mean rate of mortality prevailing in the preceding decade been maintained.

The 531,951 deaths during 1884 included 133,577 of infants under one year of age, and 135,093 of persons aged upwards of 60 years. The rate of infant mortality, measured by the proportion of deaths under one year of age to registered births, was equal to 147 per 1000, against 141 and 137 in the two preceding years. The proportion of infant mortality averaged 149 per 1000 births during the ten years 1871-80, while the mean proportion during the past four years of the current decade was only 139. The rate of mortality during 1884 among persons aged upwards of 60 years was equal to 67·3 per 1000 persons estimated to be living at those ages; in the three preceding years the death-rates at these ages were 67·2, 65·6, and 69·6 per 1000 respectively.

The deaths from all causes during the year included 24,988 from diarrhoea, 10,891 from measles, 10,866 from whooping-cough, 10,681 from scarlet fever, 7378 from "fever" (including typhus, enteric, and simple or ill-defined), 4696 from diphtheria, and 2262 from small-pox. Thus, 71,762 deaths were referred to these principal zymotic diseases, showing an increase of 12,790 upon the number returned in 1883; they were equal to a rate of 2·64 per 1000, against 2·32, 2·73, and 2·20 in the three preceding years 1881-2-3. The mean annual death-rate from these zymotic diseases, which had been 3·87, 4·11, and 3·36 per 1000, respectively, in the three decades 1851-60, 1861-70, and 1871-80, did not exceed 2·47 in the first four years of the current decade.

Compared with the numbers in 1883, the deaths referred to scarlet fever and "fever" showed a decline, whereas the fatal cases of diarrhoea, measles, whooping-cough, and small-pox were more numerous. The mortality from "fever" was equal to 0·27 per 1000 (and was lower than in any previous year on record

except 1881, when the rate was equally low), against 0·27, 0·31, and 0·29 in the three years 1881-2-3; the mean death-rate from this cause in the past four years of the current decade was 0·29, whereas in the three preceding decades it was equal to 0·91, 0·89, and 0·48 per 1000 respectively.

During the year 28,201 inquest cases were registered, equal to 5·3 per cent. of the total deaths, which was almost identical with the mean per-centage in recent years. The reported deaths from different forms of violence were 16,926, and 302 fewer than the number in 1883; they were equal to 3·2 per cent. of the deaths from all causes, and to a rate of 0·62 per 1000 of the estimated population, against 0·64 in 1883.

The foregoing statistics for 1884 are derived from a summary of the returns furnished to the Registrar-General by more than 2000 local registrars at the close of each quarter of the year. The figures are therefore subject to revision when the causes of death and other details are finally classified and tabled for publication in the Registrar-General's Annual Report for 1884.

---

# PRELIMINARY TABLES.

TABLE I.—**Marriages, Births, and Deaths** registered in **England and Wales** in the Years **1874-84**, and in each Quarter of those Years.

Note.—In calculating these rates of mortality corrections are made for inequalities in the numbers of days in the different quarters of the year. The annual rates are the means of the four quarterly rates.

\* The deaths in the town districts include 14 weeks' deaths in London, the death-rate corrected for this inequality would be reduced to 21.3.

TABLE IV.—The Average Price of Consols, of Wheat, of Meat, and of Coal in each Quarter of 1882, 1883, and 1884; also the Average Weekly Number of Paupers relieved in those Quarters.

\* Furnished by the Chief Cashier of the Bank of England.

† As published by the Comptroller of Corn Returns to the Board of Trade.

‡ These are the average prices at which the best seaborne Newcastle, Sunderland, and Hartlepool coals are put in barge from the collier in the Thames; the difference between these prices and those charged to the consumer represents the cost of distribution and merchant's profit. These figures are derived from returns with which the Registrar-General has been favoured by Mr. Richard Meade of the Mineral Statistics Department, Home Office.

Note.—The letter M or P affixed to the name of each Town denotes whether the limits, which the district or sub-districts named in the last column approximately represent, are Municipal or Parliamentary. Imp† D. signifies an Improvement District, and L. G. D. a Local Government District.

† The rates of mortality for these towns have been corrected by the exclusion of a proportional number of deaths occurring in County Hospitals and Lunatic Asylums, situate within the districts or sub-districts here taken as representing the towns, or by the exclusion of a proportion of the deaths in Union Workhouses in cases where only a portion of the Union is embraced by the area taken, or where the Workhouse is situated outside that area.

† The rate of increase of population in Barrow-in-Furness and in Ystradfydwg was so abnormally large between 1871 and 1881 as to preclude the probability of the rate being maintained between 1881 and 1891. The present population of these towns has therefore been estimated from special returns of inhabited houses with which the Registrar-General has been favoured by the local authorities.

*Note.*—In estimating the population of these Districts, upon which the birth and death-rates have been calculated, it has been assumed that the rate of increase in Greater London since 1881 has been the same as that which prevailed between 1871 and 1881; the estimate for the Outer Ring is obtained by the deduction of the estimated population of Inner London from that of Greater London. The estimates for the suburban districts have been adjusted to cast to the estimated total of the population of the Outer Ring, obtained in the manner above described. In calculating the rates of mortality, a proportion of the deaths recorded in the three Middlesex County Lunatic Asylums, situated in the Districts of Epsom, Uxbridge, and Barnet, has been excluded as belonging to the Middlesex portion of Registration or Inner London, and the remainder distributed among the Middlesex Districts of the Outer Ring.

TABLE IX.—**Births and Deaths in the Fourth Quarter of 1884, in 30 Foreign Cities, having an estimated aggregate Population of 15,163,338 persons.**

\* The Registration or Union Counties consist of groups of Superintendent Registrars' Districts, which are generally co-extensive with Poor Law Unions. Those Districts which extend into two or more Counties (proper) are included entirely in that County in which the principal town of the district, or the greater part of the population, is located. The boundaries of Registration or Union Counties therefore differ more or less from the boundaries of Counties (proper).

b The averages of Marriages and Births are given only for the Eleven Divisions and for Registration Counties.

NOTE.—The Registrars alone must be considered responsible for the accuracy of the figures shown in their Returns, and for the opinions expressed in the foot notes.

a The Superintendent Registrars' Districts (630 in number) are collections of contiguous Parishes or Places, combined for purposes connected with the Registration of Births, Deaths, and Marriages, and are nearly always identical with the Poor Law Unions of the same names; they are here arranged topographically under the Registration Counties.

b These areas, which were partly revised by the Ordnance Survey Department, are the same as those published in the Abstracts of the Census of 1881. They do not include space occupied by foreshore or tidal water of rivers and creeks. c See page 14, note b.

d A 44.—Prior to 26th December 1884 the Superintendent Registrar's District of STROOD was designated North Aylesford.

## II.—SOUTH EASTERN COUNTIES.—SUPERINTENDENT REGISTRARS' DISTRICTS.—continued.

No.	Superintendent Registrars' Districts.	Area in Statute Acres.	Enumerated Population, 1881.	Marriages Registered in Quarter ending 30 Sept. 1884.	Births Registered in Quarter ending 31 Dec. 1884.	Deaths Average in Quarters ending 31 Dec. 1881-85.	The DEATHS in the Quarter are stated by the Registrars to include													
							Deaths of Infants under 1 Year of Age.	Persons aged 60 Years & upwards.	Deaths from										Inquest Cases.	Deaths in Public Institution.
									Small-pox.	Measles.	Scarlet Fever.	Diphtheria.	Whooping-cough.	Fever.	Diarrhoea.	Cholera.	Violence.

\* The Registration Sub-districts (2149 in number) are sub-divisions of the Super-intendent Registrars' Districts in which the Births and Deaths are registered by Registrars severally appointed for that purpose. The letter W denotes that the Sub-district contains within its limits a Workhouse belonging to the District or Union; w indicates that a Workhouse Establishment receiving inmates from other Districts than the one in which it stands is included; H indicates Hospital or Infirmary; and L Lunatic Asylum.

<sup>b</sup> For London, the numbers of Births and Deaths, as well as the details given under "Infants under 1 year of age" and the twelve subsequent headings in this Table, are derived from the Weekly Returns made by the Registrars, and relate to 14 weeks ending 3rd January 1885.

I.—LONDON.—REGISTRATION SUB-DISTRICTS—continued.

<sup>a</sup> 618: 1.—The 11 deaths from scarlet fever occurred in the parishes of Gresford and Rossett.

<sup>b</sup> 618: 3.—Of the 32 deaths from scarlet fever, 21 occurred in Wrexham Urban Sanitary District. The 3 deaths from diphtheria occurred in the parish of Brynho.

<sup>c</sup> 620: 1.—Of the 3 deaths from diphtheria, 5 occurred in the parish of Dymelochion.

<sup>d</sup> 623: 2.—The 13 deaths from scarlet fever occurred in Festiniog Urban Sanitary District.

<sup>e</sup> 626: 4.—Of the 6 deaths from diphtheria, 4 occurred in the parish of Nevin.

<sup>f</sup> 629: 2.—Of the 3 deaths from diphtheria (all in the Rural Sanitary District), 3 were registered in November and 5 in December.

## METEOROLOGY OF ENGLAND.

REMARKS ON THE WEATHER DURING THE QUARTER ENDING DEC. 31ST, 1884.

*By JAMES GLAISHER, Esq., F.R.S., &c.*

The weather in October was remarkably fine and dry; the temperature, with the exception of the few days from the 9th to the 13th, was generally above the average with a good deal of sunshine. The pressure of the atmosphere with the exception of the few days, the 8th to the 12th and 26th, 27th, and 28th, was above the average, and the mean pressure for the month, was higher than in any month since January. The fall of rain was small being a good deal below the average, the land generally was too dry for sowing, and the scarcity of water caused inconvenience in many places; there were scarcely any storms, and a marked deficiency of S.W. winds, and an excess of N.W.

The weather in November, during the first half of the month was warm and bright, the last half was cold, particularly the 24th and 25th. The pressure of the atmosphere with the exception of a very few days was above the average, and the mean pressure for the month was the highest in the year. The fall of rain was small generally, and the land was still dry; there was again a great deficiency of S.W. winds, and the month was almost free from storms.

The weather in December, with the exception of the first two days, was mild till the 20th, and from the 21st the temperature was below the average. The atmospheric pressure was generally below the average till the 20th, and was alternately above and below the average from the 21st, the sky was generally cloudy; rain fell frequently till the 20th, and it was generally in excess of the average. Thunderstorms occurred on two days, and snow fell on 12 days, chiefly in the Midland counties.

About London the mean daily temperature of the air for the 1st day in October was above its average by  $1^{\circ}0$ , the mean deficiency of the next four days was  $2^{\circ}2$  daily, the 6th and 7th days were slightly in excess of their averages, there was then a week of very cold weather, the deficiency averaging  $6^{\circ}3$  daily; from the 15th to the 19th the daily excess was  $4^{\circ}2$ ; from the 20th the mean temperature was below with but few exceptions till the 29th, the deficiency being  $1^{\circ}0$  daily. For fifteen days ending November 13th the excess of mean temperature was  $3^{\circ}9$ . From November 14th to December the 2nd the weather was cold the deficiency being  $4^{\circ}3$ . From December 3rd to the 20th the mean temperature was high, the excess over the average being  $3^{\circ}6$  daily, and for the last 11 days in the year the daily deficiency was  $1^{\circ}9$ .

The mean temperature of the air for October was  $48^{\circ}9$ , being  $0^{\circ}6$  and  $1^{\circ}1$  below the averages of 113 years and 43 years respectively; it was  $1^{\circ}5$  and  $1^{\circ}9$  lower than in 1883, and 1882, and  $5^{\circ}6$  higher than in 1881.

The mean temperature of the air for November was  $42^{\circ}4$ , being  $0^{\circ}1$  above the averages of 113 years and  $1^{\circ}1$  below the average of 43 years; it was  $1^{\circ}4$ ,  $1^{\circ}1$ , and  $6^{\circ}3$  lower than in 1883, 1882, and 1881 respectively.

The mean temperature of the air for December was  $41^{\circ}0$ , being  $1^{\circ}9$  and  $1^{\circ}1$  above the averages of 113 years and 43 years respectively; it was  $0^{\circ}5$ ,  $0^{\circ}9$ , and  $1^{\circ}2$  higher than in 1883, 1882, and 1881 respectively.

The mean temperature of the quarter was  $44^{\circ}1$ , being  $0^{\circ}5$  higher than the average of 113 years and  $0^{\circ}4$  lower than the average of 43 years.

The mean high day temperatures of the air in October was  $56^{\circ}5$ , being  $1^{\circ}6$  below the average of 43 years, in November it was  $47^{\circ}6$ , being  $1^{\circ}3$  below the average, and in December it was  $45^{\circ}1$ , being  $0^{\circ}4$  above the average.

The mean low night temperatures of the air in October was  $41^{\circ}6$ , being  $1^{\circ}9$  below the average of 43 years; in November it was  $36^{\circ}8$ , being  $0^{\circ}5$  below the average, and in December it was  $36^{\circ}5$ , being  $1^{\circ}3$  above the average.

The mean daily range of temperature in October was  $14^{\circ}9$ , being  $0^{\circ}3$  greater than the average; in November it was  $10^{\circ}8$ , being  $0^{\circ}7$  smaller than the average, and in December it was  $8^{\circ}6$ , being  $0^{\circ}8$  smaller than the average.

The mean temperature of the air for October was  $10^{\circ}4$  lower than in September, in November it was  $6^{\circ}5$  lower than in October, and in December it was  $1^{\circ}4$  lower than in November.

(From the preceding 43 years' observations the decrease of temperature from September to October is  $7^{\circ}1$ , the decrease from October to November is  $6^{\circ}5$ , and the decrease from November to December is  $3^{\circ}6$ .)

From September to October there was a decrease of temperature at stations south of  $51^{\circ}$  of  $7^{\circ}0$ , between  $51^{\circ}$  and  $52^{\circ}$  of  $9^{\circ}8$ , between  $52^{\circ}$  and  $53^{\circ}$  of  $9^{\circ}6$ , between  $53^{\circ}$  and  $54^{\circ}$  of  $8^{\circ}6$ ; and north of  $54^{\circ}$  of  $7^{\circ}7$ .

From October to November there was a decrease of temperature at stations south of  $51^{\circ}$  of  $6^{\circ}3$ , between  $51^{\circ}$  and  $52^{\circ}$  of  $6^{\circ}7$ , between  $52^{\circ}$  and  $53^{\circ}$  of  $6^{\circ}8$ , between  $53^{\circ}$  and  $54^{\circ}$  of  $5^{\circ}8$ , and north of  $54^{\circ}$  of  $7^{\circ}7$ .

From November to December there was a decrease of temperature at stations south of  $51^{\circ}$  of  $3^{\circ}2$ , between  $51^{\circ}$  and  $52^{\circ}$  of  $1^{\circ}3$ , between  $52^{\circ}$  and  $53^{\circ}$  of  $1^{\circ}8$ , between  $53^{\circ}$  and  $54^{\circ}$  of  $2^{\circ}9$ , and north of  $54^{\circ}$  of  $2^{\circ}3$ .

NOTE.—In reading this table it will be borne in mind that the sign (+) signifies *above* the average, and the minus sign (−) signifies *below* the average.

Average duration of the different directions of the wind referred to eight points of the compass, and duration of each direction in each month in the quarter, were as follows:—

Direction of Wind.	OCTOBER.			NOVEMBER.			DECEMBER.		
	1884.	Average.	Departure from Average.	1884.	Average.	Departure from Average.	1884.	Average.	Departure from Average.
	d.	d.	d.	d.	d.	d.	d.	d.	d.
N.W.	7½	2½	+ 5	5½	2½	+3½	3½	2½	+1
N.	2½	3½	- 1½	1½	4½	-2½	3½	3	+ ½
N.E.	2½	3	- ½	2½	4	-1½	2½	2½	0
E.	3	1½	+ 1½	3½	2½	+1½	5½	2	+3½
S.E.	½	2	- 1½	1½	2	- ½	1	2	-1
S.	2	4	- 2	3½	4	- ½	2	3½	-1½
S.W.	3½	10	- 6½	2½	8½	-6½	8½	11	-2½
W.	7½	4½	+ 3½	2½	4½	+4½	4½	4½	0
Calm.	1½	0	+ 1½	2	0	+2	0	0	0

The plus sign (+) denotes excesses over averages; the largest numbers affected with this sign in the month of October are opposite to N.W. and W.; in November to W. and N.W.; and in December to E. and N.W.

The minus sign (−) denotes deficiencies below averages. In October the largest numbers are opposite to S.W. and S.; in November to S.W. and N.; and in December to S.W. and S.

The mean reading of the barometer for the month of October at the height of 160 feet above the level of the sea was 29.895 ins., being 0.185 in. higher than the average of 43 years, and being 0.095 in., 0.239 in., and 0.068 in. higher than in 1883, 1882, and 1881 respectively.

The mean reading of the barometer for the month of November was 29.978 ins., being 0.237 in. above the average of 43 years, and being 0.319 in., 0.446 in., and 0.193 in. higher than in 1883, 1882, and in 1881 respectively.

The mean reading of the barometer for the month of December was 29.690 ins., being 0.102 in. below the average of 43 years, and being 0.293 in. lower than in 1883, 0.197 in. higher than in 1882, and 0.131 in. lower than in 1881.

From September to October there was an increase of pressure at stations south of 51° of 0.098 in., between 51° and 52° of 0.065 in., between 52° and 53° of 0.044 in., between 53° and 54° of 0.051 in., and north of 54° of 0.056 in.

From October to November there was an increase of pressure at stations south of 51° of 0.054 in., between 51° and 52° of 0.086 in., between 52° and 53° of 0.100 in., between 53° and 54° of 0.091 in., and north of 54° of 0.102 in.

From November to December there was a decrease of pressure at stations south of  $51^{\circ}$  of  $0.251$  in., between  $51^{\circ}$  and  $52^{\circ}$  of  $0.286$  in., between  $52^{\circ}$  and  $53^{\circ}$  of  $0.317$  in., between  $53^{\circ}$  and  $54^{\circ}$  of  $0.328$  in., and north of  $54^{\circ}$  of  $0.363$  in.

About London the barometric pressure till October 7th, was above the average by  $0.39$  in. daily; from the 8th to the 12th it was below by  $0.22$  in. daily; for 13 days there was an excess of mean daily pressure to the amount of  $0.31$  in.; then for 3 days a daily deficiency of  $0.20$  in. From October 29th the pressures were above their averages, with but few slight exceptions till November 27th, the average daily excess of these 30 days being  $0.26$  in. From November 28th to December 20th, the pressure was generally below its average, the mean daily deficiency being  $0.17$  in.; from the 21st the pressure was alternately on 2 or 3 days a little above the average, and then on 2 or 3 days a little below.

*Thunderstorms occurred* in October on the 9th at Barnet and Oxford; on the 21st at Salisbury; and on the 26th at Carlisle.

In November on the 4th at Silloth.

In December on the 18th at Totnes, Ventnor and Nottingham; on the 19th at Torquay.

*Thunder was heard but lightning was not seen* in October, on the 24th at Carlisle.

In December on the 17th at Bolton; and on the 19th at Bath.

*Lightning was seen but thunder was not heard* in October, on the 10th at Torquay; on the 11th at Guernsey; and on the 14th at Halifax.

In November on the 20th at Carlisle.

In December on the 4th at Burslem and Lancaster; on the 12th and 13th at Carlisle; on the 18th at Plymouth and Torquay; on the 26th at Guernsey.

*Solar halos were seen* in October on the 1st at Halifax; on the 3rd at Torquay and Halifax; on the 4th, 7th, 11th, 12th, and 19th at Halifax; on the 24th at Leicester; on the 25th at Torquay and Oxford; on the 26th, 27th, 28th, 29th, 30th, and 31st at Halifax.

In November, on the 1st, 3rd, 4th, 5th, 7th, 8th, and 9th at Halifax; on the 10th at Oxford and Halifax; on the 13th and 14th at Halifax; on the 15th at Oxford; on the 22nd, 23rd, 25th, and 26th at Halifax; on the 28th at Oxford and Halifax; on the 29th at Halifax.

In December on the 2nd at Torquay; on the 5th, 6th, 15th, 16th, 20th, and 22nd at Halifax.

*Lunar halos were seen* in October on the 2nd at Oxford; on the 3rd at Torquay and Oxford; on the 28th at Torquay; on the 29th at Guernsey, Torquay, Halifax, and Stonyhurst.

In November on the 2nd at Hull; on the 3rd at Torquay and Halifax; on the 4th at Marlborough and Oxford; on the 25th and 26th at Halifax; and on the 29th at Torquay.

In December on the 1st at Torquay; on the 2nd and 3rd at Oxford; on the 3rd at Cambridge and Halifax; on the 4th at Torquay; on the 6th at Bolton; on the 30th at Bradford; and on the 31st at Royston and Cambridge.

*Snow fell* in October, on the 9th at Bolton and Carlisle; on the 10th at Torquay, Rugby, Leicester, Burslem, Bolton, and Halifax; on the 26th at Halifax.

In November, on the 17th at Burslem; on the 18th at Royston, on the 20th at Oxford; on the 22nd at Marlborough; on the 24th at Barnet, Oxford, Cardington, Rugby, Burslem, Bolton, and Halifax; on the 25th at Marlborough, Oxford, Rugby, Wolverhampton, Nottingham, Burslem, and Halifax; on the 28th at Burslem; on the 29th at Torquay, Osborne, Marlborough, Royston, Lowestoft, and Somerleyton; on the 30th at Totnes, Barnet, Oxford, Royston, Cardington, Somerleyton, Nottingham, Burslem, Bolton, Halifax, Bradford, and Leeds.

In December, on the 1st at Blackheath, Barnet, Royston, Cambridge, Burslem, Bolton, Hull, and Lancaster; on the 15th at Bolton; on the 17th at Totnes, Torquay, Whitechurch, Royston, Cambridge, Rugby, Nottingham, Burslem, Bolton, Halifax, and Bradford; on the 18th at Oxford, Royston, Cambridge, Lowestoft, Nottingham, Burslem, Halifax, and Hull; on the 19th at Halifax; on the 20th at Whitechurch, Royston, Cambridge, Rugby, Nottingham, and Burslem; on the 23rd at Torquay, Ventnor, and Barnet; on the 24th at Burslem; on the 25th at Whitechurch, Barnet, Oxford, Royston, Cambridge, Rugby, and Burslem; on the 26th at Bath and Rugby; on the 27th at Cambridge; and on the 30th at Oxford.

*Hail fell* in October, on the 8th at Truro; on the 9th at Guernsey; on the 10th at Totnes, Torquay, Whitechurch; on the 11th at Guernsey; on the 12th at Guernsey and Plymouth; on the 26th at Rugby, Bolton, Halifax, and Bradford; on the 28th at Bolton; on the 29th at Bolton and Halifax.

In November, on the 7th at Stonyhurst; on the 24th at Lowestoft, on the 28th at Truro, Whitechurch, Oxford; on the 29th at Truro.

In December, on the 3rd at Truro; on the 4th at Guernsey, Truro, Totnes, Torquay, Bath, Blackheath, Rugby, Bolton, Halifax, Lancaster; on the 7th at Bath; on the 9th at Halifax; on the 15th at Bolton and Halifax; on the 17th at Truro, Totnes, Torquay, Bolton; on the 18th at Guernsey, Royston, Bolton, Halifax; on the 19th at Truro and Bath; on the 20th at Torquay, Bath; on the 24th at Lowestoft; on the 25th at Guernsey; on the 30th at Llandudno.

## MONTHLY METEOROLOGICAL TABLE FOR THE QUARTER ENDING DECEMBER 31st, 1884.

The Observations have been reduced to Mean values by Glaisher's Barometrical and Diurnal Range Tables, and the Hygrometrical results have been deduced from the sixth edition of his Hygrometrical Tables.

Year 1884.	Months.	Pressure of Atmosphere in Month.	Temperature of Air in Month.				Mean Tem- perature.		Vapour.		Mean Reading of Thermometer.		Wind.		Mean Amount of Ozone.		Mean Amount of Cloud.		Rain.	
			Range.				Air.	Dew Point.	Elastic Force.	Mean. In a cubic foot of Air.	Short of Saturation.	Mean Weight of a cubic foot of Air.	Mean Degree of Humi- dity. $\frac{S}{S + 100}$ .	Relative Proportion of N. E. S. W.	Mean Amount of Ozone.	Mean Amount of Cloud.	Number of Days it fell.	Amount in inches.		
			Highest.	Lowest.	Range.	Of all Highest.	Of all Lowest.	Daily Range.
